Hi there,

[redacted] here from Flock Safety Customer Support. While responding to an alarm for camera **#13 N/B Lasselle @ Ramona Expressway**, the technician noticed that the location experienced third-party damage as the pole was bent on the ground and equipment was not operable (see attachments). We went ahead and replaced the equipment to ensure the location was functioning properly as soon as possible.

Due to the physical damage, we will be sending an invoice in conjunction with our reinstall fee schedule. This invoice ($1300) will be emailed to [redacted] upon reinstallation. For additional information, please see Section 8.2 of our Terms and Conditions.

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology. Please let me know when you receive this message.

Stay safe,
[redacted]

Subject: Followup from Sharing Dashboard discussion

CAUTION: This email originated from outside the **Riverside Sheriff** email system.
DO NOT click links or open attachments unless you recognize the sender and know the content is safe.

Hello Lt,

Thank you for your time last Friday. Our team was able to dive into the data and make some updates to accurately reflect the numbers on our side. I feel like I have a much better grasp on how to inform my customers on what they have pending and mention some best practices.

To confirm, allowing hotlist access to your network does not provide access to your agency's custom hotlists. It simply allows the receiving agency to get SVS alerts from your cameras and to apply their own hotlists to yours. Your users have the same ability today with many surrounding agencies. Once you accept all the CA requests, you can update your share permissions to reflect both Search & Hotlist and you won't have to monitor your dashboard as much.

Let me know if you have additional questions and have a great day!

We do not manage that piece but communicate with the hired contractor via the city. There is still an implementation fee for us to install the hardware at the point of delivery. The City Rancho Santa Margarita in Orange County hired a regional contractor to get that part done and I can try to find out who Rancho Mirage is using unless you know someone at the station. Let me know.

I was actually working on Flock a bit this morning and tried to integrate myself. Nothing was working so I made a call to FirstTwo and the founder (don't remember his name) answered… He didn't sound too happy to hear that the integration was visible on the Flock OS side, sorry – he may be making a call to [redacted] if he hasn't already.

I also learned that we need the Full Agency subscription to FirstTwo for this to work, which we don't have.

Again – sorry to jump ahead, was just trying to keep up with things and implement some upgrades if I could.

Thank you. The request is related to the thread below and specifically to these points...

1. Who is the department FLOCK representative (if we have one)? I'm told several cameras in Anza and toward Temecula have been tampered with or turned to prevent them from capturing the roadway. The information is coming from a concerned citizen in Anza who is aware of the FLOCK cameras. Maybe this needs to be reported directly to FLOCK for a camera inspection.....
2. We've had a lot of mis-reads which could be dirty lenses. Do you if FLOCK maintains their cameras?

We wanted to make sure that all are facing the roadway and capturing plates well.

HI Remon,

Thanks for meeting with my team this week.

The data sheet identifying each camera by permit number is still a work in progress, but I shared it with you so you can see our progress so far.

[redacted]

I have 73 cameras approved under our original blanket encroachment permit (ENC 21120546) and 175 cameras approved under the current blanket encroachment permit (ENC23110539) identified on sheet 2 - titled "CA - Riverside County SO.

I will continue adding data as I gather it from our database.

Our current challenge is satisfying truck turn template requirements. I received corrections from both [redacted] and from [redacted] requiring revisions to the truck turn template detail we are showing in our plans. I was able to make the necessary revisions and got an encroachment permit issued from [redacted] however applying the same template on my application with [redacted] received additional corrections. My engineer attempted to contact [redacted] for direction but was unable to reach him. I was able to reach [redacted] but he stated he would not meet with my engineer because he should know the requirements and can consult the highway design manual.

Have a good weekend,

[redacted]

Ok.

Thanks for the quick reply! Yes – my preference would be to delete them so there aren't any issues requiring support in the future, but if that's not an option please do deactivate all users with a Flock identity provider.

Thank you for all your help!

Andy

Hi there,

If we deactivate a user with a Flock identity provider, and their email address is the same on Azure, they will need input from the Support team to bring them back to active.

I see there are Flock identity provider users who have not logged in since 2021/2022. I can start removing these users if you approve. Please let me know.

Stay safe,

Thanks!

Correct, I do not want to deactivate users integrated with Azure.

I tried to download a CSV of users but it errors out. If it's easier on your end, please DO deactivate users based on the "Flock" identity provider.

The only question left unanswered it – What happens when a deactivated user with a Flock identity provider logs in with Azure? Does it create a new account or does it take the deactivated account and make it active again? I want to avoid having to manually go in and reactivate a user later.

Hi there,

If you deactivate a user that is integrated with Azure it will require input from our side to reactive them. I do not recommend this action.

Would you be able to create a list of users to deactivate? Or I can deactivate based on the "Flock" identity provider. Please let me know what would work best for your organization.

Stay safe,

Thanks for the quick reply. The goal would be to deactivate all users with an Identity Provider of “Flock”. But, before I start making changes, I’d like to know that a deactivated user will become active once they log in with Azure for the first time.

Hi there,

Thank you for contacting support. There currently is no way to bulk deactivate users - it will require deactivation one by one. I can help with this, do you know if there is a specific domain of emails that should be removed?

I am unsure if the user will move back over once deactivated. I will check with my team on this. Thank you for your patience. Please let me know if you have any other questions.

Stay safe,

Subject: Flock Users

Hello Support!

The RCSO uses Azure AD for user validation, creation and login. However, I still see many users who have never logged on since this integration and still have their original static username and passwords. Do you have a method to bulk deactivate these users? Or would I need to go through the list and deactivate each one manually? If one was deactivated and later logged on with Azure, will their account update and re-activate?

I need to control access to Flock and limit it to active department members, but it's difficult to figure out who is still employed and who isn't unless I check each user individually. I

understand that if a user logs on with their department credentials, the validation or verification will occur at that time – but, the Flock app doesn't work with Azure and still requires the original static credentials to log in. So in theory, people who we've terminated or have left may still have access to Flock via the Flock mobile app.

Thanks!

Andy

> Okay, I went through and updated all.

If you aren't aware, the pagination button and the network list count drop down menu aren't filtering the page. I had to manually search all of my networks to update the search settings.

Also, the networkRequests page seems to perform the workflows or tasks of accepting the sharing requests on the browser. I have to refresh the page after each one to avoid it from timing out or getting an error message, "Failed to updated share request status: undefined". I know this is the first version of this upgrade, so as your dev team plans future upgrades and changes, it would be easier, from a UX perspective, if these actions were sent to the server for processing… Just my thoughts for what they are worth.

Thanks [redacted]

Andy

Hello Captain,

I know we briefly discussed the new sharing experience dashboard but I wanted to highlight an additional setting that must be done on EACH network you own in order to facilitate broader regional collaboration.

Upon navigating to the Sharing dashboard, select Network Sharing > My Networks.
Find "Go to Preference Page" under the Management column.

In the upper right hand box, select Enable to Automatically Accept Requests To Share My Networks With LE Agencies Within My State.
In the lower right hand box, select Search as your standard option. We do not yet have the functionality in place for the receiving agency to opt out of the hotlist so many will not accept both at this time. You'll have more success with search only.

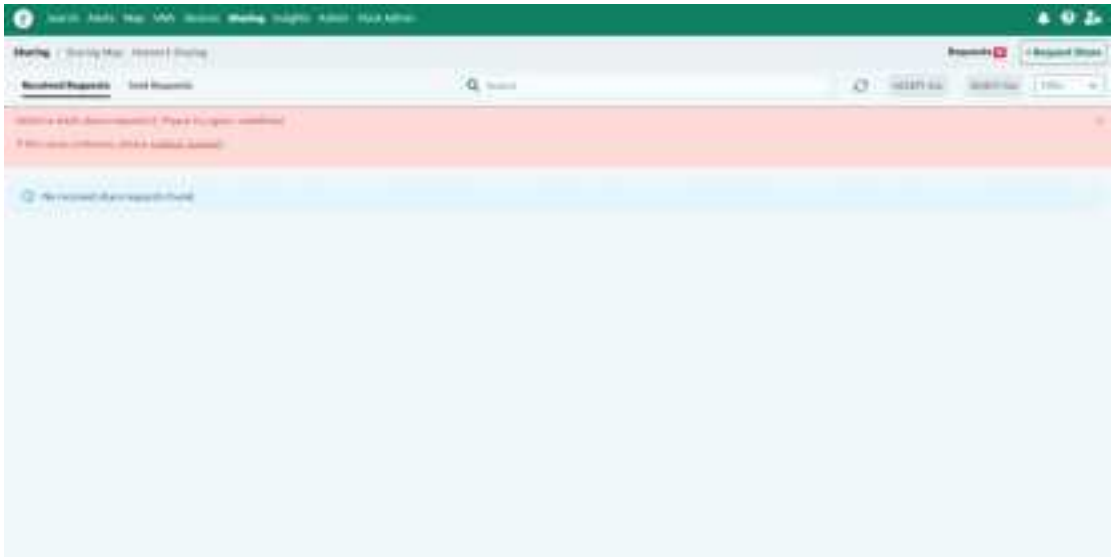

This will need to be repeated for ALL your networks in that list. I know it's time consuming, but it will increase reciprocal shares for you. Let me know if you have any questions!

Good Morning Gents,

Lots of new solar powered items from Flock are now available.

Here is a quick list (I also attached some items)

1. Solar powered LR (highway/high volume road camera)
2. Solar powered fixed position live view camera (called condor)
3. Solar powered Surveillance trailers
4. Intersection bundles with LPR and live view cameras

As always, I'm happy to come visit and discuss any of these items at your convenience. Call me anytime if you have questions.

Hi Captain Martinez,

Hope all is well. Apologies for the delay here, I've been working with Winchester Trails on a small revision to the Assignment Amendment that we just finalized. They requested to add the following to ensure that they, in addition to you, have the ability to elect to not renew the cameras since they are responsible for payment:

"In addition to the foregoing, and notwithstanding anything to the contrary herein or in the Agreement, Customer retains the right to elect non-renewal under Section 7.1 of the Agreement, upon thirty (30) day notice to Flock. Customer shall retain the right to terminate the Agreement under Section 7.2 of the Agreement."

Attached is the final version. Please let me know if that looks good on your end and I can send it over for signature.

Thank you,

[redacted]

<[redacted]> wrote:

Hi [redacted]

This assignment amendment identifies RCSO as the Assignee and specifies that we assume all obligations, duties, responsibilities and fees.

Can you have your legal team update this documents to explicitly state that the Assignee does not assume any obligations related to fees or costs, initial or subsequent. And explicitly state that the Customer (Winchester Trails, Inc) understands and agrees to retain the obligation of Flock fees and costs, either initial or subsequent. Also, Winchester Trails, Inc needs to remain as the primary point of contacts for all issues relating to this subscription, renewal or cancellation and approving work orders that will incur a cost.

Ultimately, my intent is to avoid a station level administrator becoming a liaison to this Customer for anything relating to costs/fees, work order approvals, or subscription renewals. The station involvement with this network should be limited to reporting malfunctioning equipment to Flock.

Tonia – Can you send me a copy of this deployment plan? I'm trying to figure out which RCSO station will be affected by this.

Thanks!

Andy

Good Morning Andy,

I hope all is well since the last time we spoke.

For us to proceed with the below locations we will need the attached document signed and dated:

Parent Case	Camera Name	Caltrans District	Install Type	Latitude	Longitude
469126	#13 RTE 62 @ Rice Rd WB	8	X2 Redi Torque - Soil Plate	34.04728284	-115.2223175
469126	#47 SB 86 Expressway @ 52nd Ave	8	Existing Light Pole	33.67356152	-116.1475297
469126	#48 NB 86 Expressway @ 52nd Ave	8	X2 Redi Torque - Soil Plate	33.66992554	-116.1442812
469126	#73 EB Hwy 74 @ Theda St	8	Existing Traffic Signal Pole	33.75634035	-117.2729505

When you have a moment, can you please sign and edit the date that is highlighted to the date you signed?

I appreciate it.

Project Title: Flock Safety Automated License Plate Reading (ALPR) Camara Installation Project

Project Number: N/A

APN#: Various Cal Trans Rights-of-Way

Project Location:
#13 RTE 62 @ Rice Rd WB - 34.04728284, -115.2223175
#47 SB 86 Expressway @ 52nd Ave - 33.67356152, -116.1475297
#48 NB 86 Expressway @ 52nd Ave - 33.66992554, -116.1442812
#73 EB Hwy 74 @ Theda St - 33.75634035, -117.2729505

Description of Nature, Purpose, and Beneficiaries of Project: The project consists of the installation of Flock Safety automated license plate reading (ALPR) cameras to be installed on behalf of the Riverside County Sheriff's Office. There are two methods of installation: 1) installation of a 13' X SQRD REDITORQUE pole or 12' Flock Pole with a camera and solar panel to power the camera mounted to the pole with minimal ground disturbance consisting of the 3" by 48" pole anchor, or 2) attachment of a camera and a solar panel to power the camera to an existing light pole or traffic signal pole with no ground disturbance proposed. The purpose of the installation is to provide law enforcement with the ability to respond to detect license plates associated with criminal activity and to assist law enforcement with intercepting these vehicles. The beneficiaries of the project are both law enforcement and the public at large as this installation will serve public safety interests and help make Riverside County a safer community.

Name of Public Agency Approving Project: Riverside County Sheriff's Office

Entitlement/Action Date
Flock Contract with Riverside County Sheriff's Office / March 31, 2023

Name of Person or Agency Carrying Out Project: Riverside County Sheriff's Office

Exempt Status: *(check one)*
- ☐ Ministerial (Sec. 21080(b)(1); 15268);
- ☐ Declared Emergency (Sec. 21080(b)(3); 15269(a));
- ☐ Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
- ☒ Categorical Exemption. State type and section number: 15303(e), 15301(b)
- ☐ Statutory Exemptions. State code number:

Reasons why project is exempt: Pursuant to Section 15303(e) of the CEQA Guidelines, New Construction or Conversion of Small Structures, this project is exempt from further CEQA Review. Section 15303(e) specifically refers to New Construction or Conversion of Small Structures including accessory structures, and the footprint of the proposed installation of the pole, camera, and solar panel is very minimal compared to the other classes of exemptions listed in Section 15303(e). As such, this project can be considered a new, small facility under Section 15303 of the CEQA Guidelines with no further CEQA review required.

Pursuant to Section 15301(b) – Existing Facilities and Section 15301(b) - New Construction or Conversion of Small Structures of the CEQA Guidelines, this project is exempt from further CEQA Review. Section 15301(b) specifically refers to the minor alteration of existing public or private structures, including utilities, and the attachment of the proposed camera and solar

panel to an existing light pole with no further alteration to the pole and no ground disturbance qualifies for this exemption. As such, this project can be considered a minor alteration to an existing facility under Section 15301 of the CEQA Guidelines with no further CEQA review required.

Subject: Shadow Mountain Resort-Palm Desert

Hi Chris,

Thank you for reaching out to me regarding Flock. As mentioned before, Palm Desert has invested in Flock Technology and the sheriff's department uses it as an investigative tool, with great success.

I have included the commercial sales representative for Flock and the two of you can connect. We do have HOA's in Palm Desert that have purchased Flock products and given us access.

Please reach out if you need anything else.

Sir/Madam,

This is a second attempt to collect the balance due on (INV-25263) for $50,000.00 past due on 12/2/2023.

Please provide a status of payment to avoid potential disruption of service or interest charges if applicable. If you have any questions or concerns, please reach out to [redacted].

Our system will continue to send out late notices until payment has been applied. If you have remitted payment, please let us know so we can make a note on your account.
We currently have your Accounts Payable contact listed as [redacted]. If that is not correct, please email [redacted] to have this updated.

****** Please ensure that all past due invoices are paid prior to the end of 2023********

If paying by check, please be sure to mail with a printed copy of your invoice to:

Subject: Recommended Relocation: #26 SB Spring Mountain Rd @ Spring St - Jurupa Valley

CAUTION: This email originated from outside the **Riverside Sheriff** email system.
DO NOT click links or open attachments unless you recognize the sender and know the content is safe.

Hi there,

[redacted] here from the Flock Safety Relocations Team. Our Field Operations Team has informed me that location #26 (Jurupa Valley) is in a location with poor cellular signal. At this time, the performance is not optimal. We would like to suggest relocating the equipment from this location. Please note, that this would be free of charge (normally, a $350-$750 relocation fee).

Would you like to move forward with a relocation at this time to improve the camera's functionality? If so, our team would appreciate the below questions being answered so that we can assist further:

- Where would you like to relocate the camera? Please provide coordinates and/or a mark on an aerial view map.
- Which direction of travel would you like to capture?
- Is the camera going on an existing pole or a Flock pole?

If a permit is needed, we may request additional documentation. The permitting process may prolong the timeline.

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology.

Stay safe,

Hi there,

I've re-added this user to your Organization. They currently do not have a Role assigned. To assign a role, please navigate to the "Admin" tab > "Users" > "Search" and then click the three dots to the right.

If you cannot assign them a role, please let me know which role assignment you would like them to have and I can do that for you. I also sent them a password reset link. If there's anything else I can do to help, please let me know!

Have a nice day,

After further review, it appears the user [redacted] still has access to the system as a System Admin with an External Identification provider.

- External= added as a user through the SSO account creation process
- Flock= added manually as a user through the Flock add user function

When you mention losing access to the system can you elaborate on what that entails? Are they unable to sign in via their agency's SSO? Can you provide other affected users for further review?

Yes, visibility to layers and other FlockOS features are role-based, and typically only admin's have them to start with. You can edit the roles and select "Custom Map Layers" for the user groups you want to share with. Give me a call if you'd like help walking through these steps.

[redacted]

Our station address is 9 Latitude Way, Corona, Ca. 92881. Have them check in at our front office, and the equipment will be there for them to pick up. If they come after hours, have them pick up the telephone outside our building and notify our dispatch that they are there to pick up the camera. Someone will come out and give them the camera.

Hi there,

This is [redacted] reaching out from Flock Safety. It was brought to our attention that you have a Flock camera in your possession.

Could you please provide the following details for the equipment pickup?

- The address where we should pick up the equipment.
- A contact person our technician can call upon arrival or any specific instructions (e.g., checking in with the front desk).

This information will help ensure a smooth pickup. Let me know if there's anything else we should be aware of.

Stay safe,

Hi there,

[redacted] here from Flock Safety Customer Support. While responding to an alarm on camera #62 (Lake Matthews – County – RCSD), the technician noticed that the top half of the equipment was missing (see attachment). We will need to reinstall all of the equipment to ensure the location is functioning properly as soon as possible. Do you know who removed the equipment and/or where it is located? If so, can you please provide us with the address to pick up the equipment and if there is anything we should reference/someone we should ask for upon doing so?

The last known GPS ping I have from the device is (33.88195275, -117.49755069) 2024-10-27 04:04:17 UTC with an accuracy of 48 meters.

If the equipment cannot be located or damage is discovered, we will be sending an invoice in conjunction with our reinstall fee schedule. This invoice ($800) will be emailed to [redacted] upon reinstallation. For additional information, please see Section 8.2 of our Terms and Conditions.

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology.

Stay safe,
[redacted]

Hi there,

Thank you for reaching out and for bringing this to our attention.

For **Camera #43 SB Van Buren @ Bellegrave**, this normally self-resolves once the camera has calibrated to the light levels in your area. I will leave this case open so that I can monitor this location for the next day. If this issue persists after the next 24 hours, I will ask our camera engineering team to review the location remotely.

