Shelby –

Thanks for checking and I have this one on my list. I was able to meet last month with Commander Heath and he provided information that I am reviewing. Unfortunately. I have been sick for about 2 weeks and fallen way behind on many things. I will be looking at this one in the next week or two.

I think we have an easy path for the ones that are covered by the agreement with the city of Boulder. The path is less clear for the ones associated with CU as they do not have the same access to city right-of-way.

Good Morning All,

I am just reaching out to see the status of this. I believe a meeting took place and things should be moving forward, but I just wanted to check in.

Do you need anything from Flock?

To be clear there needs to be a right of way permit authorizing you to build the improvements and a revocable permit that allows the facility to remain. Revocable permits over a certain duration cannot be authorized administratively and require formal City Council action. I would strongly suggest that you do not pursue any stand-alone structures (7 flock poles) for these reasons.
