I had a list going that I could give you. I haven't kept it up to date lately but can give you some very raw stuff.

Get Outlook for iOS

Copy that, thanks for the quick reply!

Was also curious if you had any Flock stats or big wins on hand that I could share with other agencies?

Looking to expand this CO network a bit in the new year. No worries if not, but thought I would check!

Thanks,
Andrew

Hope you had a fantastic and safe New Year. Excited to expand our work together with some of these current initiatives.

Was curious what the next steps in your eyes are to move forward on Raven as well as the CUPD deployment? Let me know if we need to gather everyone for a quick Zoom.

Also, I know you mentioned that Edward was in contact with Shelby, so if my role at this point is to butt out and let everyone work their magic, that works quite alright with me, just want to make sure we're moving things along!

Thanks,
Andrew

Subject: Follow up

Andrew,

Just finished my meeting with Edward Stafford with the city. He now has a solid understanding of Flock and Raven and will starting the necessary work on his side. It sounds like he has already been in communication with your permitting manager. A couple of things that I told him I would work on getting to him and hoping you can help me out with:

Raven contract (I can work on getting that internally but if you have easy access to it that would be great)

The CUPD point of contact for the cameras (I will also send a request over to CUPD for that)

The deployment manager link for the ALPR's (I lost all of my bookmarks when I got a new computer and I can't seem to find that link, he already has the link for the RAVEN deployment manager)

Stafford is going to work on getting the best point of contact from Xcel so that I can provide that to you. He wants to make sure that he gets the right person involved. I should have gotten Stafford involved from the beginning, but I just didn't know. He seems like he will be easy to work with and will hopefully make some things easier moving forward.

Thanks for being so easy to work with and for having your team available to jump on a call with us. Let me know if you need anything else from me at this point.

Mike