As for **Camera #63 EB Limonite @ Peralta**, I've submitted a ticket to our Operations Team to get that angle fixed. If you would like someone to be onsite with the technician, please provide the name and phone number so that the technician can give a call when they are en route!

Stay safe,

Subject: Problematic cameras

Good afternoon,

We have a camera that is experiencing issues with picture quality.

City of Jurupa Valley #43 (SB Van Buren @ Bellegrave) – Camera has a pink photograph. I recall this being a frequency issue of some sort on a previous camera with the same issue.

We also have an additional camera that is part of the new install that is not facing the correct direction.

City of Jurupa Valley #63 (EB Limonite @ Peralta) should be facing Eastbound down Limonite away from Peralta. The camera is currently facing Northwest toward the intersection and is rarely detecting a license plate.

Please call if you have any questions.

Thank you

Hi there,

Thank you for reaching out and for bringing this to our attention. Are you able to determine which camera this is? We have members in our team who specialize in this, so I'm passing you over to them and you should hear back soon.

Thank you for your patience,

[redacted]

Hi [redacted],

I hope you had a great Thanksgiving.

Just met with Chris, from Palm Desert this morning. How many Condor Cameras and ALPR cameras did we come up for El Paseo.

City is ready to move forward, but we are going to have to split the video component.

Do you have time to have a meeting with Andy Martinez, Chris from Palm Desert, and myself regarding condor. The city wants to move forward with them, but I would like you to available to answer any questions.

Thank you,

Dan Porras

I gotta wait and see what [redacted] and Chris come up with....If the city is looking to co-term and do the updated contract, that would impact the quote I would be sending. I'll chat with Tonia and find out.

I cc'd Tonia here, as you should also be connected with her, she works closely with all of RSO for day to day operations.

Hi there,

When a Flock user logs in using SSO for the first time a duplicate account is created on the back end that merges with the original account for the user, updating their identity provider, and allowing them to log in through the SSO.

This merge sometimes fails, leaving a duplicate on the backend. I have deleted this duplicate one more time.

Please make sure that the user logs in using users.flocksafety.com to log in to force this merge to

take place.

If they try to log in through any other method, the merge will most likely fail again.

Thank you for your understanding!

Stay safe,

Good Afternoon Cody,

Thank you for the excellent information. My team has evaluated the cameras. Here is the feedback:

I went ahead and fixed all the default settings and they should be performing better now. I will monitor the nighttime captures over the next day or two. I summarized where each currently stands below:

LR002 - looks like this one is pending power?

LR003 - IR is having issues at night, will have Imaging team look into this one, will create a work order if it cannot be fixed remotely.

LR004 - modified default settings; however,we should re-angle aim further down the road, will have a WO created. The angle is ok now, but it could be a little better.

LR005 - modified default settings, daytime captures looking good, will monitor at night

LR009 - modified default settings, daytime captures looking good; however, we should re-angle to better capture the 3 lanes, will have a WO created. The angle is ok now, but it could be a little better.

LR010 - modified default settings, daytime captures looking good, will monitor at night

LR011 - modified default settings, daytime captures looking good, will monitor at night

LR012 - modified default settings, daytime captures looking good, will monitor at night

LR013 - appears like there was a setup issue here, will have a WO created

_____ will provide a follow up email with a status update by the end of week once we have evaluated the night time captures. We will also be scheduling a couple of follow up site

visits for angle adjustments to maximize performance. Thank you for your patience as we make the required improvements.

engineering issue or if it was how the installers installed them, but here is the running list of issues I have noticed. See attached photographs of examples.

High Speed/ Long Range Flock Camera issues:

LR #004 NB Bob Hope @ Gerald Ford: All captures are unreadable plates, and all captures are completely blurry.

LR #005 SB Bob Hope @ Gerald Ford: Same Issues as LR 004.

LR #009 WB HWY 111 @ Mag Falls: The Camera is capturing photos in complete Black and White at night, and during the day, with blurry reads, and unreadable plates.

LR #010 EB Hwy 111 @ Mag Falls: Same Issue as LR #009

LR #011 E/B Hwy 111 @ Thunderbird Rd: Every plate captured is a blurry read

LR #012 WB Hwy 111 @ Thunderbird Rd: Same as LR #011.

Please let me know as soon as possible, as we are currently in the process of installing more throughout the city of Rancho Mirage.

I'm unsure I have the authority to release the contract between Flock and the city. Michael Perez at the city may be the best person to ask.

Hi there,

This is [redacted] with Flock Safety Support following up on our phone call. The Mobile App team is asking if you can delete and re-install the app and try signing in again. Please do this and let me know if it works. If it does not, can you please take a screen recording of the login process and send it over to me so they can see exactly what is happening?

I appreciate your help with this!

Stay safe,

Good morning,

Thank you for reaching out! I'd be happy to update the camera name for you, however, we would need the request to come from one of your organization's administrators. Please have one of them reach out to us requesting this name change and we will get that updated. Unfortunately, we cannot do so without their permission.

Stay safe,

Hello,

I am reaching out again regarding the misspelling of a Flock camera in our area of responsibility (Moreno Valley, California). It is on camera #18 and the correct spelling of the street should be Alessandro @ Vista Grande (not Allesandro). Can you please update the spelling and let me know when it is completed so I can advise our users? Thank you,

Lieutenant Brandi Swan

Hello there. I am contacting you about the misspelling (or mislabeling) of three cameras in our area of responsibility for update.

Can you please change the naming of the following flock cameras:

1. City of Moreno Valley CA-RCSD Camera #92: Please label it as W/B Eucalyptus at Moreno Beach
2. Moreno Valley-County-RCSD Camera #02: Please label it as S/B Vista Grande @ Alessandro
3. Moreno Valley-County-RCSD Camera #13: Please label it as N/B Lasselle @ Ramona Expressway

Thank you very much. Please call with any questions: [redacted]

Good Morning,

It appears that when our technician responded to replace this equipment, he was unable to connect with supervisor David Reyes to pick up the old equipment. I have requested that our team schedule another technician to respond. I will keep an eye on the scheduling process and let you know when the technician will be responding. Would you be able to let David know the date once it's scheduled so that he will be expecting the technician to arrive?

Thank you so much for your help,

Sounds great! Can you please confirm that the address for the Cabazon Station is 50290 Main Street, Cabazon, CA 92230. I will update the Field Operations Team to have the technician who is responding to reinstall the location to respond to the station to retrieve the camera as well. Since the camera was still reporting its GPS coordinates, that indicates that it is not damaged so this reinstallation will only be invoiced as $500 instead of the $1,300.

Happy Friday Jr.

Thank you for the clarification. The camera you screenshotted specifically needs image clarity improvement. Our engineers can typically resolve these issues remotely. We will continue to monitor if next steps are required.

The digitized license plate you are seeing on the Alerts is typically not the most clear. The digitized plate is just a larger image of the same resolution photo that is shown to the right of the hit. I hope this clears things up.

Subject: Re: Misread

Here are the two attached examples of images I was talking about. I think you misunderstood; I am talking about the digitized license plate image that is provided when reading the "hit". If you look at both of the close-up images, they are coming out more and more skewed recently. You can also look up the entire coachella valley camera system and see the images are often not coming out clear.

Hi there,

Thank you for reaching out. Due to privacy, I am unable to see your alerts. Would you be able to send a screenshot and attach it to this email for review?

We do not normally have issues with digital plates during the daytime. However, at night our cameras have difficulty picking up the digital plates because the cameras use infrared to photograph the reflective background of normal plates. I hope this information helps! Please let me know if you have additional questions or concerns.

Stay safe,

Subject: Misread

To whom it may concern,
I am a Deputy Sheriff assigned to the Palm Desert Station in California . Recently we have been having a lot of issues with the, "misreads" specifically the digitized images of the close up on the license plates. Even on clear hits the close up is very difficult to read recently. You can look at the recent hits from today or on my hotlist and see what I am referring to. Thank You, let me know if it's something on our end.

Deputy Barker 5435
Riverside County Sheriff Department
Palm Desert Station
73-705 Gerald Ford Dr.

Hi there,

Thanks for getting in touch, I'm happy to help. This is most likely due to the difference between Lookup vs. Search. Lookup will run searches of all cameras that have opted into statewide or nationwide lookup regardless of whether you have access to the network or not. Lookup will also only search LE cameras, private cameras only populate in Search. Search only searches cameras that have been shared with your agency. You can use this article for more information regarding the Lookup tool.

I hope this explanation is helpful!

Stay safe,
[redacted]

Subject: Lookup Tool vs Search

Good afternoon,

We are investigating a burglary and have a license plate to a vehicle, [redacted]. The incident occurred on August 3, 2024, which is withing our 30 day window of searches. I ran the license plate using the "Lookup Tool" which returned many results but ended on August 6th. My partner (and then myself) ran the license plate using the "Search" feature and isolated the date of August 3, and received several returns. Can you please tell me why when searching in Lookup and choosing 30 days, I am not getting back the full 30 days.

Thank you,

CSO Stacy Green #N4424

Hi there,

Before I forward this to our engineering team, can you please try a few troubleshooting steps? First, please make sure that you are using Google Chrome as it is where our system works best! If you are in the correct browser, please clear your cache and cookies for all time within Chrome as that resolves the vast majority of these kinds of issues. If the issue persists, please attempt the action in an incognito window.

Hope this helps!

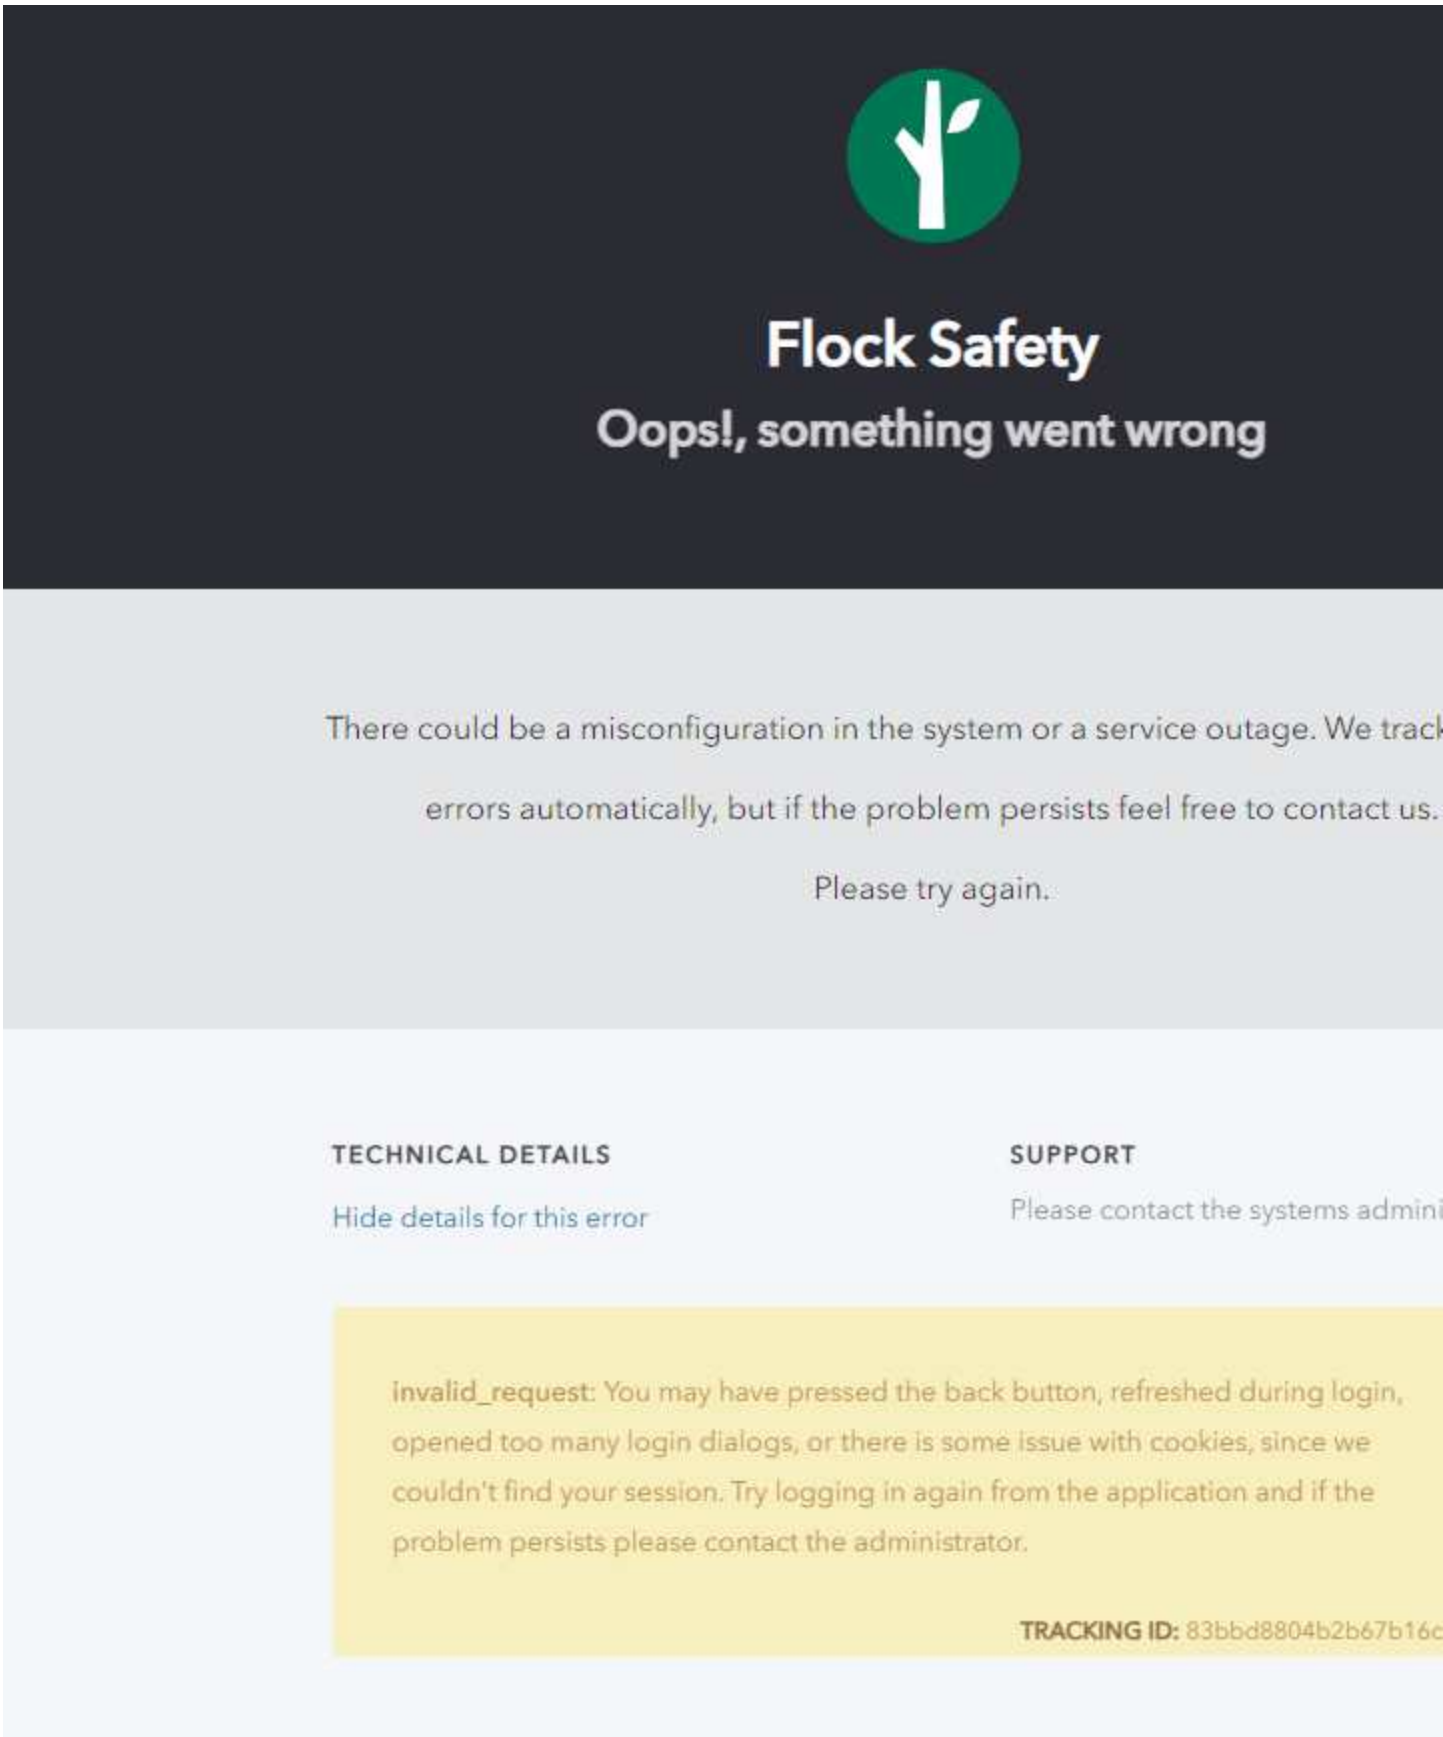

Stay safe,

Hello Chief Armstrong, thanks so much [redacted] for the introduction.

As [redacted] stated, I will be managing the Riverside County SO FlockOS implementation as your Technical Project Manager, I would also like to introduce [redacted] who will be the Integration Manager working on the technical setup of this implementation ([redacted] will be covering this week while [redacted] completes an onsite for another customer), and [redacted] who is your Customer Success Manager.

Please see below some initial materials for this implementation. These will be updated as we proceed throughout the project, so I recommend bookmarking them for future reference.

- A Google Drive, where we will store project materials and project notes can be found here.
- My detailed project notes can be found here (located within the Google Drive).
- A high-level overview of the project status can be found here by clicking on the Project Plan tab.

I would like to schedule some time to meet with you and your team to discuss your priorities and action items for this project, which includes the following integrations:

- ESRI layers
- Floor plans (map attachments)
- Axon (BWC, Fleet 3)
- Community webpage and marketing materials
- VMS integration (Milestone - 50 streams)
- FirstTwo
- Gateways
    - 50 locations or 400 streams

Any hardware implementations (Falcons, Condors, or Ravens) will be completed by a different team at Flock.

Below are some day/time options for us to meet over the next couple of weeks, all times are PDT. Please let me know which option works best and I will send out a 30 minute Google Meet invite to your team.

Wednesday (9/11) 9:30-10:00, 11:00-11:30, 12:30-1:00, 1:30-2:00
Thursday (9/12) 10:00-11:00, 11:30-12:00, 12:30-1:00, 1:30-2:00
Tuesday (9/17) 10:00-11:30, 12:30-1:30
Wednesday (9/18) 9:00-10:00, 11:00-12:00

Please let me know if there are any questions I can answer via email before the initial meeting. Thank you!

Unfortunately, the plate reads are limited to your data retention of 30 days. It won't help in this case, but I always suggest making a note to pull them every 25 days or so (in case you're busy or out of town). I do know we are working on the ability to let admins schedule reports to their inbox but the rollout date is not confirmed.

Subject: Inquire flock camera repair

Good afternoon,

My name is Deputy Lopez and I work for the Riverside County Sheriffs department. I am sending you this email to obtain and request information on repairing cameras within Jurupa Valley.

