

FINAL
CONCEPT

The final concept builds on the community’s preferred Moon Orbiter layout while incorporating the playful and active features most supported during community review. Key elements include the trail-side fence, swings, shared walking and bike path, and a multi-use court.

The design enhances the Moon as a central play feature, improves visibility and safety, preserves existing trees and natural character, and introduces a broader mix of recreational opportunities for multiple generations.

Trail-side Fence
10’ Setback

1 Enhanced Moon Play with Slide & Rubberized Surfacing
Área de juegos de la Luna mejorada con resbaladilla y superficie de caucho
