

Enhanced LPR Package

PROBLEM

LPR is powerful, and bad actors are catching on. Swapped plates. Interstate crime rings. Hitting areas without cameras. You know the tactics. Meanwhile, you've got stacks of LPR data and not enough manpower to analyze it.

The result? It's difficult to connect the dots, crime slips through the cracks, and you're not using your force to their fullest capacity.

SOLUTION

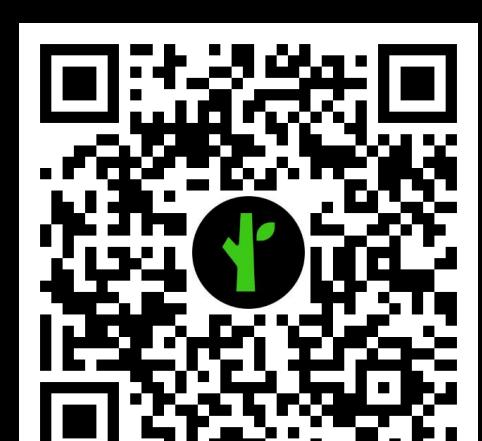

The Enhanced LPR Package gets you there faster.

- **Find Leads Faster:** Spot swapped plates, understand when suspects are operating in multiple jurisdictions, and uncover hidden crime patterns in minutes.
- **Stop Organized Crime:** Identify convoy travel, catch suspects hitting multiple jurisdictions, and coordinate with other agencies to address trafficking, ORC, and auto theft rings.
- **Run Smarter Operations:** Know where to staff patrols or add resources based on hotlist trends.

No new hardware. Just a software upgrade that amplifies the power of your existing LPR data and helps each investigator handle the workload of several officers by collaborating more seamlessly with agencies across the nation's leading LPR network.

Advanced Analytics Features

- **Plate Swap Insights:** Detect swapped license plates to prevent criminals from evading detection.
- **Multi-State Insights:** Uncover suspects operating across state lines, connecting the dots on crimes spanning jurisdictions.
- **Hotlist Hotspot Insights:** Pinpoint areas with the most hotlist hits for strategic resource allocation.

Crimes Solved Weekly
With The Help of Flock
Safety Technology

Real-Time Features

Overcome the challenges of limited information and jurisdictional barriers, equipping officers with instant, actionable insights that increase case clearance and inter-agency collaboration.