On 090624, I learned the solar panel to Flock camera #42, located at WB Bellgrave @ Van Buren was missing. It appears the panel was torn down and taken. After looking into the camera, I learned it stopped working on 081724, around 1:30 PM. I am requesting we repair this camera.

Additionally, during my spot check of cameras, I learned the Flock pole on WB Granite Hill and Pyrite (Camera #68), has been damaged by a vehicle.

I am requesting a barrier placed around the camera to protect it. The original camera at this location was up for less than 24 hours before it was completely damaged by a semi. I recommend we have a barrier placed around the pole and extend that barrier far out to prevent vehicles from obstructing the device's field of view. The same should be done to poles #68 EB Granite Hill @ Pyrite and #70 EB Granite Hill @ Pedley Road.

Please let me know if there is any further information needed regarding this incident.

Respectfully,

Deputy Michael Lopez #5868

You would just need to navigate to your "Custom Hot List" tab, go to your organization's lists, and search for the list in question. A quick shortcut to search if you know the list name is by hitting Command + F on a Mac or Control + F on a Windows computer. Once you find the list you will hit the three vertical dots by the list name and click edit to view the audience or make any changes.

If you remove Custom Hot List from a role it will also remove their capabilities to build their own lists.

I hope that makes sense! Please let me know if you need additional clarification. :)

Have a nice day,

Subject: RE: Hotlist and Custom Hot List

Thank you for the quick response. Is there a quick way for me to see if that particular group is part of their list? We have so many custom hot lists for the department. Or, if I leave Hotlist but remove Custom Hotlist would it remove that new groups capability to build their own Custom Hot List?

Ya, we for sure need the ability to block adding certain groups to a hot list.

Hi there,

Thanks for reaching out! Unfortunately, as long as a role has Custom Hot List access they can be added to lists created by other users. However, as an Admin, you should be able to view Custom Hot Lists within your organization and remove users from the audience of a list is necessary.

I apologize for the inconvenience, but I will pass that to our product team for future consideration! Please let me know if you have any additional questions.

Have a nice day,

Subject: Hotlist and Custom Hot List

Good morning,

I am one of the administrators for our department. One of my units was requesting to be added as a separate group from our standard groups within the organization, with the hopes that their group would not receive everyone else's Custom Hot List. So what I did was create their own unique group hoping this would be the answer. However, when someone creates a hotlist and chooses the option to share it with the Entire Organization, they are still getting those alerts.

Is there a way in the settings to specifically edit the new custom group that I created, so that they only get the alerts from their own custom hotlist?

Please call me if you have any questions. Thank you,

Dawn White, CCIA

Hi there,

I have a correction to make. Camera #23 EB Ave 60 x Monroe was not moved. Camera #62 SB Monroe St @ Avenue 60 was relocated and installed on 4/11/2024.

Is there anything that needs further adjustment?

Stay safe,

Hi there,

Thank you for reaching out to support. Camera #62 SB Monroe x Ave 60 has not been relocated since its initial installation date of 7/19/2023. I see we submitted information to the project manager. I will be reaching out to them for an update on this.

Our engineering team was alerted by the cameras along Highway 111's alarms that they were not functioning and are looking into it remotely. We will continue to monitor and update you if next steps are required.

Camera #40 is expected to be replaced. The other cameras are still in review. If the camera requires a technician visit you will receive an email with an appointment date. Please let me know if you have any questions.

Stay safe,

flock safety

Hi ,

Below you will find a summary of upcoming activities related to your Flock Safety network.

Recent Activity

Location Name	Status	Visit Type	Completed/Scheduled Date
#62 SB Monroe St @ Avenue 60	Completed	Relocation - Installation	4/11/2024
#62 SB Monroe x Ave 60	Completed	Maintenance - Complete Regular Maintenance	4/11/2024

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.
Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team

Good Afternoon [redacted]

Just wanted to email you to recap yesterday's conversation,

I have spoken to my supervision, Sgt Mattson, regarding the movement of the two cameras on Rancho California Road and Avenida Del Oro. Sgt Mattson agreed that moving the two cameras on Rancho California Road and relocating them just east of Via Santa Rosa, would benefit the De Luz Community. This would capture imagery of vehicles entering and exiting De Luz on Rancho California Road. However, Sgt Matson related that the department did not have the funds to move the cameras but would agree to have an HOA / POA pay for the movement. From speaking with [redacted] Flock, the cost would be $750.00 per camera. My department would maintain operational control of the cameras and continue to pay the annual fees. I spoke to Paul last month and he informed me that his POA would pay for the movement of the cameras. I have CC'd the individuals mentioned in this email and [redacted] who manages Paul's POA. Please reach out to Sgt Mattson and Paul to coordinate the movement of the cameras once Paul's POA takes the required steps (votes, ratifies, ect..) to pay for the movement of the cameras. Thank you in advance.

Good Afternoon,

I can see that our Billing Team canceled the invoice due to the camera being recovered. I checked on the old ticket and see notes that the technician was informed by dispatch that you would not be available until a different day to assist with picking up the equipment so the technician left. I just created a new ticket to have the equipment picked up by a technician. Before, I had notes just stating the equipment was entered into evidence under your name, not

that you specifically needed to be present or to assist, is this accurate? I will make sure this is relayed more clearly to the technician this time.

Thank you,

Good Morning,

I am following up on this case reference this stolen camera that was recovered by our department. Was the invoice canceled by your billing team or was the Riverside County Sheriffs Department billed for the camera. A technician never responded to pick up the camera. If we paid for the camera, can you please let me know, and let me know what our options are with the camera. The camera did not appear to be damaged in any way but would obviously need to be looked at and confirmed by a technician.

Respectfully,

Hi there,

Thank you for that information Sgt. Eckenrode! I did submit the invoice yesterday after I received the email stating the equipment wasn't located. I do see that our Billing Team already forwarded the invoice to the department's accounts payable email. It will be INV-33542. I'm reaching out to our Billing Team to have them cancel it and see if they can connect with accounts payable and advise them not to pay the invoice since the equipment has been recovered. I also submitted a ticket to have a technician respond to pick up the equipment and passed along the information to call ahead of time to schedule with Property/Evidence.

Following up on the property lines - a member of our Deployment Strategy Team advised that the property boundary starts approximately 30 feet from the edge of the pavement. The camera was permitted through Caltrans and is lined on the roadway with traffic poles and a utility pole. I have attached photos of the installation and the parlay map to show the property lines (the yellow lines). This camera was not installed within the property owner's easement.

Please let me know if you have any further questions!

Good morning [redacted]

We will need to confirm our department will not be charged the reinstallation fee since we recovered the camera. I understand you will need to ensure it is operational, but if we are charged a fee of some sort, we will need to ensure we receive restitution after a conviction from the party being charged in this case to recoup the fees. The camera was booked into our evidence room at our station listed on Deputy Johnson's signature. FLOCK will need to make an appointment with our evidence technician to inspect and retrieve it. You can call the main number to set a date and time and ask for Property/Evidence. I hope I have explained the process clearly. Please feel free to reach out to me if you have any further questions.

Good Morning,

That is great news that you were able to locate the camera! I just reached out to the Riverside County SO Project Manager to ask about the installation of the camera to ensure that it was not installed on private property. As soon as they get back to me, I will update you with what they advise.

Is the camera located at the address in your email signature? I can schedule to have a technician respond and pick up the equipment. Once they have the camera in hand, they will be able to determine if it is reusable. Is there anything the technician should reference or somebody specific they should ask for upon arrival?

Thank you!

Subject: RE: FW: Missing Equipment - Cam #04 EB Hobsonway @ Neighbours

Good Afternoon, We located the camera. It does not appear to be damaged and in good working order. The cables are attached and are not cut. The camera it self has no visual damage.

The home owner of the property we located the camera at [redacted] stated the camera was installed on his easement so he took it down. Can you verify this camera was not

installed on his easement or was permitted to be installed in its location. I am filing charges on the subject who had possession of the camera regardless.

The camera is currently in our custody and was booked into evidence. Can you also let me know how you want to proceed moving forward with the camera. Are you going to retrieve it? Reinstall it, etc? Billing if any ?

Thank You,

Deputy Jeremy Johnson #6204

I can see that our Engineering Team received the first alarm on 12/31 which led them to attempt to resolve the issue remotely. When they were unable to do so, they scheduled a technician who responded on 1/29 to find the camera missing. I was able to pull the last reported GPS coordinates from 1/7: 33.60924719, -114.656504 with a 77-meter radius. The plot is in a field to the southeast of the intersection where the camera was installed.

The fees associated with the replacement will be $800 if the camera cannot be located or if it is found to be damaged beyond reuse. If you are able to locate the camera, I can have one of our technicians scheduled to recover it and assess the extent of the damage.

Please let me know if you have any further questions.

Thank you,

Good Afternoon,

I am investigating this incident reference a missing camera at the intersection of Hobsonway and Neighbors Blvd in Blythe, California. I have a few questions to make sure I conduct a through investigation.

What date and time did the alarm go off on the camera?

When time and date did the technician respond and replace the camera?

Are you able to GPS track the camera? I was advised you are able to, if so can you point me in the right direction to do so.

What is the cost of the camera? And labor cost to have the technician install it?

Please see the attached email chain for further detailed information. The file number for this incident is: A240390022

Thank You,

Respectfully,

here from Flock Safety Customer Support. While responding to an alarm on camera #04 EB Hobsonway @ Neighbours, the technician noticed that the camera was missing (see attachment). We went ahead and installed a new camera to ensure the location was functioning

properly as soon as possible. Do you know who removed the equipment and/or where it is located? If so, can you please provide us with the address to pick up the equipment and if there is anything we should reference/someone we should ask for upon doing so?

If the equipment cannot be located or damage is discovered, we will be sending an invoice in conjunction with our reinstall fee schedule. This invoice ($800) will be emailed to [redacted] upon reinstallation. For additional information, please see Section 8.2 of our Terms and Conditions.

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology.

Stay safe,

Good Afternoon LT,

I hope all is well since the last time we spoke.

I will ensure the tech is in contact with you before installing the new camera.

My deployment team did have some feedback regarding the location:

"It looks like the requested location was the original spot we planned. The tech ran into buried irrigation lines which caused the shift to the new location. We will most likely run into the same lines again since it is back at the original spot."

Please let me know your thoughts here.

Hi Flock!

What camera needs to be relocated?
- #62 SB Monroe x Ave 60

Where does the customer want the camera relocated to? Is it to a Flock pole or an existing pole? Providing a marked map or coordinates for specifics is preferred. Pics are also helpful tools here
-I see you already provided a map. Can you mark the new location with coordinates, if possible, as this is helpful for our relocation team if you can?

Lat - 33°36'44.12"N
Long - 116°14'0.86"W

Ultimately, the camera pole needs to be installed directly along the dividing property/fence line of both properties to avoid it from being seen from either property.

What direction of travel should the camera capture? No change to the capture
DOT. Southbound.

There is a relocation fee of $350. Do you agree to this relocation fee? Yes. Billed to City of La Quinta.

Note: If a permit is needed, we may request additional documentation. The permitting process may prolong the timeline.

Let me know if you need further.

Andy

Good morning,

My name is [redacted] I'm a field technician with Flock Safety. I will be in Blythe tomorrow morning and was hoping to pick up a camera that was turned in by Deputy Jeremy Johnson. Please let me know if I need to ask for anyone specifically to recover the equipment.

Thank you,

[redacted]

Riverside

Good Afternoon Gentlemen,

I had my team clean up the Map we reviewed and was hoping you could review it one more time for accuracy (really just confirming the adjustments were what you wanted):

https://planner.flocksafety.com/public/0143d51c-e21a-4027-bada-9fe243917355

Once you tell me it is what you want, I will meet with the city Public Works to get the permitting process defined and started. If they find some locations that won't work for some reason, I will bring it back to you for your input.

Thanks again for your time with this project.

Good Evening LT,

I hope you are doing well. Sorry for the delayed response here.

We have 14 out of the 14 locations installed. I have been working closely with [redacted] to get these locations up and running. However, we have a few locations that are going to require some maintenance and final touches and I am working with my field team to get those addressed as we speak.

As for the newest project with us "Phase 3" we are in the process of getting those Falcons installed and we are about 80% complete with those. Regarding the Solar powered LR cameras we are waiting on procurement and I will let you know we are a few months out from getting them.

I will let you know as soon as we have those installed.

If you have any further questions please feel free to reach out to me directly.

Hi [redacted],

Lt Porras has some questions on integrating existing video systems with FlockOS. Here is the original note for context:

We are going to present the idea of integrating the CVAG cameras into Flock to our "Cove Commission", which consists of Council members from Indian Wells, Palm Desert and Rancho Mirage. Before we do that, could you share your contacts at CVAG and Flock who have been assisting you with it? How is the process going for you?

Best regards,

Hi Lt Porras,

I apologize for the delay in getting back to you. My engineering team has been involved in working out the details to get this project going. We have a number of different ways to ingest cameras into the Flock system depending on the type of camera. Are there any specific questions you have?

Best regards,

Good morning Lt Porras,

Palm Springs PD is working on integrating only the cameras in Palm Springs. This will operate similar to the Falcons, where they will have the ability to share these with you once they are integrated into their Flock system.

There's not really a limitation on the total amount of devices that can be brought in from my understanding, it's just a matter of cost. Cities can indeed pay for their cameras to be integrated into Flock and then share them.

I have a couple of other projects I am working on as well. One is cameras to cover the CV Link project that is underway. Are you familiar with this project? We are working with CVAG to get cameras deployed along this pathway to cover the "Access Points" and the underpasses. The second is specifically with a the CV Conservation Commission are of CVAG to add some cameras and LPRs out in DHS to cover some sites where they see regular illegal dumping.

Let me know if you have any questions or would like to introduce me to any cities that you would like to see integrate cameras into Flock.

Best regards,

Hi [redacted]

I just spoke with [redacted] and he wanted me to keep him in the loop.

Do you know if Palm Springs is integrating all the CVAG cameras in the Coachella Valley or just the cameras within their city jurisdiction?

If they do all of them, are they able to share them with us?

If they only stick with the CVAG cameras in their cities, I am interested in approaching all three cities in our station and see if they are interested in brining them into the Flock system on their own.

I know [redacted] mentioned there are only so many feeds that can be brought in. Is that something the cities can pay for? Please correct me if I am wrong on the how the operating system works.

Thanks,

Lt. Dan Porras

Hi Dawn,

Sorry I assumed this was an excel bug as there is a known excel bug where it converts to scientific, and I noted the E and thought that was the culprit.

To better understand, is this happening on other plates? Are you seeing it with letters other than letter E?

I'm so glad!

On the csv it looks like it is converting those to scientific numbers. Can you change it to plaintext? Also if you expand/widen the column it might just display normally?

On Thu, Mar 28, 2024 at 11:30 AM White, Dawn <[redacted]> wrote:

> Good morning,
>
> Clearing the cache helped! It also appears this may be working; YAY!
>
> However, I hate to bring up another "issue" per se. But do you have any recommendations on formatting the plate column after the .csv export, in order to get the correct plate on the excel export? I see that it's not always displaying the correct plate.
>
> Here is an example:

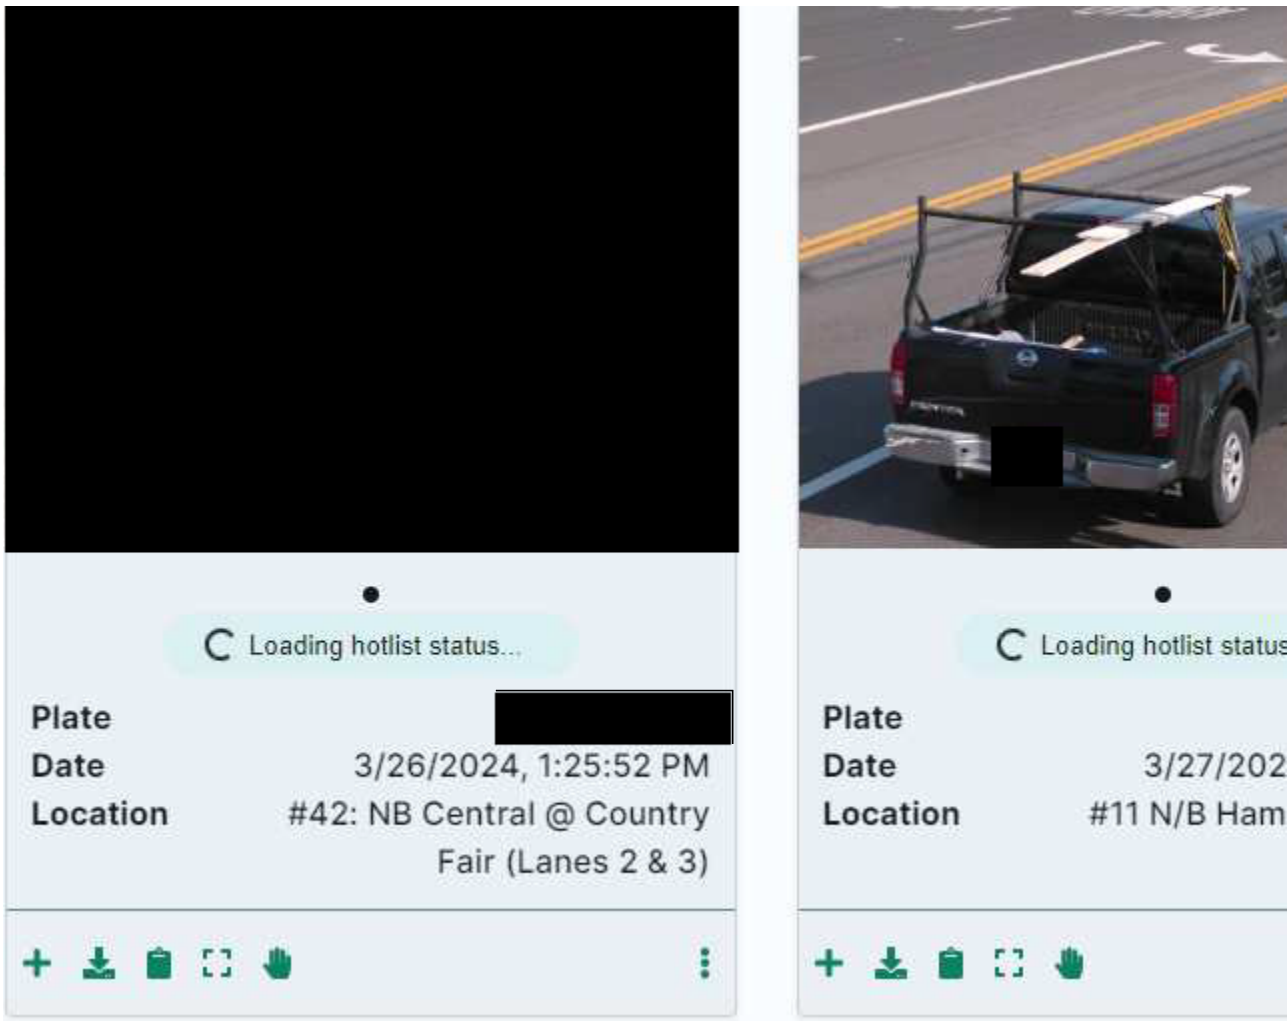

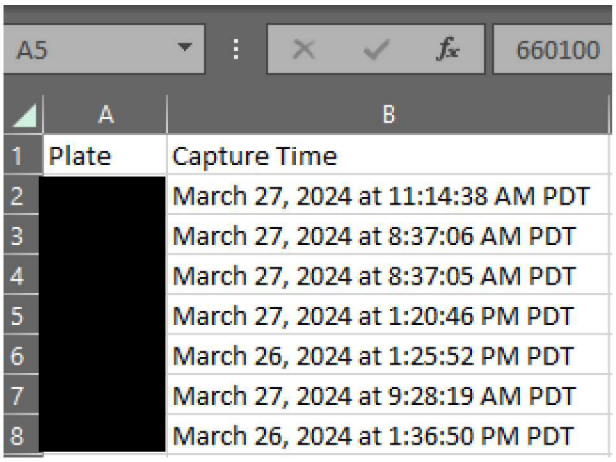

Plate _____ is returning as _____ on the export. I added plate _____ in the screenshot just to show that the system is capable of reading the plate correctly, but doesn't always:

	A	B
1	Plate	Capture Time
2	[redacted]	March 27, 2024 at 11:14:38 AM PDT
3		March 27, 2024 at 8:37:06 AM PDT
4		March 27, 2024 at 8:37:05 AM PDT
5		March 27, 2024 at 1:20:46 PM PDT
6		March 26, 2024 at 1:25:52 PM PDT
7		March 27, 2024 at 9:28:19 AM PDT
8		March 26, 2024 at 1:36:50 PM PDT

I have tried changing it to number, general, text and nothing changes it to read the correct plate. This is a necessity, because when you have over 800 potential matches, we are for sure going to have to utilize the .csv to find our matches.

