Andrew,

Just finished my meeting with Edward Stafford with the city. He now has a solid understanding of Flock and Raven and will starting the necessary work on his side. It sounds like he has already been in communication with your permitting manager. A couple of things that I told him I would work on getting to him and hoping you can help me out with:

Raven contract (I can work on getting that internally but if you have easy access to it that would be great)

The CUPD point of contact for the cameras (I will also send a request over to CUPD for that)

The deployment manager link for the ALPR's (I lost all of my bookmarks when I got a new computer and I can't seem to find that link, he already has the link for the RAVEN deployment manager)

Stafford is going to work on getting the best point of contact from Xcel so that I can provide that to you. He wants to make sure that he gets the right person involved. I should have gotten Stafford involved from the beginning, but I just didn't know. He seems like he will be easy to work with and will hopefully make some things easier moving forward.

Thanks for being so easy to work with and for having your team available to jump on a call with us. Let me know if you need anything else from me at this point.

Mike