VEHICLE DESCRIPTION ALERTS

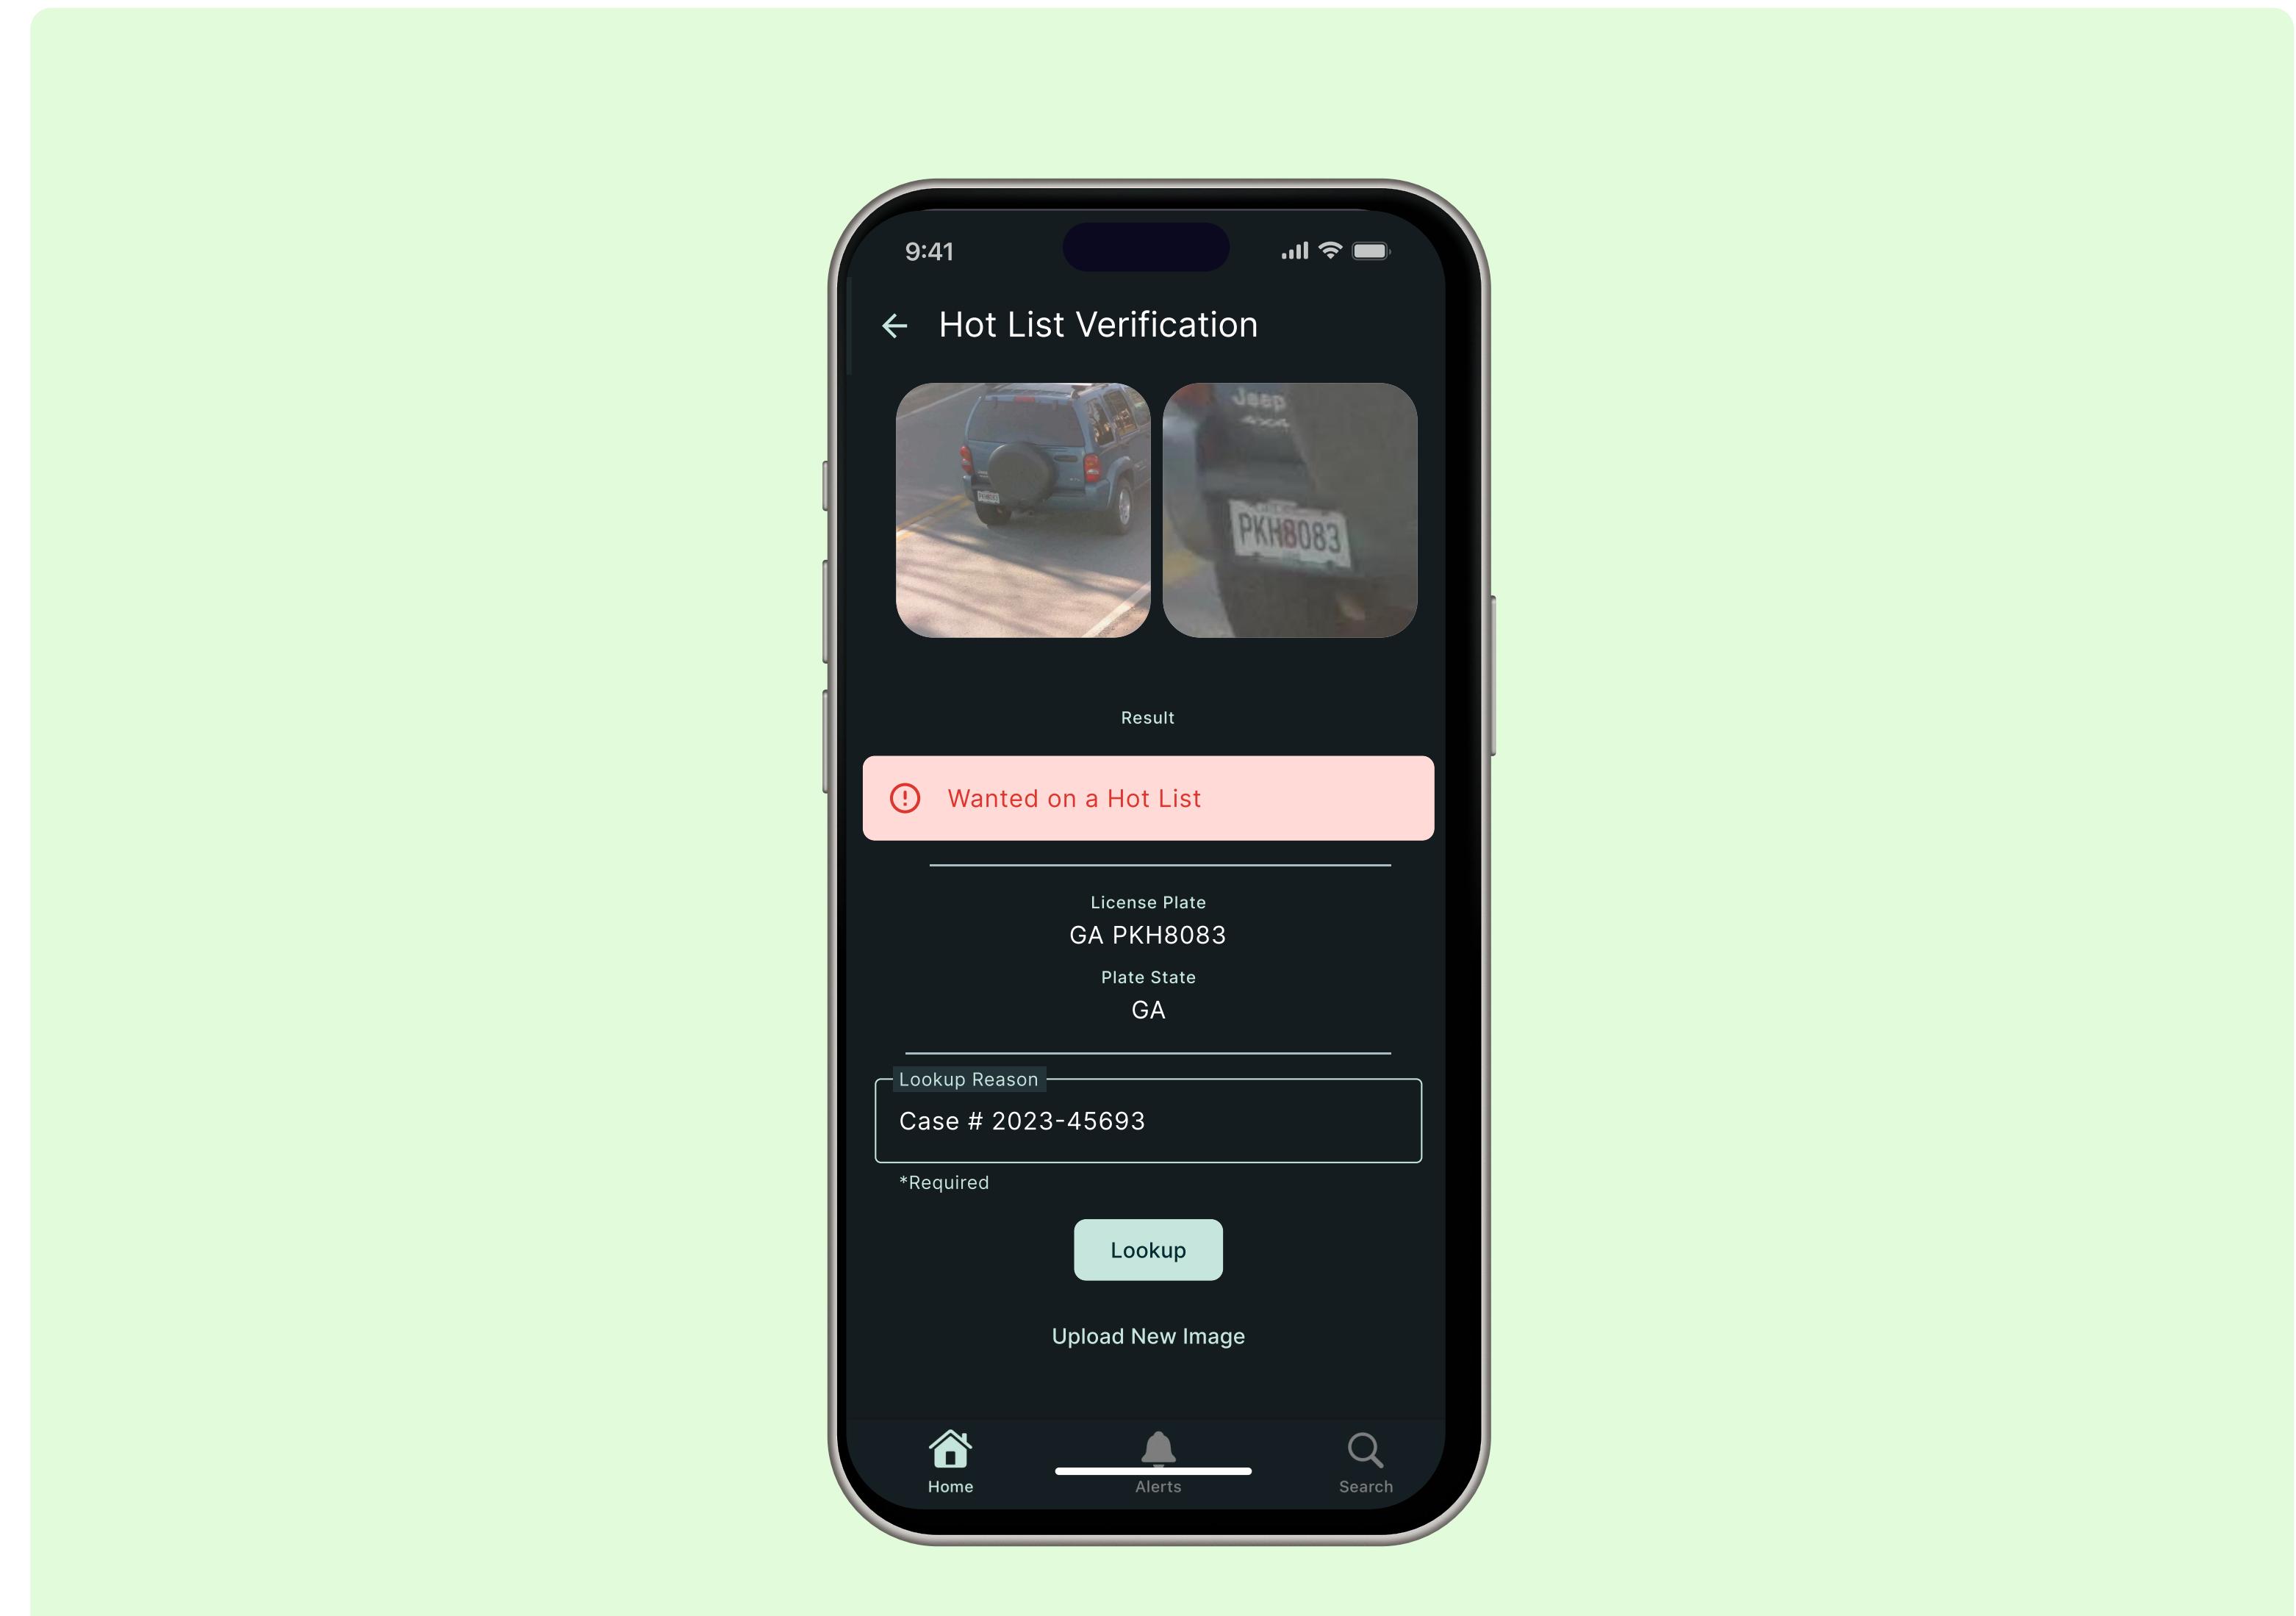

Set up vehicle alerts based on body type, make, color, and other criteria, ensuring timely and relevant notifications, even without a license plate number.

CUSTOM HOT LIST ATTACHMENTS

Equip officers with crucial context during responses. Attach detailed case notes, photos, and reports to Hot List Alerts for a more strategic and secure approach to law enforcement.

CUSTOM HOT LIST DECONFLICTION

Break down barriers in crime investigation. Identify and link overlapping cases within and outside your agency, streamlining communication and operational efficiency by sharing contact details of involved parties.

Vehicle Fingerprint® Search Features

- Convoy Search:** Discover hidden links by identifying suspect vehicles traveling together. It is ideal for tackling organized crime and pinpointing associates.
- Visual Search:** Go beyond LPR data. Convert any digital image into a lead, whether sourced from a civilian smartphone or a security camera.
- Multi-Geo Search:** Trace a suspect vehicle across multiple incidents. This feature allows for connecting disparate crimes without specific vehicle details or plate numbers.

Why Choose the Enhanced LPR Package?

- Actionable Evidence:** Provide clear, reliable, and unbiased data to empower faster, smarter decision-making.
- Collaborative Policing:** Strengthen inter-agency collaboration through shared data and unified tools.
- Efficiency:** Reduce investigative time and streamline processes, allowing agencies to focus resources where they're needed most.