Thank you again for dedicating time to this; it is truly appreciated!

Dawn

Hi there,

Thank you for reaching out. I am sorry to learn of this unfortunate incident. I am happy to help restore functionality to location #28 NB Santa Fe @ Esplanade. I have a few questions to ensure this process goes smoothly:

- Here is a link to the reinstall fee schedule. Reinstallation will cost $800. Do we have permission to move forward with replacing the equipment? If yes, the invoice will be emailed to [redacted] upon reinstallation.
- Do you know if all other equipment is still on site? If so, please leave all equipment as is. If not, please confirm the address where we can pick up the equipment and provide a phone number and name for contact purposes. We understand that personnel availability changes frequently, so we are happy to connect with other staff to obtain the equipment if they have a more flexible schedule. Any additional information to help our technician locate the equipment upon arrival is appreciated.

Thank you in advance for getting back to me.

Stay safe,

Good afternoon,

We were having issues with #28 NB Santa Fe @ Esplanade (City of San Jacinto CA – RCSD). Upon further investigation I noticed the camera on the Northeast side of Santa Fe was pointing at the ground and had a broken screen over the camera. I pointed the camera in the right direction and had a unit drive by several times and still got no flock hit.

Good Morning Summer,

Glad to see this item was approved by the BOS yesterday. Do you have an ETA on how long it will take for the new agreement to be signed and the PO to be issued? Please let me know if I need to provide you with any additional information. Thanks again for your assistance.

Hello [redacted]
County Counsel signed the agreement, and we are presenting this request to the Board of Supervisors on 10/31/2023. If the Master Service Agreement is approved, I will work with Emily to issue a Purchase Order so we can move forward.

If you have any questions, or if I can be of further assistance, please let me know.

Thank you,

Good Morning Summer,

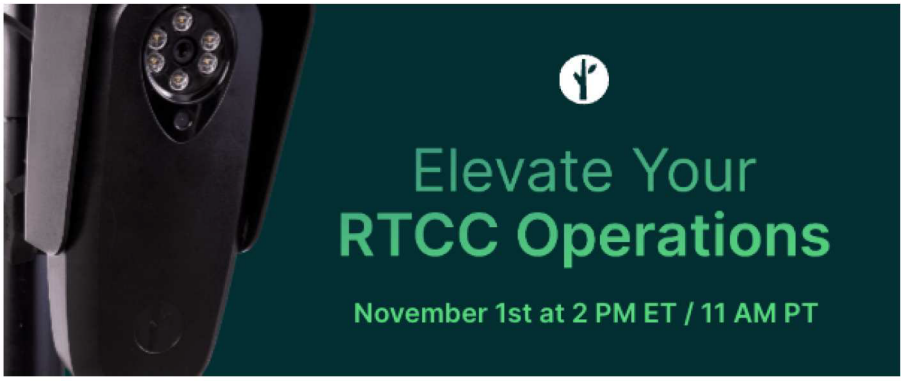

The agreement is approved and signed by Flock. Please let me know if you need anything else!

Hello [redacted]

The Master Services Agreement is ready for signature by Flock Group, Inc.

The only addition to the agreement (top of page 5) is the language to acknowledge and accept the document's electronic signature formally. All other terms and conditions remain unchanged. Once the agreement is signed and returned to me, our County Counsel will sign the document allowing us to place this item on the calendar with the Board of Supervisors for review and approval **on October 31, 2023**.

WHEREAS, The Master Services Agreement may be executed in any number of counterparts, each of which will be an original, but all of which together will constitute one instrument. Each party of this Agreement agrees to the use of electronic signatures, such as digital signatures that meet the requirements of the California Uniform Electronic Transactions Act ((“CUETA”) Cal. Civ. Code §§ 1633.1 to 1633.17), for executing this Agreement. The parties further agree that the electronic signatures of the parties included in this Agreement are intended to authenticate this writing and to have the same force and effect as manual signatures. Electronic signature means an electronic sound, symbol, or process attached to or logically associated with an electronic record and executed or adopted by a person with the intent to sign the electronic record pursuant to the CUETA as amended from time to time. The CUETA authorizes use of an electronic signature for transactions and contracts among parties in California, including a government agency. Digital signature means an electronic identifier, created by computer, intended by the party using it to have the same force and effect as the use of a manual signature, and shall be reasonably relied upon by the parties. For purposes of this section, a digital

signature is a type of "electronic signature" as defined in subdivision (i) of Section 1633.2 of the Civil Code

Please let me know if you have any questions.

Good Morning Summer,

I have attached the updated quote and agreement with the verbiage you requested. I look forward to receiving your Counsel's feedback. Please let me know if you need any additional information to get this process started on your end.

Thank you.

Good Morning Matthew,

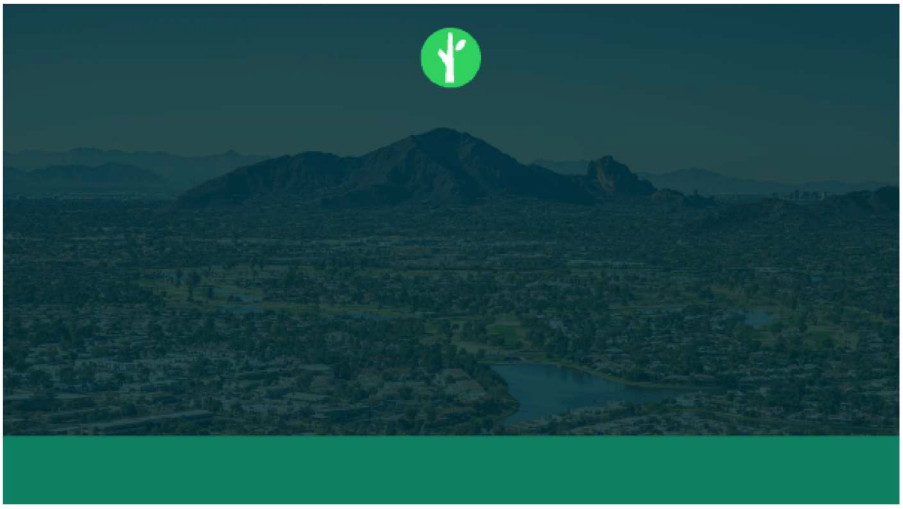

Here is the spreadsheet for the new 210 locations. We are still finalizing the last location, so the list only has 209 currently.

Emily will receive the signed agreement from the Chairman and I do not know for certain how many days it will take the Clerk of the Board to send the documents back to our organization.

Emily – Please proceed with creating a requisition in Peoplesoft. Once you receive the signed agreement, please scan and send me a copy.

Thank you [redacted] for all of your assistance, it has been a pleasure working with you on this project.

> The only addition to the agreement (top of page 5) is the language to acknowledge and accept the document's electronic signature formally. All other terms and conditions remain unchanged. Once the agreement is signed and returned to me, our County Counsel will sign the document allowing us to place this item on the calendar with the Board of Supervisors for review and approval **on October 31, 2023**.

WHEREAS, The Master Services Agreement may be executed in any number of counterparts, each of which will be an original, but all of which together will constitute one instrument. Each party of this Agreement agrees to the use of electronic signatures, such as digital signatures that meet the requirements of the California Uniform Electronic Transactions Act ((“CUETA”) Cal. Civ. Code §§ 1633.1 to 1633.17), for executing this Agreement. The parties further agree that the electronic signatures of the parties included in this Agreement are intended to authenticate this writing and to have the same force and effect as manual signatures. Electronic signature means an electronic sound, symbol, or process attached to or logically associated with an electronic record and executed or adopted by a person with the intent to sign the electronic record pursuant to the CUETA as amended from time to time. The CUETA authorizes use of an electronic signature for transactions and contracts among parties in California, including a government agency. Digital signature means an electronic identifier, created by computer, intended by the party using it to have the same force and effect as the use of a manual signature, and shall be reasonably relied upon by the parties. For purposes of this section, a digital signature is a type of "electronic signature" as defined in subdivision (i) of Section 1633.2 of the Civil Code

Please let me know if you have any questions.

Hi there,

You will need a Flock Safety administrator to add you to the account. There are quite a few admins on your account so I would advise reaching out through your chain of command to determine who that will be for you.

Stay safe,

No. It is my counterpart. What's up with that? Give me a quick call if it's easier. I'm available for a bit.

I looked and don't see anything saved in our internal system. We recently did a big overhaul of that software and it may have been purged as it was not associated with an active project...I'm glad it was only 11 locations. Happy to reconnect or put it together again if you would like me to.

Sorry.

Good Afternoon Sam,

Thanks for taking my call today. Here is the quote and amendment for the 2 drones/docking stations for DFR. Ideally we work on 2 city owned rooftops that you can get power/ethernet cables to. Our aviation division is based in Riverside, so if we need to go to the warehouse to look at the docking stations, we certainly can. I also attached an overview of what the program is and what it will look like.

Cities nearby that are using our DFR solution are:

Redondo Beach
Azusa
Alhambra
Elk Grove

Hi Sam,

I'm just returning from the IACP conference where I came across several new technologies and products. One that stood out was the FLOCK drone. Given our significant investment in

FLOCK infrastructure and software, I believe it makes sense to leverage their technology for our drone project as well.

I spoke with _____ and she mentioned that no significant progress has been made on the project that Hibbler was working on. This seems like a great opportunity for you to step in and move it across the finish line. From what I understand, much of the work related to city policy and funding is already in place.

I know she has not assigned you specifically, but I'm thinking this would be a good project for you to volunteer for.

I'm also looping in _____ on this email. He's confident that, given the city's existing contract, this could be a simple addendum, allowing us to be operational by year-end.

This is just an overview, and I'm sure there are details that will need to be ironed out. That's why I'm looking for someone at MoVal to take the lead and drive this forward.

PRODUCT ADDENDUM

UNMANNED AIR SUPPORT AS A SERVICE (UASaaS) PROGRAM FOR DRONE RESPONSE SERVICES

WHEREAS, Customer has determined that it is in the interests of public safety for it to have the ability to utilize unmanned drones during crisis incidents, public emergencies, and in certain public safety operations, to the extent permitted by law;

WHEREAS, Flock is in the business of providing unmanned drone services (the unmanned drone services shall be considered part of the "**Flock Services**") and Flock Hardware;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Customer and Flock agree as follows:

1. UNMANNED AIR SUPPORT GENERAL TERMS OF DELIVERY

1.1 Lease of Flock Hardware. Flock shall lease to Customer the unmanned systems and related Flock Hardware (the "**Flock Hardware**") listed on the Order Form upon the terms and conditions set forth in the Agreement. Flock maintains ownership of all the Flock Hardware. Each year, as specified in the Order Form, the Customer will be provided with a designated number of batteries. Customer may purchase additional Flock Hardware (e.g., batteries prior to 500 complete charging cycles, hardware damaged due to Customer's error, additional spares, etc.) at Flock's then current list price, which will be made available to Customer upon request.

1.2 FAA Regulatory Waivers. Flock will acquire and transfer any Federal Aviation Administration ("**FAA**") regulatory waivers obtained for the Customer to the appropriate Customer account. Following its receipt of such documents, the Customer shall own these documents, and Flock shall bear no liability for these documents. Flock will assist the Customer in renewing them during the Term of this Product Addendum.

1.3 Delivery. Flock shall make the Flock Hardware available to Customer at Customer's address set forth in the Order Form ("**Delivery Point**"). Transportation and use of the Flock Hardware after delivery at the Delivery Point shall be entirely at Customer's own risk and expense. In the event that Customer disassembles the Flock Hardware to facilitate transportation, Flock shall bear no responsibility for reassembly of the Flock Hardware. If for any reason Customer fails to accept delivery of the Flock Hardware by the date fixed pursuant to Flock's notice stating that the Flock Hardware is available at the Delivery Point, or if Flock is unable to make the Flock Hardware available at the Delivery Point within a reasonable time after the delivery date owing to any act or omission of Customer or its representatives, including without limitation the failure to provide appropriate instructions, documents, licenses, or authorizations: (i) Customer shall bear the risk of loss to the Flock Hardware; (ii) the Flock Hardware shall be deemed to have been delivered; and (iii) Flock, at its option, may store the Flock Hardware until collected by Customer, whereupon Customer shall be liable for all related costs and expenses (including, without limitation, storage and insurance). Once the Flock Hardware is made available as the Delivery Point, Customer is responsible for any resulting use of the Flock Hardware by all Authorized Users and all third-parties who may gain access to the same.

1.4 Pilot Services. Upon Customer's request, Flock will make available an employee or independent contractor pilot (each a "**Pilot**") available to Customer for purposes of operating the Flock Hardware (hereafter the "**Pilot Services**") at the pricing set forth in the Order Form. The Pilot Services shall be considered part of the Flock Services. When operating the Flock Hardware, the Pilot shall comply with the reasonable requests of Customer. Such Pilot Services may be used for up to forty (40) hours per week during the Term. Customer's use of the Pilot Services shall not alleviate any of Customer's obligations set forth herein. Customer shall provide Pilots with a safe working environment when on Customer's premises.

2. LOSS AND DAMAGE OF LEASED FLOCK HARDWARE

2.1 Customer assumes and shall bear the entire risk of loss, damage to, theft or destruction of, all leased Flock Hardware. LOSS OR DAMAGE TO THE FLOCK HARDWARE, OR ANY PART OF IT, SHALL NOT RELIEVE CUSTOMER OF ANY OBLIGATION UNDER THE AGREEMENT. Customer's obligations with respect to this Section shall commence upon delivery of the Flock Hardware.

2.2 Customer agrees to immediately notify Flock of any accident or event of loss or damage involving the Flock Hardware. The notification shall include any information as may be pertinent to Flock's investigation of such accident, loss, or damage, or which Flock may reasonably require.

3. FEES. The Order Form dictates the Flock Hardware, software, personnel, and Flock Services and the entire Flock Services corresponding fees. Customer shall pay the Fees as described on the Order Form.

4. TERM. The initial term of this Product Addendum shall be for the period of time set forth on the Order Form (the "**Term**").

5. FLOCK DRONE IP. Customer Data does not include, and Flock Drone IP (defined herein) expressly includes, any data to the extent processed by, resulting as an output of, or based on the usage of, the Flock Services, Flock Hardware, including, without limitation, data collected by Flock's radar and radio frequency sensors. Such Flock Drone IP shall be Flock's Confidential Information. Flock shall own all rights to (i) any data input into the Flock Services, Flock Hardware by or on behalf of Flock (not including any Customer Data) and (ii) any aggregated and anonymized data extracted or derived from the Flock Services, or use of the Flock Hardware, including all aggregated and anonymized usage data, statistical data, transactional data, metadata, market data, flight logs and flight history, telemetry data and logs, fleet information including drone serial numbers and models, connected device information including radar data concerning the surrounding airspace, and other aggregated and anonymized data collected from user data and files (collectively, "**Flock Drone IP**"). Without limiting the generality of the foregoing, Flock reserves the right to create and market public indexes, analysis or insights created from such data. Customer agrees that it will not share, sell, transfer, or make available any data generated by the Flock Hardware, including all Flock Drone IP to which it may have access, to any third party without the prior express written consent of Flock.

SCHEDULE A

SERVICES

Flock makes no warranties regarding the efficacy of the trainings detailed below.

1. AIRWORTHINESS TRAINING

Flock will make commercially reasonable efforts to provide training for the Customer to maintain the airworthiness of its drones, including compliance-related trainings.

Customer shall be responsible for ensuring that all crew, including pilot in command, visual observer, sensor or payload operator, or other persons necessary for the safe operation of the flight have the qualifications, experience, licenses, and certificates required by applicable FAA regulations and that all have the necessary skill required to perform their duties. After completion of training, Customer shall be responsible for maintaining the airworthiness of drones and ensuring operations are in line with all applicable laws and regulations.

The training will be conducted via both online and in-person methods, as agreed upon by both parties. The frequency and duration of training will be mutually decided and scheduled to the convenience of the Customer.

2. FLIGHT TRAINING

Flock will provide FAA BVLOS waivers and train Customer on compliance matters related to such waivers. Flock will start with one deployment location at a time, and work their way up to the agreed upon number of deployment locations for all UAS. As part of the BVLOS process, Flock will provide training materials to the Customer to certify all employees of the Customer's choosing as Visual Observers ("**VOs**") to help aid in BVLOS operations.

Flock will provide training to officers on how to download the Flock IP and use it. This will consist of:

- Showing how to access Flock on their respective internet devices
- Showing how to view a live stream through the application
- Showing how to control the drone using the application
- Showing how to report problems if they come across them on the application

The training will be conducted via both online and in-person methods, as agreed upon by both parties. The frequency and duration of training will be mutually decided and scheduled to the convenience of the Customer.

3. FLOCK HARDWARE TRAINING

There will also be training for the Customer to use the Flock Hardware. This training will consist of:

- Going over the maintenance list for the drone, and how to maintain airworthiness
- Teaching how to fly the drone autonomously using the Flock IP
- Teaching how to fly the drone manually using the remote controller

The training will be conducted via both online and in-person methods, as agreed upon by both parties. The frequency and duration of training will be mutually decided and scheduled to the convenience of the Customer.

4. DEPLOYMENT SUPPORT

Flock will teach Customer how to dispatch the Flock Hardware using the software for 911 calls.

Only personnel authorized by Customer may have access to the livestream from the drone. They will also be taught on how to use Flock's software to view said stream on any internet-connected device.

Authorized personnel may have access to the Flock IP, which can convey the current status of the drone, and how to tell the drone to conduct additional maneuvers if needed.

All operations will be conducted by a Pilot in Command ("**PIC**"), who will be an FAA-certified pilot, and have manual override control of the drone to prevent malfunctions. Customer will provide the PICs needed to sustain this program.

Flock will assist in drafting a Standard Operating Procedure ("**SOP**") as well as department policies regarding access, deployments, privacy, and community engagement.

Flock will ensure correct implementation of each Flock station and its included Flock Hardware which may or may not include the aircraft, on-prem servers, charging dock installations, radars, and more.

