oh. my.

Well, that's not overly useful for patrol since they have to have their reports in before they can go home. :0

I sent the ID to engineers that can see a tracking path of the evidence and find where it got caught up. Nothing I can do at this time unfortunately but ill let you know when they have an update. Check tomorrow morning please. Sometimes it fails and you can retry the transcription

Hey Gabe,

I don't need anything done about it tonight, but I've been waiting for an interview to transcribe for five hours now. It just keeps spinning. Any thoughts?  
-Dan
