Good afternoon,

My apologies on the delay. I will connect with the team yo get an ETA

The trail period doesn't start typically until your cameras are validated (confirm that images are being taken)

In regards to fleet 3, that's not a demo I can do but since it's our software, I can run you through the normal demo and it should cover a big chunk of it

> I am hoping that we are still able to give some consideration to the fact that students will be leaving town at the beginning of May and we are still working to get the Axon Fleet 3 ALPR demo that I would like to run concurrently with this demo. I think that we are close to making that happen, however, those cameras are set to installed in the next few weeks and we need some time to trouble shoot installation and other issues prior to flipping the switch on the ALPR function.

Scheduling	Site Survey
Scheduling	Site Survey
Scheduling	Site Survey

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.
Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team
