Brian,

Yesterday I asked out sergeants to get me feedback from the AXON ALPR's and will hopefully have something to you soon. So far the main feedback that I have received is that officers would like the system to be able to read the license state as they receive multiple false hits based on the state. This is something that I brought up in our meeting prior to kicking the trial off. I know that we have had a few recovered steals from the system but I do not have numbers on that for you at this time. During our operation with outside agencies last month we did not get any hits on the AXON cameras.

Brian,

I can't answer your question as I'm not in operations. Jen Bragg is on vacation this week. I'll talk to some patrol folks and try to get some answers for you. I seem to remember that there was some sort of issue early on causing the functionality not to work. When Jen comes back next week, she'll be able to talk about that. If you want to set up a Zoom check-in, I would wait till later next week so we have the right people on the meeting.

Hi Boulder Team –

This is my 3rd email requesting feedback on the Fleet 3 + ALPR trial without response. Is the agency using the ALPR capability? As we are about 60 days in, I would like to set up call to collect feedback prior to closing down the trial. Is there a time later this week or early next that works for a quick zoom?

Sgt. Heath –

I wanted to check-in with you and see how the Axon ALPR trial has been going so far?

Hi Brian,

Sgt Heath will have to speak to success stories, he will be in on Wednesday. Are you able to check on the status of the Axon/Flock API no longer working? I tested it the day we went live with Axon ALPR and it was no longer working so I opened case # 00804805. Therese advised that it was a system wide issue, not just isolated to our API. But I haven't heard much since, other than it was being sent to engineering to review.

Thanks,
Jen

Hi Boulder PD Team –

I was out of the office all last week but wanted to touch base on the trial now that I am back. How is the Fleet 3 + ALPR system performing thus far? Any success stories or items we can support with?

Best,
