DC,

Is this something that we can have IT take the lead on? I don't mind being available for decisions and continuing to work with Flock on the ALPR's, but I would appreciate someone that can handle the heavy lifting on the Raven project.

Thanks,
Mike

Good morning, Sgt. Heath!

We are at a bit of a standstill with the locations proposed on utility poles as we do not have permission from Xcel Energy. Have you made contact with anyone with Xcel? Typically, the utility company will require the PD to enter into some sort of Joint Use Agreement or Attachment Agreement with them.

I definitely want to keep this project progressing, and I know that getting the Xcel permission figured

out will be a huge step forward. Could you let me know if you and your team have been in communication with Xcel? If you do not think we will be able to move forward with these existing poles, please let me know how you would like to proceed!

I am actually transitioning to a new region and my colleague @A'Daisha Allen will be taking over your project, effective this Friday (3/31). A'Daisha has been with Flock Safety for several months working with our Community Safety/HOA customers, and has worked as a project manager for other types of projects for several years. You will be in very good hands with her!

I will still be around as needed while ADaisha gets acclimated to her new region. Please let me know if you have any questions!

Best,
Lindsey

Andrew,

It has been a hectic couple of weeks and as of next Monday I will be promoted to the Watch 1 Commander. I will continue to oversee this project but I might be looking to bring a sergeant on board with me to assist. If that happens I will connect everyone as soon as I can.

I am not completely up to speed with Raven since Deputy Chief Redfearn has been primarily dealing with that so I will need to get briefed up on that. I will try to connect with the DC today but after that it would be good to have a brief chat with you guys on the system and exactly what needs to be done.

Thanks,
Mike

Hey Sgt.,

We're now ready to kick off the permitting process for the Raven deployment, and were hoping you could lend a hand.

First off, I'd like to introduce you to your Permitting Manager, Shelby Ferguson (CC'd). Here's what we need some immediate help with:

- Can you introduce Shelby to Xcel Energy to scope out permitting for the usage of their utility or light poles?
- Can you introduce Shelby to Michael Sweeney for the locations that will be City of

Boulder equipment or ROW?

- CU Boulder PD has officially moved forward, and after review, it sounds like a good amount of their locations are on City of Boulder property, which I know we were both expecting. I imagine Shelby should also leverage Michael Sweeney for that?

Please let me know how I can help.

Thanks,
Andrew