SCHEDULE B

SPECIFICATIONS

Customer must abide by the following standards:

Operational:

- Per FAA regulations, and without the necessary waiver, a minimum of one pilot is required to operate each drone
- Work with Flock to get BVLOS waivers for the city to fully use Flock's product and services.
- Train members of the city to be VOs so that the Customer can have FAA-compliant and safe BVLOS operations (Flock will provide training material if needed).
- If Customer wants to connect Flock's software to their Computer Aided Dispatch ("**CAD**") system, Customer will provide access to said CAD system at no cost to Flock to location information and other pertinent information about calls-for-service as they are placed.
- Flock will provide their Flock software interface to command the Flock Hardware, and allow authorized users for controls.
- Customer must independently access and store any personal information about calls-for-services other than their location and the type of response (police, fire, or EMS) they prompted.

Customer shall be responsible to integrate with CAD software to pull location information and call type information of every call-for-service that the Customer decides the drone should be deployed to, so long as there are no monetary charges to Flock for said integration.

PRICING 23

EXECUTIVE SUMMARY

Aerodome has developed a fully remote, fully automated, multi-station, multi-drone DFR platform capable of providing air support for any call for service within 3-minutes. From a centralized and remote location, Aerodome's software enables a teleoperator to deploy a strategically positioned drone to a call for service with a single click of a button.

In an average of 86 seconds, the drone will arrive at the call for service. Utilizing its high-powered zoom camera, laser rangefinder, night vision and thermal imaging capabilities, the system allows the teleoperator to capture the smallest of details, such as identifying firearms or reading the license plate numbers of suspect vehicles.

Designed to arrive on scene before patrol resources, the system allows for a rapid response to high priority calls for service rendering it one of the most effective de-escalation tools on the market. Furthermore, deploying the system to medium priority and low priority calls enables the agency to adjust resource allocation as needed, or clear the call entirely. This force multiplication capability allows patrol resources to dedicate more time to high priority incidents without compromising overall response times.

Aerodome has spearheaded remote operations with True Beyond Visual Line of Sight (BVLOS) capabilities. Traditional programs rely on rooftop based visual observers, resulting in a multi-person workflow for DFR operations. Through our advanced airspace awareness sensors and the implementation of our Air Traffic Awareness software module, we've successfully created a digital visual observer that exceeds human capabilities and replaces the need for human observers.

DRONE AS FIRST RESPONDER

1 RECEIVE CALL FOR SERVICE

2 UAV RESPONDS TO THE CFS

3 UAV PROVIDES LIVE VIDEO FEED

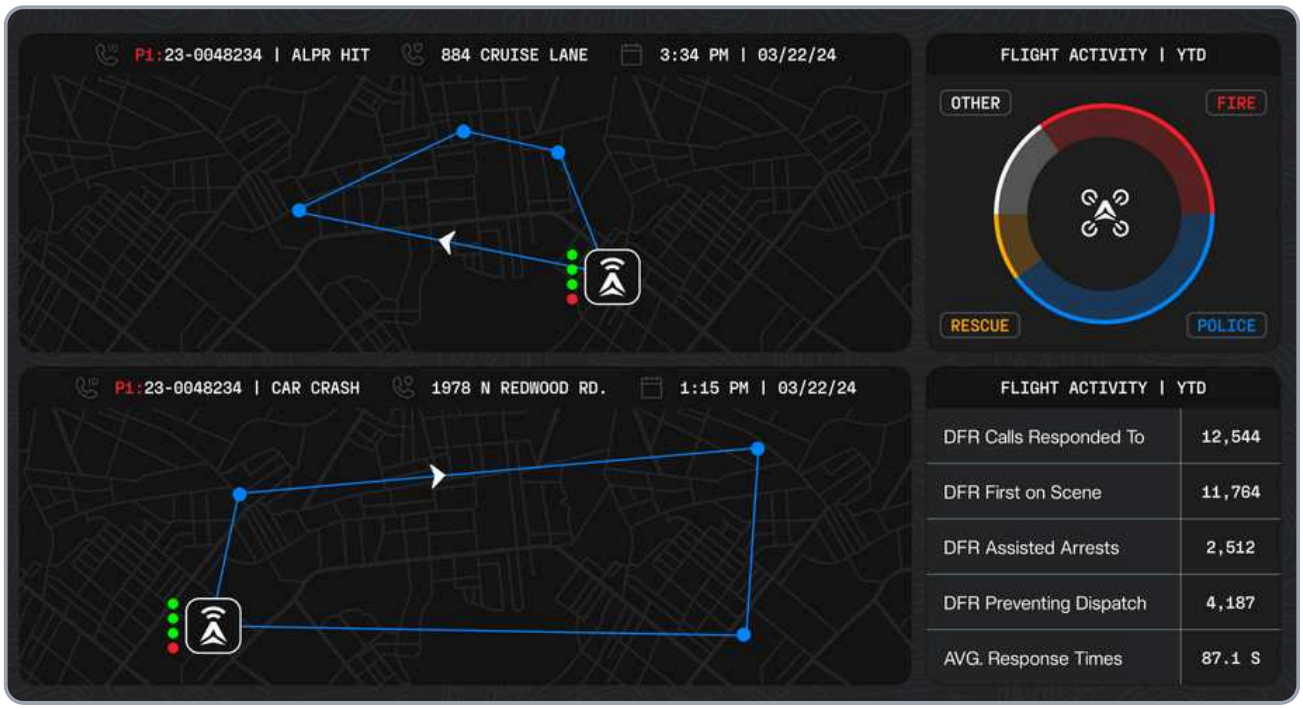

4 AUTONOMOUSLY RETURNS & LANDS

Drone as First Responder (DFR) employs drones strategically placed at high points around cities, which are remotely operated by a pilot, to arrive on scene prior to the patrol response and provide next generation air support capabilities. Public safety agencies have faced significant challenges in recruiting and staffing sworn officers, intensifying pressure on existing field assets. Consequently, response times to an escalating call volume are increasing, exacerbating the backlog in CAD queues. By arriving to calls for service anywhere in the operational area within 3-minutes, the live video feed allows for officers to gain critical situational awareness, which can help de-escalate potentially catastrophic encounters. It can also reduce or completely eliminate the need for a patrol response allowing the agency to effectively allocate understaffed patrol resources.

SUCCESS METRICS OF DFR

CLEAR CALLS FOR SERVICE

Clear an average of 15% of calls-for-service without using patrol resources.

REDUCE RESPONSE TIMES

Reduce response times by an average of 71%.

ARRIVE FIRST ON SCENE

Aerodome drones reach calls-for-service within an average of 86 seconds, providing critical intelligence to responding officers

LOCATE SUBJECTS

Locate and assist in the apprehension of significantly more suspects who would have otherwise avoided detention.

TECH OVERVIEW

The Aerodome platform is a comprehensive, all-in-one air support operating system (ASOS) which includes the hardware, software, airspace detection network, and services needed for NextGen DFR (DFR 2.0) operations.

HARDWARE

- Aircraft + Payload
- Docking Station
- Airspace Detection Sensors

SOFTWARE

- Air Traffic Awareness (ATA) Module
- Flight Operations Module
- Spectator Module
- Flight Log and Mission Reporting Module
- Community Engagement Module

SETUP AND SERVICES

- Setup & Support
- RPIC Approval Program

//HARDWARE

AERODOME®

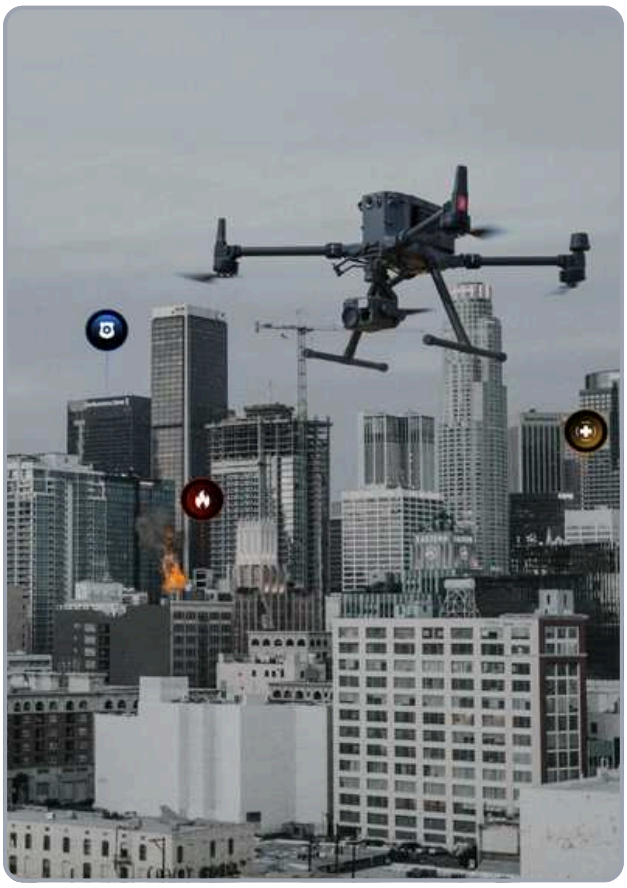

Riverside

AIRCRAFT + PAYLOAD

MATRICE 350

53 MPH MAX SPEED

Twice as fast response speeds as alternative aircraft decreasing DFR response times by 50%.

55 MINUTE BATTERY LIFE

Depending on the distance of the call from the launch location, the aircraft is on scene anywhere from 15 - 40 minutes.

3.5 NM RANGE

Best-in class 1080p video range and connectivity to ensure safe operations anywhere in a 3.5 NM radius from each Aerodome station.

200X ZOOM, THERMAL, NIGHT VISION

The H20T payload offers 200x blended zoom, 1200 m laser rangefinder, and a 640 x 512 radiometric thermal camera allowing for unprecedented aerial imaging capabilities. The H20N adds full night vision for advanced night-time operations.

ATLAS 350 DRONE DOCK

EXCLUSIVELY PROVIDED BY AERODOME AND POWERED BY HEXTRONICS

Utilizing a robotic arm, the dock can hotswap batteries in minutes ensuring a fast turnaround time and optimal battery health. The dock, outfitted with an HVAC system, is able to withstand a wide range of temperatures.

FULLY REMOTE & AUTOMATED

The dock allows one RPIC to control and maintain multiple UAVs throughout the city without the need for another human in the workflow.

2 MINUTE BATTERY SWAP

The battery swap solution allows the drones to be ready for launch 10x faster than any other solution.

SAFEGUARDED FROM WEATHER

The dock is rated IP55. It can withstand heat up to 120°F and cold down to -5°F as well as heavy rainfall and snow.

AIRSPACE DETECTION SENSORS

EXCLUSIVELY PROVIDED BY AERODOME

These sensors are used in conjunction with the Air Traffic Awareness module to replace the need for human visual observers in BVLOS operations.

3D RADAR

A multi-beamforming, 360 degree and 3D radar, this can detect manned aircraft over 4 miles away,

ADS-B

A combination of ground and cloud-based ADS-B sensors to detect ADS-B broadcasting aircraft.

COUNTER-DRONE SCANNER (RF)

A 360 degree radiofrequency scanner that can detect DJI and non-DJI drones in the airspace.
*not included in proposal

REMOTE ID (RID)

A sensor that identifies and tracks drones by decoding their Remote-ID broadcast.

//SOFTWARE

AERODOME®

Riverside

FLIGHT OPERATIONS

// SOFTWARE

The Flight Operations Module allows a teleoperator to remotely control a drone with a 1080p feed, utilize night vision and thermal cameras, automatically navigate to locations, and constantly display weather and safety information.

REMOTELY CONTROL UAVs CITY WIDE

Control all the drones in the city with one interface, flying them safely and with complete awareness.

INTEGRATE CAD, ALPR, & MORE

Use data from all integrated interfaces, including CAD, ALPR systems, gun shot detection systems, and more.

SPECTATOR

The Spectator Module allows patrol officers, watch commanders, dispatchers, real-time crime center staff, command staff, and any other individuals authorized by the agency to enhance their situational awareness, both before and while patrol units are on the scene.

STREAM AGENCY-WIDE

Both permanent and temporary access can be given via text message and email to watch the video feed. Every stakeholder in a call response can gain the situational awareness they need.

VIEW ON ANY DEVICE

The stream can be viewed through computer screens, televisions, smartphones, and tablets and requires very little connection strength for 1080p video quality.

AIR TRAFFIC AWARENESS

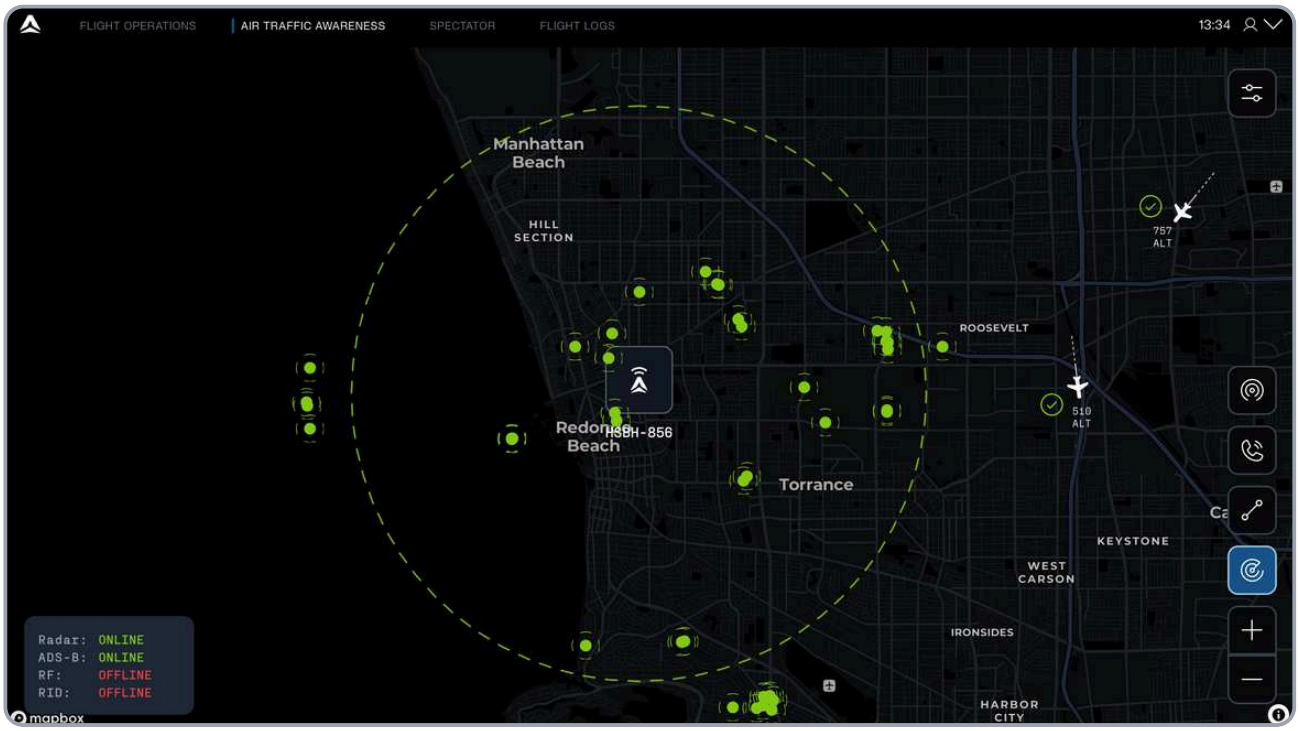

All airspace awareness sensors integrate into this central point to paint a complete picture of the airspace. The ATA Module is integrated with the flight operations screen, so the pilot can be notified of any potential conflicts. The drone can also be set to auto-mitigate threats if the pilot isn't paying attention.

RADAR, ADS-B, RID, RF SENSORS

All of the sensors used to detect and track aircraft in the area are fused into one pane of glass for a seamless detect and avoid experience. Warnings can then be easily communicated to the flight operations screen and pilot.

NO VISUAL OBSERVERS

The single greatest limiting factor to last-generation DFR has been the need for visual observers in order to monitor the airspace. ATA allows the agency to remove visual observers, turning DFR into a true force multiplier.

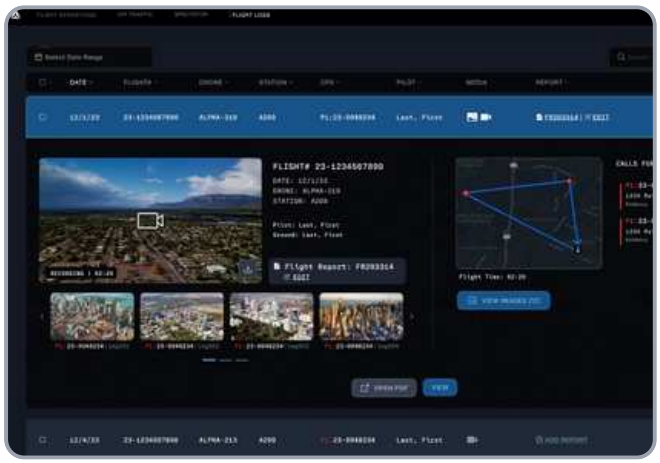

Riverside

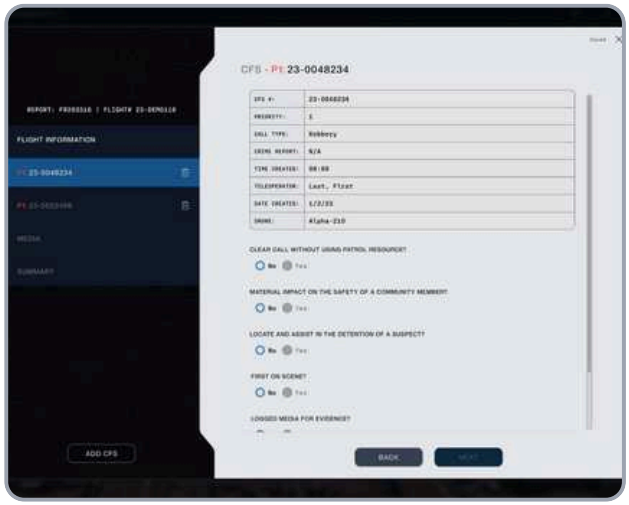

FLIGHT LOGS & MISSION REPORTING

The Flight Log Module aggregates all historical flights, showcasing flight maps, durations, telemetry data, collected media, and mission reports in one location, facilitating compliance and easy data sharing.

ALL FLIGHTS & RECORDED MEDIA

After each flight, all of the flight details are logged. Any pictures and recordings taken during the flight mission can be viewed here and downloaded for proper chain of evidence procedures.

MANAGE REPORTS AND METRICS

A mission report is automatically generated based on CAD data associated with the mission. Details like response times, first on scene %, and more relevant data is collected and added to the dashboard.

