Good Afternoon Chief Nisleit,

Let me introduce you to [Flock Safety](#) we provide solar powered, cellular wireless ALPR systems as a service to neighborhoods.

We recently installed systems in San Diego for the Torrey View and Greenbrier neighborhoods. I wanted to make sure that your department is aware these systems are in place and to provide the department access as long as the neighborhoods agree, which they usually do.

We will install more systems for other neighborhoods and businesses in San Diego and as the number of systems increases so does the value to your department!

I'd like to schedule a quick call to better describe what we do and how it helps local law enforcement, at no cost to the department. Also, if you're not the best contact for this please let me know who I should reach out to!

I'm also including a link below to a recent news story about a crime that Flock Safety cameras helped to solve.
