Subject: [EXTERNAL] FususONE Release Notes Version 7.2.0

Release Notes 7.2.0

Features & Enhancements

- Administrators can import registrants from a .CSV file.
- A minimum zoom level to display address points can be set for GeoJSON address layers
-

- Users now have the ability to search AI detections by rule name (ex: wrong-direction, crowd-detection, unauthorized-object)
-

- Push notifications will now be limited by the user alert boundary.
-

- fususLISTEN pop-ups now allow the user to still interact with the Map page.
-

Bug Fixes & Maintenance

- Fixed issue with incident management where grids did not sync between users

- Updated button icons on CAD Drawer

-