COMMUNITY ENGAGEMENT

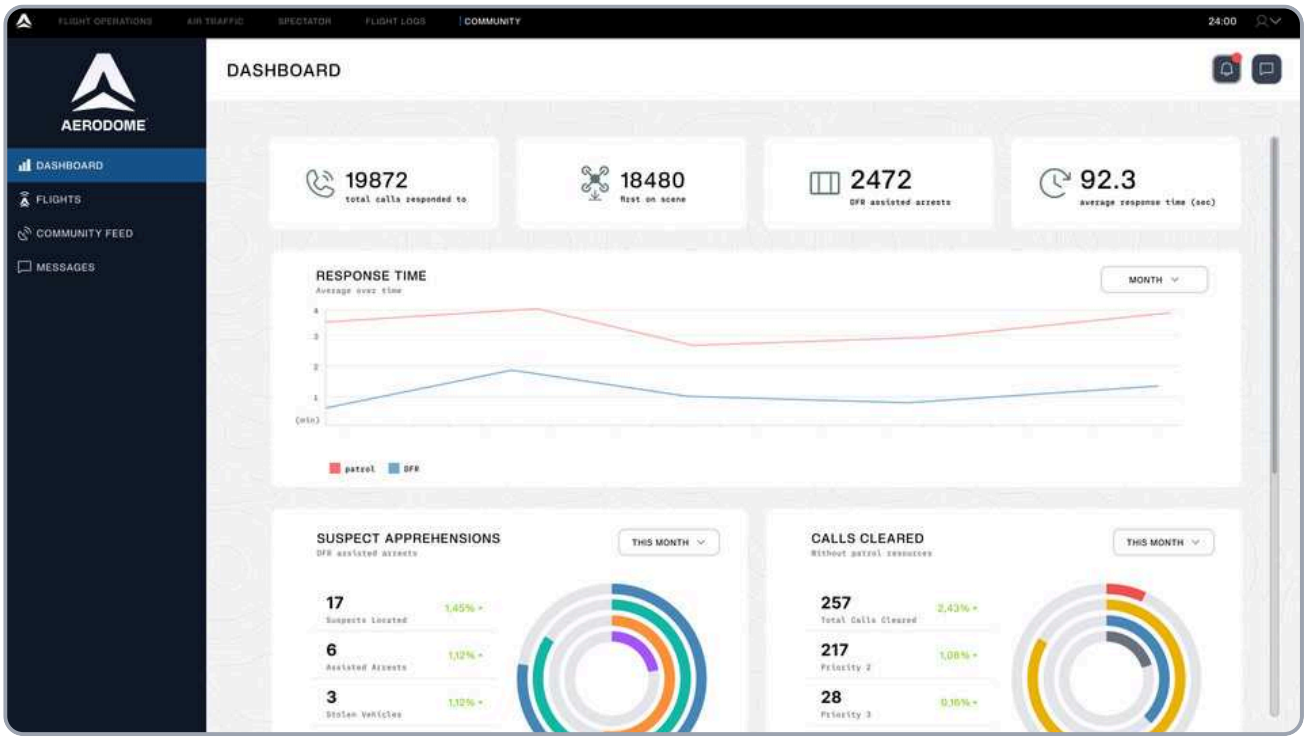

The Community Engagement Module features a public dashboard that automatically updates with redacted DFR flight details and success metrics, promoting transparency and accountability effortlessly.

PUBLIC FACING FLIGHT LOGS

Flight logs are automatically updated in the system, ensuring transparency by providing accessible, redacted flight data for community members.

SUCCESS DASHBOARD

Success metrics of the DFR program are displayed in real-time on a public dashboard, illustrating its positive community impact through quantifiable results.

//SERVICES

AERODOME®

Riverside

SETUP & SUPPORT SERVICES

Aerodome's services encompass the entire process of initiating and maintaining your program, from 0 to 1. We apply for and obtain your FAA waivers, consult with you on your SOP and DFR policies, train your personnel as needed, and facilitate the smooth installation of all software and hardware. We have a dedicated team with over 20 years of experience in integrating with public safety software systems, including over 15 different CAD integrations.

FAA REGULATORY WORK

Assistance with obtaining all necessary FAA waivers and then remaining compliant.

SOP AND POLICY CONSULTING

Help in developing or modifying existing policies.

TRAINING

Providing all training for personnel on DFR operations.

INTEGRATIONS

Integration with CAD, RTCC, ALPR, and gunshot detection software systems.

COMMUNITY ENGAGEMENT

Consult on engaging the community to foster transparency and trust, starting long before the first flight.

CONTINUOUS SUPPORT

Comprehensive support to ensure the ongoing success of your program.

DFR 1.0 -> 2.0 PROGRAM

Aerodome's Air Traffic Awareness Module (ATA) integrates a 3D radar capable of a 4-mile detection radius in any direction into its software. This allows RPICs to deconflict with any aircraft in the vicinity and ensures safe BVLOS flights. Aerodome applies for the FAA waiver on behalf of the department, but until the FAA approves the department's use of the ATA module, **Aerodome will contract and pay for staffed RPICs at the selected locations at no extra cost.**

Once the FAA approves the use of the ATA module at the selected locations, the RPICs will be removed from the rooftop and replaced by the Atlas 350 battery swapping dock. This transition leads to a fully remote BVLOS DFR operation.

This process allows for an agency to immediately initiate a comprehensive DFR program while they wait for the necessary FAA approvals to fly without visual observers, **at no additional cost.**

All these provisions are included under the same annual contract, as per the terms provided below.

Riverside

PROGRAM LAYOUT

The following is a suggested deployment location for the initial Aerodome station. The location has been selected based on airspace analysis and feedback from the department on call volume and ease of access to the hardware.

Launch Location (3.5 NM Radius)

TIMELINE

The proposed timeline commences on the date of our first kickoff call, scheduled upon reaching mutual agreement to work together. Depending on the agency's primary needs, priorities can be adjusted, and timelines remain flexible.

These timelines are estimates and may change based on agency priorities.

WEEK 1

- Integration roadmap established for CAD, etc.
- Hardware order placed.
- Apply for BVLOS COA with VOs.

WEEK 6

- UAV Arrives
- Rooftop pilots are onboarded
- In-person software training, implementation, and QA.

WEEK 12-16

- Radar arrives and initial data collection begins for FAA waiver submission.

WEEK 20

- Radar data collection is complete and waiver is submitted.

WAIVER APPROVED

- Pilots are removed from the rooftop and docks are installed.

PERSONNEL ASSIGNED

The Aerodome team has over 30 years of experience in the public safety technology sector and more than 16 years of experience in both unmanned and manned aviation.

Good Afternoon,

Thank you for reporting the damage to camera #52 EB Nuevo Rd and Menifee Rd. Captain Lamb beat you to it; our Field Operations Team is currently scheduling a technician to repair the location. Just for your records - cameras 57 and 59 were also reported as having been damaged too, so they are also being scheduled for repair. :)

Have a great day!

Stay safe,
[redacted]

Good Morning,

Thank you for reaching out. I am sorry to learn of these incidents. I'm happy to help restore functionality to the locations. I have a few questions to ensure this process goes smoothly:

Here is a link to the reinstall fee schedule. Reinstallation of camera 52 will cost $500, camera 57 will cost $500-$1,300, and camera 59 will cost $350-$500, depending on the extent of the damage. Do we have permission to move forward with replacing the equipment? If yes, the invoice will be emailed to [redacted] upon reinstallation.

Please leave all of the poles as they are. They will serve as markers for 811 digging approval needs if needed.

Has any equipment been recovered? If so, please confirm the address where we can pick up the equipment and if there is anything we should reference/someone we should ask for upon doing so; we understand that personnel availability changes frequently in a public safety setting, so we are happy to connect with administrative staff to obtain equipment if they have a more flexible schedule.

Stay safe,

Hi there,

Our technicians attempted to reinstall location #20 SB Grand @ Ortega and found that this area has frontier utilities. We would need to go about 25 feet into the field to clear utilities which is too far from the road for our cameras to operate. We will need to find a new location.

Could you please assist me with confirming the questions below for our deployment strategy team?

1. Which camera (please include the number) would you like to have relocated?
    1. #20 SB Grand @ Ortega
2. What is the motivation or goal for relocating this camera?
    1. Device went missing, after attempting to reinstall frontier utilities were found in the area.
3. **Where would you like to relocate the camera? Please provide coordinates and/or a mark on an aerial view map.**
    1.
4. **Which direction of travel would you like to capture?**
    1.
5. **Is the camera going on an existing pole (light pole, utility pole, etc.) or a Flock pole?**
    1.
6. Do you agree to pay for the relocation fee of $350 for an existing pole, $750 for a Flock pole, or $2,000 for an Advanced Flock pole (X2/DOT)?
    1. This will be waived due to the replacement fee of $1300 for the camera and pole

7. Who is our point of contact for this relocation? Please provide their name and email.
    1. Rayls, James [redacted]
8. Please note that if a permit is needed, we may request additional documentation. The permitting process may prolong the timeline.

Stay safe,

Good Morning,

[redacted]here from Flock Safety Customer Support. While responding for maintenance on camera #52 Shaver St @ Hewitt St WB, the technician noticed that the location experienced third-party damage as the camera had been spray painted (see attachments). We went ahead and replaced the equipment to ensure the locations were functioning properly as soon as possible.

Due to the physical damage, we will be sending an invoice for the damage in conjunction with our reinstall fee schedule. This invoice ($800) will be emailed to [redacted] shortly. For additional information, please see Section 8.2 of our Terms and Conditions.

I have also attached two screenshots -the last normal image that was captured on 11/3 at 12:23:34 a.m. then the next image on 11/3 at 6:55:23 a.m. There are no images in-between so sometime during that 6.5-hour timeframe, the camera would have been vandalized. Please note that I am located in Arizona so the time stamp on my screenshots is an hour ahead of PST.

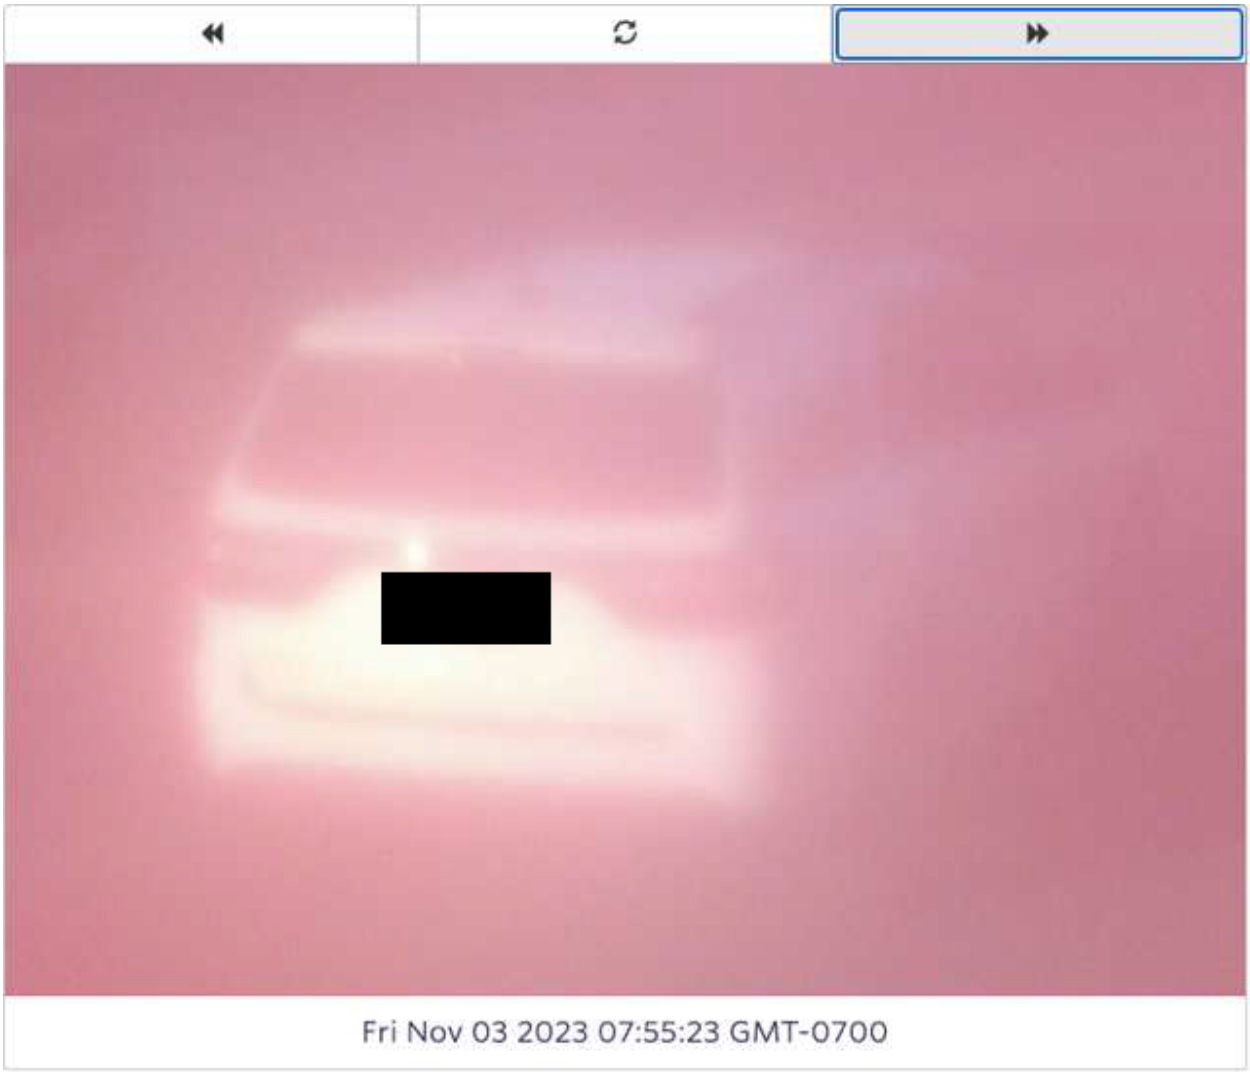

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology.

Have a safe holiday,

Good Morning,

[redacted] here with Flock Safety Support. I am reaching out to advise you the Murrieta PD reported that camera #22 NB Clinton Kieth Rd @ Riverside Fire Station 75 was damaged in a motor vehicle accident. They recovered the camera and brought it back to their department. You will see their email attached with any information that you may need. I will have our technician respond to Murrieta PD to recover the camera.

Here is a link to the reinstall fee schedule. Reinstallation will cost $500-$1,300, depending on the extent of the damage. Do we have permission to move forward with replacing the equipment? If yes, the invoice will be emailed to [redacted] upon reinstallation.

Please let me know if you have questions.

Stay safe,
[redacted]

Subject: Damage to Cam #19 Murrieta Hot Springs Rd & Winchester Rd WB

Good Afternoon Captain Potter,

[redacted] here from Flock Safety Customer Support. I'm hoping you can assist me with determining who the primary contact is for the French Valley Station. While responding to an alarm on camera #19 Murrieta Hot Springs Rd & Winchester Rd WB, the technician noticed the pole had been struck and the equipment was missing (see attachment). We will need to reinstall all of the equipment to ensure the location is functioning properly as soon as possible. Do you know who removed the equipment and/or where it is located? If so, can you please provide us with the address to pick up the equipment and if there is anything we should reference/someone we should ask for upon doing so?

If the equipment cannot be located or damage is discovered, we will be sending an invoice in conjunction with our reinstall fee schedule. This invoice ($1,300) will be emailed to [redacted] upon reinstallation. For additional information, please see Section 8.2 of our Terms and Conditions.

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology.

Stay safe,
[redacted]

Subject: RE: Cross Platform Capabilities

Ah ok, at HAI (Helicopter Association International), Pomona PD had their aircraft on display with Trakka equipment and was told by the crew it worked with Flock already.

Correct, would like the FLOCK software to run the M2 LPR camera scans and cross reference them real time like a FLOCK stationary camera with SVS/HOTLIST etc.

I know we have had discussions with Trakka, but I am not aware of any interface being completed. I'll check with my internal teams. What I'm hearing is you want Flock software to run on their cameras to check for LPR hits? Correct? Or are you simply wanting to pull the video streams into Flock so you can see the video from their cameras in Flock?

Good Afternoon [redacted]

I am reaching out to see if you can point me in the right direction of who to talk to within FLOCK regarding the below question.

I am now assigned to our Aviation unit and we are switching to the new Shotover M2 Camera and ARS Mapping System on our helicopters. The new M2 camera has LPR technology currently implemented. I was told that the new Trakka brand camera has LPR technology and they were able to implement FLOCK into the camera allowing all the license plates captured by the camera to also be cross checked with SVS/Hotlists just like a typical LPR camera does. I would like to connect someone from FLOCK and SHOTOVER to see if this is possible to be done. With how good our airborne cameras are getting, now with having LPR technology, I believe this is going to be the way of the future for Airborne Law Enforcement looking for suspects, missing people and stolen vehicles etc.

Looking forward to hearing back from you!

Ah! I see it now. That is much better, it gives a dark photo with just a clear image of the plate and then a daytime/low light picture to give a better image of vehicle it self. That is awesome! The night pictures have always been tough. Typically when he get a night hit, we would do a lookup on the same plate and find a recent daytime picture to help show us what it looks like. This is a huge improvement!

Good Afternoon John,

Here is a quick summary of difference:

1. Flock uses machine vision (a form of AI) to help identify vehicle attributes, so you can search based on the vehicle description
2. All Flock cameras proposed are solar powered and infrastructure free and can be placed where the SO wants cameras, not where infrastructure is available.
3. Flock is used by nearly every city in the county allowing for better collaboration, and over half the cities in the state use Flock
4. Flock installs and maintains all cameras for the city. The subscription covers all maintenance and replacement of cameras except for physical damage.
5. Mobile app/accuracy of reads
6. Cloud storage and LTE is included in the subscription
7. The city of Perris has 5 flock cameras and the deputies prefer using the flock system as it is easier to use and due to adoption in the county, more useful to deputies stationed in the city and region.
8. More cameras in the city will allow the deputies to better utilize the county's investment in Flock, as the Sheriff's office has funded 529 cameras in the unincorporated areas of the county including many around Perris.
9. Flock is enhancing the live view cameras the city invested in at the park by making them available to activate within Flock's portal which is used by nearly all Sheriff's deputies in the city.

Vigilant generally requires hardwired/power for their best cameras to function, no mobile app, the city is responsible for monitoring and ensuring cameras are functioning and will need to replace hardware as it fails, which is where your current cameras are at end of life and the replacement/upgrade costs are significant. Vigilant does not have a mobile app, no does it use Machine vision, so effective searching by vehicle description is not useful.

I hope that is useful. Feel free to call me if you want any additional details.

Unfortunately, I'll be traveling to a meeting during that time. My apologies for these conflicts. I am wide open Friday after 11am PST.

You do have access right now via the Map and VMS tabs in the dashboard if you want to take a look. The VMS tab would be the easiest to review each integration/camera feed. My biggest question is who at RSO should have access to these? All users?

I'll give you a call at the number in your signature while I'm in transit today so we can discuss a few details until we can meet via zoom.

Hi Chris,

I submitted the exception request for the 5 year offer to be extended to 1/31/24 right after the meeting. As soon as that is approved, most likely on Monday, we can provide the quote and contract for all cameras (including the eleven). Current pricing is $3k per camera so I cannot produce a quote at the discounted pricing without that approval.

I commit to getting you an update on Monday. Please let me know if anything has changed with how you'd like to proceed.

Hello Chris,

I have executive approval to extend the city's renewal offer to 1/31/24. You can include the expansion at the discounted price and co-term all existing cameras. I'll follow up with the quote and contract for your review so you can work toward the January council meeting. Let me know if you have additional questions.

Thank you all for working on this.

It's not a matter of making me feel better about their locations, more so to meet the specific need of this Districts roadway maintenance crews. The process of approving cameras through the county was established before I became involved in this project so don't know the specifics or any requirements but assume it would have at least laid out some level of minimum standard for installation, to include a setback distance similar to what the county uses for all other roadway signs.

