Subject: Re: CO - Boulder PD Relocation 1 - Update & CDOT

Good Afternoon,

We are still undergoing CDOT compliance reviews on all projects since the changes were made effective in October. I [redacted]

[redacted]		
[redacted]	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]
[redacted]	[redacted]	[redacted]

[redacted]

Thank you for your patience while this new process is being implemented. *Here is the updated information for CDOT permits:*

If your Flock Safety ALPR project involves locations that are on CDOT ROW or CDOT property or infrastructure, please read the following important update:

In October 2023, the Colorado Department of Transportation introduced a revised ALPR permitting process, affecting new requests for fixed ALPRs on CDOT property. ***Existing CDOT-permitted ALPRs are unaffected.*** The revised procedure involves fulfilling the ALPR Evaluation and Checklist, ensuring alignment with statutes, CDOT regulations, and best practices. This finalized document(s) necessitates DocuSign's from the agency involved, with one form required per location, followed by submission to CSP. Upon receiving approval and signature from our contact, Captain Michael Ryan of CSP, we will be authorized to submit the application through CDOT's permit portal for review by the DOT. To advance through DOT review, a DocuSigned CDOT Terms & Conditions form is required, with one form needed for each location. Flock Safety will complete this form and send it to the agency for signature.

Three key changes:

1) Only Colorado law enforcement agencies can apply, with vendor assistance allowed.
2) Approval is limited to ALPR-mounted poles complying with MUTCD.
3) ALPRs must not be mounted on other CDOT infrastructure, and existing CDOT power feeds cannot be used. ALPRs must have their power supply. Exceptions for public safety needs may be considered, but general reasons provided by jurisdictions for ALPR usage/installation won't meet the threshold.

We can process and submit requests for city permit renewals/extensions and help you get CDOT applications completed. Let me know if you have any questions or want to have a quick meeting.

Please let me know if this could work or if we need to plan a call to discuss it further.

For the other 4 locations, are we able to move forward?

Thank you,
Alex

Subject: CO - Boulder PD Relocation 1 - CDOT information

Good Evening Alexandra,

Here is the following information regarding the new CDOT process:

If your Flock Safety ALPR project involves locations that are on CDOT ROW or CDOT property or infrastructure, please read the following important update:
In October 2023, the Colorado Department of Transportation introduced a revised ALPR permitting process, affecting new requests for fixed ALPRs on CDOT property. ***Existing CDOT-permitted ALPRs are unaffected.*** The revised procedure involves fulfilling the ALPR Evaluation and Checklist, ensuring alignment with statutes, CDOT regulations, and best practices. This finalized document(s) necessitates DocuSign's from the agency involved, with one form required per location, followed by submission to CSP. Upon receiving approval and signature from our contact, Captain Michael Ryan of CSP, we will be authorized to submit the application through CDOT's permit portal for review by the DOT. To advance through DOT review, a DocuSigned CDOT Terms & Conditions form is required, with one form needed for each location. Flock Safety will complete this form and send it to the agency for signature.

Three key changes:
1) Only Colorado law enforcement agencies can apply, with vendor assistance allowed.

2) Approval is limited to ALPR-mounted poles complying with MUTCD.

3) ALPRs must not be mounted on other CDOT infrastructure, and existing CDOT power feeds cannot be used. ALPRs must have their power supply. Exceptions for public safety needs may be considered, but general reasons provided by jurisdictions for ALPR usage/installation won't meet the threshold.

Flock's Commitment:
Deployment teams are currently reviewing all proposed locations to ensure compliance with CDOT regulations. If locations are not in compliance, we will propose alternative locations and notify you for review and/or approval. Please note that changes are subject to any changes made by CSP or CDOT.

Thank you for your patience while this new process is being implemented.

Hi Alex,

I appreciate you reaching out and for all of the added context here. We totally missed the boat on this Raven pilot and I sincerely apologize. I will get with my boss to remove the Raven products from your account and expect to have this off by Monday of next week. In the meantime, I can work with our deployment team on the four cameras you are looking to relocate. I'm sure you have already shared these new locations to other

members of the Flock team before but if you could send them my way I will ensure we get this taken care of. Now that we have guidelines to receive CDOT permits, we will just need to make sure these locations are not on DOT owned infrastructure. CDOT is currently only approving locations that are on CDOT approved poles (which we have) or on non CDOT owned poles like utilities, light poles, etc. They are also requiring that if we install our pole that it will need to be behind a guardrail.

Do you mind sharing these locations with me? If there is any other additional context on the relocation that will help me understand where things are at please send it my way so I can escalate to the permitting team.

Thanks,

Will

>
> Additionally, we are requesting more information regarding the movement of four of our cameras. We have been working on this project since April, and have been lacking communication as to what the holdup is. It's understandable that there was some issues with CDOT permits. However, it does not seem that is the only barrier. At this point, it is looking to be a year long process to move his cameras to more suitable locations.

Commander Heath,

Thank you again for your time this morning and it was great to officially meet you. I've already sent out an email to our Regional Director providing the background into our discussion today, plans moving forward, and confirming a deadline for the pilot which we will relay to you shortly. I've also reached out to billing to ensure there will be a pause on billing & invoices. These invoices are automated so if for any reason

you still receive one, let Jaime and I know so we can get it squared away.

Jaime and I will be taking care of Boulder PD moving forward but I also wanted to introduce you to our Commercial Rep, Luke Walters (cc'd). Luke is a Colorado native and very familiar with Boulder as he attended school there. He will be a great resource to have in finding commercial businesses to fund cameras that you would get direct access to. It sounds like he may be working with others within the department but if you have any contacts that you would like for him to get in touch with don't hesitate to reach him.

Thanks again and I will be in touch with you very soon on next steps with Raven!

Will

External Sender Notice This email was sent by an external sender.

Commander Heath,

This is Will with Flock Safety. I am the territory sales manager for the state of Colorado and will be working alongside the customer success team throughout our partnership + the Raven pilot. I tried reaching your cell just a moment ago but I'm sure you're busy at the moment or not used to seeing a 205 area code calling you. Ha!

For the pilot period with Raven, we provide a 90 day test once everything is up and running. When you have some time, I'd like to connect with you to understand where everything is at on your end and help anyway I can moving forward. You can reach me at (205) 821-5424.

Look forward to hearing from you!