In this case, the request is to move the cameras to the "wind row" to avoid them being struck by graders. If the windrow is unclear to the installers, please use the setback distance established by the nearest traffic control sign. As you have installers in this area, please adjust their locations.

1.

    1. #17 EB Ave 52 x Monroe
    2. #18 EB Ave 54 x Monroe
    3. #04 EB Airport x Monroe (This camera was reported damaged on 9/12 – yet to be reinstalled).
    4. #21 EB Ave 58 x Monroe

I'll reach out to the county permitting team for a copy of the original and any required standards.

Andy

From our Permitting team:

"We submitted the start work notification via the blanket permit to the county for these locations. The DP shows #17 and #18 are 7' from the edge of the pavement. #21 is 6' from the edge of the pavement but looks closer to the install photo if it would make him feel more comfortable we can create work orders to move them back further."

Let me know if you have any further questions.

Stay safe,

Thanks for the quick reply.

This isn't a Relocation Request – at least not yet. But it's definitely a "Research Request."

First, I'd like for the specific permits to be reviewed to determine if any setback requirement were conditioned by the county. I know we've had similar set back issues in other parts of Riverside

County where the county required an 8’ minimum from the roadway. If this the case, sounds like it was an installation error that needs to be corrected.

If there was an error, the cameras should simply be moved to the setback distance. No change to capture DOT or installation type.

Andy

Hi there,

I can reach out to our Operations team to get more info concerning the permits on these cameras. It sounds like we're requesting a relocation here. If that is the case, we'll need the following questions answered to move forward:

1. What is the motivation for relocating this camera? **email from county roads ref the FLOCK camera locations that are in the right of way**
2. Which camera or cameras (please include the number) would you like to have relocated? **#17 EB Ave 52 x Monroe; #18 EB Ave 54 x Monroe; and #21 EB Ave 58 x Monroe**
3. Where would you like to relocate the camera? Please provide coordinates and/or a mark on an aerial view map.
4. What direction of travel would you like to capture?
5. Is the camera going on an existing pole or Flock pole?
6. If a permit is needed, we may request additional documentation. The permitting process may prolong the timeline.
7. Does your agency agree to pay the relocation fee per our reinstall fee schedule?

I'll let you know about the permits and await your reply on the relocation info.

Stay safe,

Hi Support!

Can you help on this issue? Short of reviewing these specific permits, I'm not sure what was dictated by the county for these flock pole installations or their required set back from the roadway.

The two specific cameras that _____ is referencing in this email are:

#17 EB Ave 52 x Monroe
#18 EB Ave 54 x Monroe

I also suspect that this camera will have the same issue – he probably hasn't seen it yet.

#21 EB Ave 58 x Monroe

Thanks!
Andy

Hi there,

Thank you for sending the photos of the equipment. I was able to search the serial number on the Flock pole and found that this equipment belongs to camera #60 EB Clay @ Van Buren, this location is also missing.

I can assist with arranging for a technician to pick up the equipment. Could you please confirm the address for pickup? Additionally, is there a specific person they should contact upon arrival? Any extra details to help our technician locate the equipment would be appreciated.

Once our technician collects the equipment, they will send us a report to verify if any of it is still operable. If the equipment is still functional, the replacement quote can be adjusted accordingly.

Stay safe,

Hello Team,

There is some confusion regarding the recent maintenance for 2 of this city's locations at Van Buren @ Clay. One of the cameras (#16) was reported stolen by Flock (pole and camera). The city needed to approve the replacement which they did. This morning, Sgt. Bodnar searched both cameras and there is footage so we must have replaced this camera/pole last Thursday. Can you confirm this is the case?

Where the confusion comes in, is there is an open invoice for BOTH cameras, even though (#17) was not reported as down or replaced. Can you confirm nothing was done to this camera at the same location?

Thank you,

Hi there,

Thank you for your patience while I looked into this. I was able to get some confirmation on my side that the cameras can be switched over from Perris to Lake Matthews. However, before that change can take place we would like to get permission from someone who is a primary contact on the account. It looks like Lt. Koser is assigned to the Perris station from our records.

Are you able to loop them in or someone else who is a primary contact on the account to provide approval for the relocation of the cameras?

Thank you for your assistance with this.

Stay safe,
[redacted]

Hi there,

Thank you for bringing this to our attention. I have updated the camera names to their correct direction of travel. Please note, this change can take up to 1 hour to be reflected. Please let me know if there is anything else I can assist with.

Stay safe,

Subject: Cameras mis-identified

Good afternoon, this email is to request a rename a few of the mis-identified cameras in the Lake Mathews area. Below are the camera names currently and what they should be named to accurately reflect their direction or location.

1. Van Buren x Washington, east and west cameras (#23 & #24) are mis-identified and should be switched.
2. SB McKinley x Estelle (#3) should reflect NB McKinley x Estelle
3. WB Dawson Canyon x Temescal Canyon (#43) should reflect EB Dawson Canon x Temescal Canyon

Respectfully'

B.Sinclair, Sgt. #3753

> Hi there,

Thank you for reaching out. I am sorry to learn of this unfortunate incident. I am happy to help restore functionality to location #79 NB A St @ W 11th St. I have a few questions to ensure this process goes smoothly:

- Here is a link to the reinstall fee schedule. Reinstallation will cost $500-$1,300, depending on the extent of damage. Do we have permission to move forward with replacing the equipment? If yes, the invoice will be emailed to [redacted] upon reinstallation.
- Do you know if the Flock pole is still on site? If yes, please leave it as is; this will serve as a marker for 811 digging approval needs if needed. If not, please confirm the address where we can pick up the equipment and if there is anything we should reference/someone we should ask for upon doing so.
- Please leave any remaining equipment as is, I have noted that it is missing. If any equipment is found, please confirm the address where we can pick up the equipment and provide a phone number and name for contact purposes. We understand that personnel availability changes frequently in a public safety setting, so we are happy to connect with administrative staff to obtain the equipment if they have a more flexible schedule.

Thank you in advance for getting back to me.

Stay safe,

Subject: Camera relocation status

[redacted]

I am checking the status of a couple Flock camera relocations/installations:

Camera #11 NB Haugen-Lehman Way (was knocked down and camera missing) from January 5, 2024.

Camera #5 WB Seminole @ Malki Road. We requested to move this camera to the north side of Seminole near or around the Chevron gas station to get WB traffic on Seminole. Where it's located now, it gets EB traffic and very limited WB traffic. I attached a photo for reference. There are light standards that could accommodate the camera, or a pole could be installed.

Please let me know.

Thank you!

Sounds great! I met with the team that is working on the relocation for pushing the camera back further from the roadway and advised our Field Operations Team of these requirements as well for when they schedule the technician to respond.

I have also updated the account contact information to reflect that Lt. Velasco will be the primary contact moving forward. Thank you for providing me with the updated information!

Best,
[redacted]

Subject: RE: camera issue (neighbor agency- RSO)

Approved.

However, please reinstall it per the relocation instructions that have been provided. The current location is too close to the roadway and county road crews are also having problems with it's current location. The new location should be a few feet further from the roadway, along with "wind row" or at the same distance from the roadway as other traffic signs in the area.

Moving forward, Lt. Frank Velasco, cc'd in this email, is now your primary contact for the City of La Quinta network. He can be reached at [redacted].

Let me know if you have any questions.

Andy

Good Morning,

[redacted] here with Flock Safety Support. I'm reaching out to you as the listed primary contact for the City of La Quinta after learning that camera #17 EB Ave 52 x Monroe was struck during an accident (see below). I am happy to help restore functionality to the location.

1. Here is a link to the reinstall fee schedule. Reinstallation will cost $350-$500, depending on the extent of damage. Do we have permission to move forward with replacing the equipment? If yes, the invoice will be emailed to [redacted] upon reinstallation.
2. Please leave all of the equipment as is; the pole will serve as a marker for 811 digging approval needs if needed. If any equipment is removed, please confirm the address where we can pick up the equipment and if there is anything we should reference/someone we should ask for upon doing so; we understand that personnel availability changes frequently in a public safety setting, so we are happy to connect with administrative staff to obtain equipment if they have a more flexible schedule.
3. I do see that this location is currently in the process of being relocated. I reached out to both the Project Manager and the Deployment Specialist who is working on this to inquire about the timeline to determine if we should fix the current location or plan to relocate it.

Thank you in advance for getting back to me.

Stay safe,

It would be the light pole in the attached picture. You can see the previously existing Flock camera in the photo. Based on the signage, I believe it would be owned by Caltrans and/or the state of California. I'm hoping this would work. The power pole you sent would work as well, with the camera being pointed south instead of north where the camera is (was). I'm not sure who owns that power pole. I would suspect it's owned by Edison. I can try and verify each of those poles and get back to you ASAP.

Regardless, we would like to proceed with getting that camera replaced and reinstalled.

Thank you!

Hello,

Camera #11 NB Haugen-Lehman Way @ Tamarack in Whitewater (Cabazon Station jurisdiction) was knocked down and the camera and battery are missing. The pole is still there, but I believe it is damaged beyond repair. It was knocked down after 2300 hours on December 14 based on the last images captured.

We would like to get this camera replaced as soon as possible. Due to prior damage and vandalism, I wanted to inquire if we could relocate the camera to a nearby light pole. The light pole is on the same side of the street, about 50-75 feet south of where the camera is currently located. This would help prevent theft and vandalism issues.

Please let me know if this is feasible.

Thank you in advance!

Good Morning,

I just spoke with your Project Manager, [redacted], who advised me that we cannot currently install on CalTrans poles right now which is who the existing pole belongs to that you were wanting to relocate the camera to. I ran another by Aaron who agreed that he thinks it would be a good idea if you approve it - attached is an image directly across from the initial relocation proposal spot, where I added a red line to indicate a Flock pole installation. If we install it in that area, the guard rail and other existing pole should prevent any future damage. We would still be able to capture NB traffic and it won't be cross-traffic. Do you approve of us going this route? I will not charge for the pole replacement since you wanted to install it on an existing pole but permitting issues are keeping us from doing so.

Thank you,

CalTrans poles right now which is who the existing pole belongs to that you were wanting to relocate the camera to. I ran another by Aaron who agreed that he thinks it would be a good idea if you approve it - attached is an image directly across from the initial relocation proposal spot, where I added a red line to indicate a Flock pole installation. If we install it in that area, the guard rail and other existing pole should prevent any future damage. We would still be able to capture NB traffic and it won't be cross-traffic. Do you approve of us going this route? I will not charge for the pole replacement since you wanted to install it on an existing pole but permitting issues are keeping us from doing so.

Thank you,

It would be the light pole in the attached picture. You can see the previously existing Flock camera in the photo. Based on the signage, I believe it would be owned by Caltrans and/or the state of California. I'm hoping this would work. The power pole you sent would work as well, with the camera being pointed south instead of north where the camera is (was). I'm not sure who owns that power pole. I would suspect it's owned by Edison. I can try and verify each of those poles and get back to you ASAP.

Regardless, we would like to proceed with getting that camera replaced and reinstalled.

Thank you!

Good Afternoon,

Thank you for reaching out. I am sorry to learn of this unfortunate incident. I am happy to help restore functionality to location #11 NB Haugen-Lehman Way @ Tamarack. I have a few questions to ensure this process goes smoothly:

1. Here is a link to the reinstall fee schedule. Replacement for the camera if relocated to an existing pole will cost $800. Do we have permission to move forward with replacing the equipment? If yes, the invoice will be emailed to [redacted] upon reinstallation.
2. Do you know who owns the light pole so we can ensure that we have permission to install the camera on it? I have attached a screenshot of the pole that I believe you are referring to. Can you please just confirm that this is the correct pole?

Thank you in advance for getting back to me.

Stay safe,

[redacted]

Subject: Cam #11 NB Haugen-Lehman Way @ Tamarack

Hello,

Camera #11 NB Haugen-Lehman Way @ Tamarack in Whitewater (Cabazon Station jurisdiction) was knocked down and the camera and battery are missing. The pole is still there, but I believe it is damaged beyond repair. It was knocked down after 2300 hours on December 14 based on the last images captured.

We would like to get this camera replaced as soon as possible. Due to prior damage and vandalism, I wanted to inquire if we could relocate the camera to a nearby light pole. The light pole is on the same side of the street, about 50-75 feet south of where the camera is currently located. This would help prevent theft and vandalism issues.

Please let me know if this is feasible.

Thank you in advance!

Hello James,

I hope all is well since my last update. I am reaching out to let you know we are having trouble with the local Caltrans inspector approving our LCR.

Are you able to put in the LCR? If so could we trouble you to put that in and we will send our crew out to complete the work?

I look forward to hearing from you.

Hello LT,

We hit a little snag with the local inspector. The team was able to finally meet with him and get that step completed. We are now working through the LCR with our traffic control vendor.

LCR = Lane Closure Request

We should have these installed within the next 2 weeks or so given that we have to provide at least a 7-day LCR.

I will keep you posted on the dates once we have those scheduled.

Good Afternoon LT,

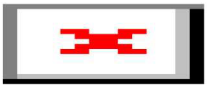

I hope all is well with you since the last time we spoke. I am reaching out to let you know that we are making some progress on the last couple of locations.

The Update - As of 4/22/24 - The remaining locations are CALTRANS locations - 18 out of the 20 product locations are in service. 2 out of the remaining 20 product locations are within permitting. My latest permitting manager notes as of 4/22/24 - Our application # 08-24-N-MC-0159 was reviewed, redlines addressed, and re-submitted to George at D8.

Please let me know if you have any questions or concerns.

Good Evening Team,

I hope everyone is doing well. I am reaching out to provide you all with an update.

We received feedback from Geroge at Caltrans on 3/27/24 - on application # 08-24-N-MC-0159 that the "truck path does not represent the off-tracking of the trailer". So we are making those corrections and should have those resubmitted within the next few days.

Please let me know if you have any questions or concerns.

Good Morning Everyone,

I hope this email finds you well.

I am reaching out to provide an update regarding the final 2 locations.

The Update - *3/25/24 - 18 out of the 20 product locations are in service. 2 out of the remaining 20 product locations are within permitting. Both are Caltrans locations. The latest from my permitting team is - Application # 08-24-N-MC-0159 on 3/21 they sent F/U email to George to confirm* that *revised plans were received. George responded with "Confirm, I received the revised plans and your permit right now under our functional unit review."*

As soon as we have a response from them I will let you all know.

Please let me know if you have any questions or concerns.

Mr, Monetz,

Captain Lamb and I drove around the three locations (#14, #15, and #74) regarding he construction in those areas.

- #14 EB Harvill X I215. There is no construction in the area we choose for the camera placement as indicated on the Planning Center site for CA-City of Perris (phase 2).
- #74 N/B A Street x Nuevo. Again although there is construction in the area, there is no construction and will be no construction for the camera placement as indicated on the Planning Center site for CA-City of Perris (phase 2).
- #15 EB Bonnie Drive x Maps. There is major construction in the original location identified. However, could we please move the camera northwest toward the actual interception ? Street light of Mapes Rd. X Bonnie Dr. We need the camera focused on the traffic coming into the city.

Please see attached PDF for further explanation. If you have any questions, please feel free to reach out.

Lt. Wade Lenton

Good morning Matthew,

Hope all is well. On your account. I attached the current statement. Their are to unapplied payments.
Just need to understand how you would like to handle them.
Apply to any of the open invoices. I need to know which invoice. Or refund.
Please respond in efforts to clean up your account.
I know before you stated to apply them. I sent that response to cash applications then. But of course, they never applied it. Now it is coming back up again.
Please respond by email with decision.
If refund. Just need account name to refund and address and attention to whom.

Hi Deputy Perez,

I wanted to follow up and make sure you got the information you are looking for and to see if you now have access to the cameras you needed access to. Bill gave me permission the other day to share so I had my team make those adjustments.

Wanted to make sure they reflected on your end.

Have a great weekend,

Hi there,

Thank you for reaching out. Our system is designed to delete images every 30 days on a rolling basis for privacy purposes. Therefore, any images older than 30 days from today have been deleted and are inaccessible. You can review our Data Retention Policy here.

I appreciate your understanding.

Stay safe,

Hello, I'm trying to locate a vehicle that committed a theft on 09/24/24. Is it possible to still search for this plate, or is it too far out. I tried searching and it's giving me a message stating no results found.

This is the car I'm looking for. It's a light blue Volkswagen that committed at theft at [redacted]. I wanted to check the FLOCK cameras nearby this address.

Hello team, please feel free to review my notes below from today's meeting. Please let me know if you have any questions or concerns about any items included. Thank you!

Project Plan	For high level overview and status of tasks

Google Drive	For exchanging shared materials and storing meeting notes
Project Notes	For detailed notes on project

Notes

- ESRI layers
    - ESRI layer features in FlockOS
        - All layers can be toggled on/off
        - Base maps are fixed
        - Do not currently support jurisdictional sharing
        - Small limitation with shape files where we might not be able to adjust transparency, but we are working on it
        - For shape files - set up content as is prior to sending
    - Determined on call that it would be best if just shape files are provided in this instance due to the current limitations for Flock's access to the feature layer (would be able to pull all layers)
    - Discussed that the Riverside SO team would provide the following
        - Boundaries, non-contract
        - Beats
        - City limits
- Axon
    - Admin Josiah Diggs is available to be on next bi-weekly call
    - If desired I can set up a quick call with him and between now and then to set up the API

Hi Nicholas, I don't think I should need to be on the FirstTwo call. I just know that you will need to have a full agency license for me to be able to set up the FirstTwo integration with FlockOS, I don't think I will have much to contribute to the call beyond that. Please let me know though if something comes up for me on the call that you need my assistance with!

Yes, please go ahead and include the GIS team on next week's call, we can spend a portion of the call discussing what is needed and desired for the ESRI layers for this integration.

Thank you,

Hello Riverside team, I hope you are all doing well. I just wanted to reach out to check in on scheduling a bi-weekly meeting cadence with your team for us to stay up to date on our action items. Below are some updated times that my team is available to meet each week. All times are PDT. Let me know a time that works well for your team and I will send out a recurring invite. For the first meeting I would like to schedule an hour to allow some time for [redacted] to discuss FlockOS adoption with your team, then moving forward we will just need thirty minutes each week.

Starting the week of September 23rd
Tuesdays 10:30-11:30
Wednesdays 11:00-1:00
Thursdays 12:30-1:30

Starting the week of September 30th
Tuesdays 12:30-1:30
Wednesdays 9:00-10:00, 10:30-1:00

Thank you, please let me know if you have any questions at this time.

and I will send out a recurring invite. For the initial meeting I would like to schedule one hour to have time to discuss adoption of the FlockOS program as well as action items, but in the future beyond that we should only need thirty minutes a week.

Starting the week of September 16th
Wednesdays 11:00-12:00
Thursdays 10:00-11:30

Starting the week of September 23rd
Wednesdays 11:00-1:00
Thursdays 12:30-1:30

Project Plan	For high level overview and status of tasks
Google Drive	For exchanging shared materials and storing meeting notes
Project Notes	For detailed notes on project

Notes

- ESRI layers
  - Is there a named user or ability to use credentials to keep it secure?
  - Currently we use a key and token
    - This is not preferred but the Riverside SO team said they can work with this
  - Is ESRI managed by county?
    - No this is managed at the SO level
- Axon
  - Do have Respond
  - Is Axon all under SO? Yes
- Milestone
  - _____ will be primary contact for this item
  - Currently migrating hardware, will be ~ a month before this can be started
    - I have updated the project timeline to reflect this
- First Two
  - Do not currently have full agency license
  - This feature is currently under crime analyst unit
    - Team will reach out to them to identify next steps to upgrade to full agency license
- Engineer FlockOS access
  - Should be okay to proceed
  - Team will send a form for engineers to fill out for approval
- Would like to share CAD details with Hemet PD
  - ____ will follow up on if the needed forms have been completed for this item

Good morning Deputy Pourier,

Following up on this CSD approval.

I haven't encountered a CSD approval requirement like this one, so I'm not exactly sure how to obtain and document this approval.

I wasn't asked to provide any documentation of approval, so technically our team can proceed with installation as soon as we are confident the residents will not object. Nevertheless, I'd like to obtain some sort of documentation of approval to ensure we are covered if an issue arises in the future.

Please let me know the best way to proceed.

Thanks,

To my knowledge all of our cameras in Riverside County are owned and operated by law enforcement agencies, and no cameras currently exist in De Luz CSD, but I added [redacted] to confirm. [redacted] works with HOA's in this area.

I can speak with anyone concerned about privacy it that will help.

Here is a brief summary of my talking points on privacy concerns:
1. We only capture vehicle data on public roadways, where citizens operate vehicles only with a valid CA Drivers License and only in vehicles which are registered with the state and legally required to be identifiable by license plates
2. Since California requires drivers to be licensed and to operate registered vehicles, there is no right/nor expectation of privacy for vehicles traveling on public roads
3. Riverside County controls/manages public rights-of-way in Riverside County and is authorized to allow installation of license plate reading cameras to law enforcement agencies pursuant to permit conditions, which Riverside County Sheriff's Office has satisfied.

On Thu, May 23, 2024 at 8:23 AM Pourier, Shawn <[redacted]> wrote:

Good morning, Sir,

Could you please provide me with a list of the current camera owners in De Luz. I spoke with the De Luz community services district, and they do not understand how ALPR cameras work. The district sees it as a liability and a possible invasion of privacy lawsuit. I tried to explain it to them; however, I did not sway them. Additionally, the HOA that wants to move the camera, do not understand how ALPR cameras work either and want to move it to a mailbox. I need to see if any of the camera's that are requesting to be moved are privately owned or if they are County owned. If the cameras in question are owned by the County, we are not going to move any to a mailbox.

Respectfully,

Deputy Shawn Pourier

Subject: RE: 2 locations to speak to the city about

I did. The location on the light pole is city owned, so that should not be a problem.

The second one is not ideal, based on recent litigation with the city.

The requests were sent off to another department for some input.

I have a meeting with them today at 2pm and will ask again.

Hi Nichole,

After having our deployment team review everything, I need to confirm some details before they push it to install.

Should the location be labeled "EB Hidden Valley @ NB Off Ramp" - I am guessing that is a typo but want to confirm. The SB Off Ramp would need to face WB.

Subject: RE:

Thank you for the follow through; however, I am looking for ALL vehicles that passed through the Airport Blvd Harrison Street cameras… The vehicle is missing the front bumper so its safe to say a license plate will not be captured. If I am not mistaken putting in a specific date, time and location should yield a batch off ALL vehicles that crossed during that time.. Or am I mistaken on how the NO PLATE option works

Hi there,

Thank you for your patience on this. I spoke with my team about the Search you are attempting to perform to see if they had any additional suggestions for parameters. If you know the make, body, or, color, you could try searching 'All plates' with one of those options (overriding the confidence level may include additional results). However, because you are attempting to locate a vehicle from the front, it may not have been captured by the cameras in those locations.

This is because our cameras use infrared motion sensors that detect motion coming towards the camera from behind to activate the camera, and it will take a series of captures until there are 5 continuous seconds of no motion detected. These sessions are usually 15-20 seconds long. In most cases, if any footage is taken from the other direction, going towards the camera from the front, something else triggers the camera to take images from behind, like a tree branch or a vehicle going in the optimal direction.

Our Machine Learning will then identify that there was a possibly useful vehicle in the capture and upload the image to the cloud but will struggle with the accuracy of information because our technology is trained to identify the back of vehicles, not the front.

I hope this better addresses your questions, and thank you for your understanding.

Please let me know if you have any additional questions.

Stay safe,

From: Porras, Daniel

Attachments: RE: Power requirements for Condor cameras

Hi [redacted]

Thank you. Sorry I did not get back to you sooner.

I spoke with the city; they will probably be holding off introducing the cameras until after local elections. I have attached an earlier e-mail and city engineering said power will not be a problem on El Paseo.

As you can see, we have been at this for a while.

Since it will go beyond the 30 days of the link, is this information going to be saved for future use? I don't want your work to disappear.

Thank you,

Lt. Porras,

I wasn't sure if [redacted] sent you the deployment map for the video project, so I wanted to make sure you have it for review. The link below is active for 30 days. The only installation complication I can see is possibly camera 12 at El Paseo and Prickly Pear. This is a decorative pole that has very little room for our equipment with the banner attachment present. We would also need to know if there is constant power at this pole. I'm sure someone from public works or engineering would be able to help us with that issue. If you see anything that needs adjustment or if you have any questions, reach out to me. If this all looks good, please send Jesse an email letting him know to move forward.

No worries at all about the timing. The map link is the only thing that expires, the map is maintained forever. Have a great week!

Good afternoon,

We have a camera that is experiencing issues with picture quality.

City of Jurupa Valley #43 (SB Van Buren @ Bellegrave) – Camera has a pink photograph. I recall this being a frequency issue of some sort on a previous camera with the same issue.

We also have an additional camera that is part of the new install that is not facing the correct direction.

City of Jurupa Valley #63 (EB Limonite @ Peralta) should be facing Eastbound down Limonite away from Peralta. The camera is currently facing Northwest toward the intersection and is rarely detecting a license plate.

Please call if you have any questions.

Thank you

Dear Zach,

We are reaching out to inform you of an issue regarding some of your Flock user accounts. Recently, we identified an instance where some of these accounts and associated email addresses were inadvertently shared in a document publicly. We have since taken immediate action to remove all known access to the document.

We wanted to notify you promptly of this unintentional data exposure and provide you with relevant information to address any concerns.

What Happened:

At approximately 12pm ET, November 6, 2024, we were alerted that some customer information was mistakenly shared in a way that was accessible to unintended recipients. The compromised information only consisted of: usernames, associated emails, anonymized user IDs, organization ID, and Flock system roles. No passwords, customer-owned images, recordings, or account authenticators were included in the data inadvertently leaked.

What We Are Doing:

As mentioned, as soon as we were made aware of this issue, our team took immediate action to remove all known access to the shared document.

Our team is actively reviewing our processes to understand how this happened and implementing safeguards to prevent any future occurrences. We have since implemented measures to enhance our data sharing practices and increase employee awareness on data handling.

What You Can Do:

While we have no indication of any misuse of your user account, please stay vigilant. Be cautious with unsolicited emails, especially those requesting personal information, and

avoid clicking on links or downloading attachments.

It is always best practice to ensure that your Flock admin has enabled multi-factor authentication (MFA) on your account.

We sincerely apologize for any inconvenience this may have caused. Your privacy and trust are paramount to us, and we are committed to safeguarding your information.

If you have any questions or concerns, please don't hesitate to reach out to our customer success team at [redacted].

Sincerely,

[redacted]

Implementing Single Sign On (SSO) with Azure Active Directory

May 24, 2024 . Knowledge

Question

Answer

Implementing Single Sign On (SSO) with Azure Active Directory

Flock supports Single Sign On (SSO) using Azure Active Directory as an identity provider.

About the Integration

There are several cases where managing users who use single-sign on is different. Below is a list of those differences.

The Azure AD Contact Email is your Flock Email

In Azure AD, the email you use when logging in may be different than the email in your user profile under **Contact**. The email used for login is called the 'User Principal Name'. The other email that may exist in your profile is the 'Contact Email'. This is the email that shows in the Contact section. The contact email is the one that Flock has access to when you login via SSO with Azure AD. That means that **the Contact Email from the user profile is the one that we use in your Flock account**. This also means that **it is possible for a user to login via SSO but not have a contact email set**.

If this happens, the Flock system will fail to create a Flock account and an error will be returned to the user interface. To solve the issue, the user must add an email to their Azure AD account and then try logging into Flock again.

Synchronized Profile Fields

For users who use single-sign-on to login to the Flock system, some profile information will be managed by the identity provider (for example Azure AD). Other profile fields will remain separate from the identity provider and managed by the Flock system.

Azure AD Managed Fields

- Email
- First Name

- Last Name

Flock Managed Fields

- All fields not listed in 'Identity Provider Managed Fields'.

Disabled Actions

Some actions that an administrator could normally take on a user within a Flock organization are disabled for SSO users. The following actions are disabled, and must be taken in Azure AD instead:

- Deactivate user
- Change user's organization
- Reset user password

Automatic Account Linking

When a user logs into Flock using external identity for the first time, the system will link the user's external identity with the identity of an existing user who has an identical email address. If this automatic link occurs, the new external identity will **obtain the role of the linked user** instead of the default role set on the SSO integration.

New SSO User Notifications

When a user logs into Flock using external identity for the first time, the system will complete their registration. When this registration completes successfully, user's in the organization with the AccountsManage permission will receive an email notifying them of this new registration event.

Getting Started

Creating a Client Secret

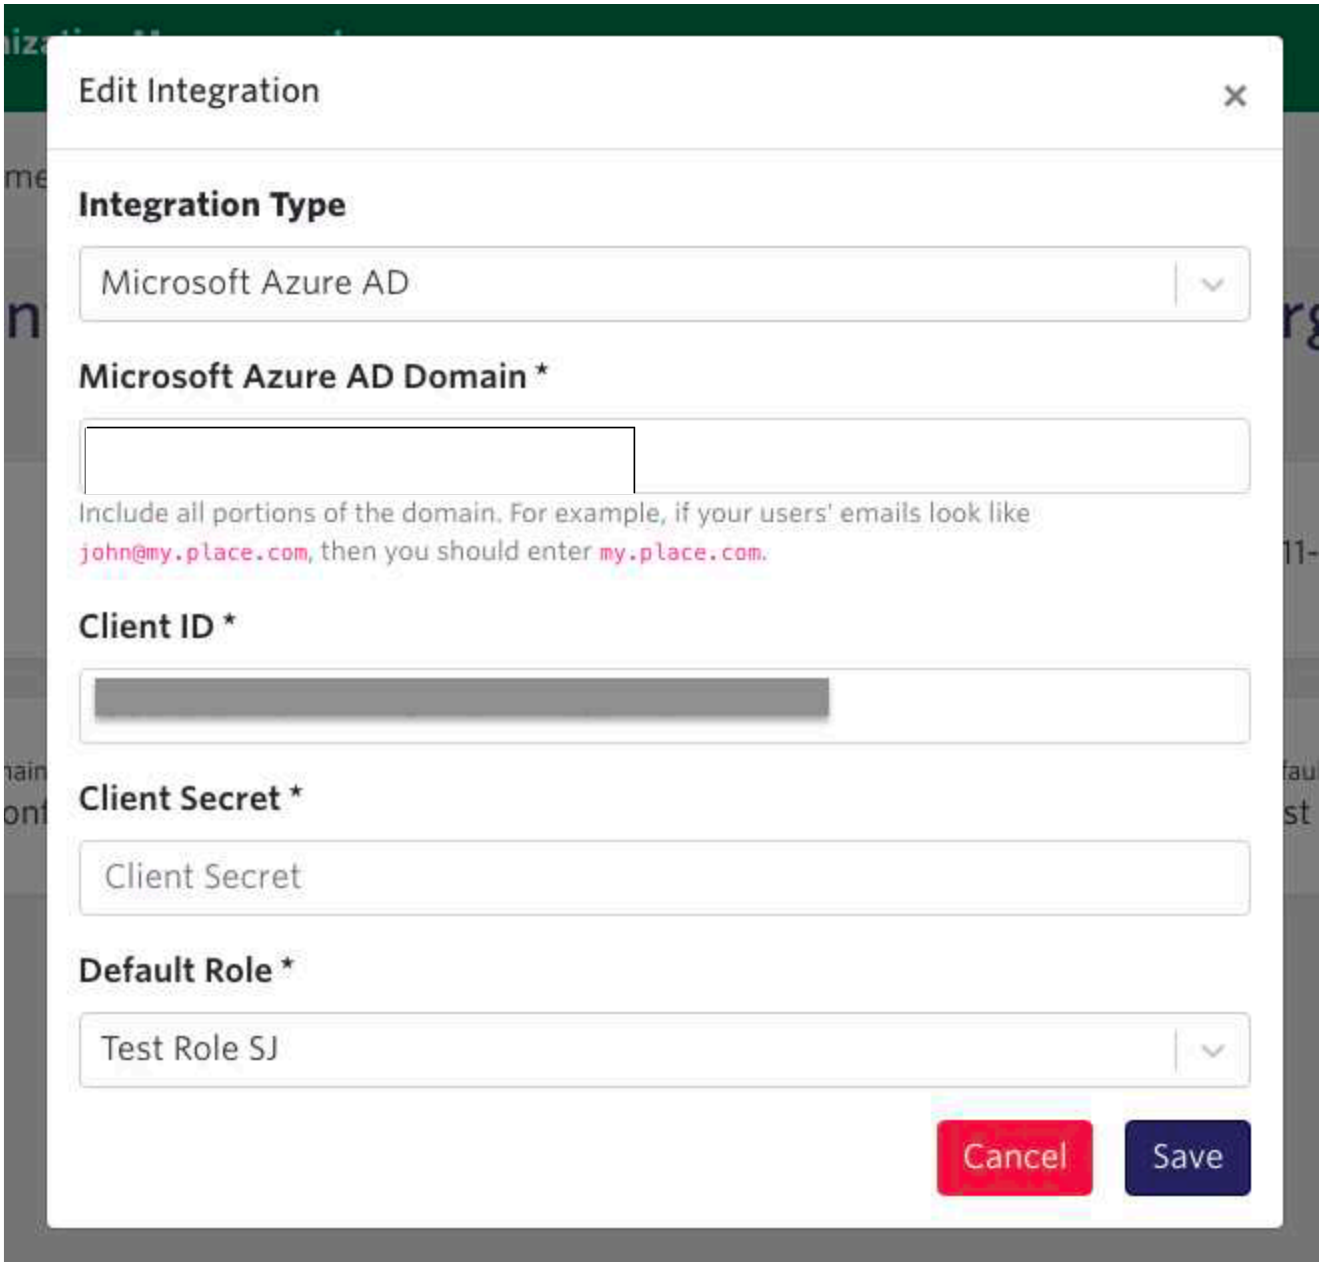

1. Log in to Azure; search for 'Azure Active Directory'
2. Choose 'App Registrations' → <select an app or create one> → Certificates & secrets
   a. Enter a description and expiry
3. Choose Add. A new secret value should appear in the list. The `Value` is the secret. Put this value somewhere safe - it will not be visible again after the page is refreshed.

Creating a Microsoft Azure AD Integration

1. Navigate to Flock User Management (http://users.flocksafety.com/integrations)
2. Select 'Add Integration' and select Microsoft Azure AD. Fill in the required values; each field of the required values are as follows:
   a. **Client ID (MSFT calls this the Application ID)**: The client ID is displayed in the Azure App Registration (App Registrations → <select an app or create one> → Overview)
   b. **Domain**: Enter the primary domain as displayed on the Azure Active Directory Overview page (Microsoft Azure (https://portal.azure.com/#blade/Microsoft_AAD_IAM/ActiveDirectoryMenuBlade/Overview))
   c. **Client Secret**: Enter the secret created in the previous section
   d. **Default Role**: This is the role all new users who sign in to Flock using your Azure Active Directory will be assigned. Once the user has signed into Flock and been given this default role, their role can be

changed in the users view. If you do not see a suitable role, you can create one in the Roles tab.

3. Save the integration.

Set the Reply-To (Redirect) URL in the Azure Application

1. After you saved the integration, search 'Azure Active Directory' in Azure
2. Choose ‘App Registrations’ → <select an app or create one> → Authentication → Add Platform → Web → Enter **https://login.flocksafety.com/login/callback** (https://login.flocksafety.com/login/callback) and then click save
3. **Important**: Do not log out of the flock portal (Flock User Management (http://users.flocksafety.com/) at this point. You *must* test to verify your integration works before logging out. Otherwise you may not be able to log back in.

Configured Permissions Required

The permissions required for the integration are:

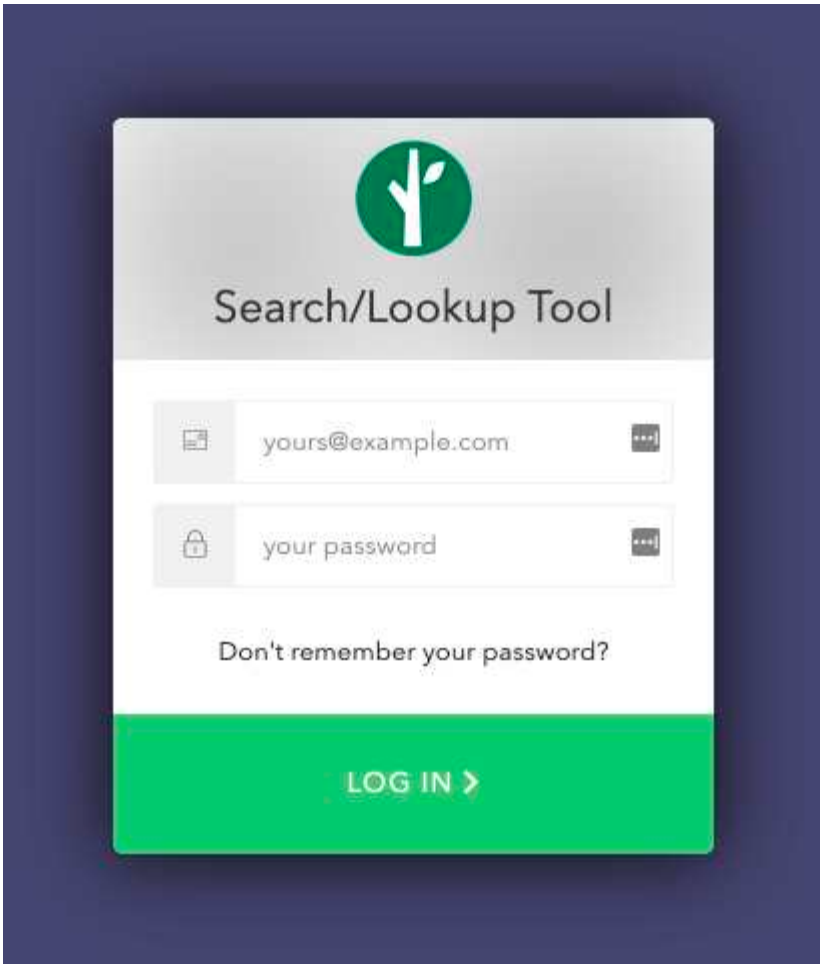

- email
- openid
- profile

API / Permissions name	Type	Description	Admin consent requ...	Status
Microsoft Graph (3)				
email	Delegated	View users' email address	No	Granted for
openid	Delegated	Sign users in	No	Granted for
profile	Delegated	View users' basic profile	No	Granted for

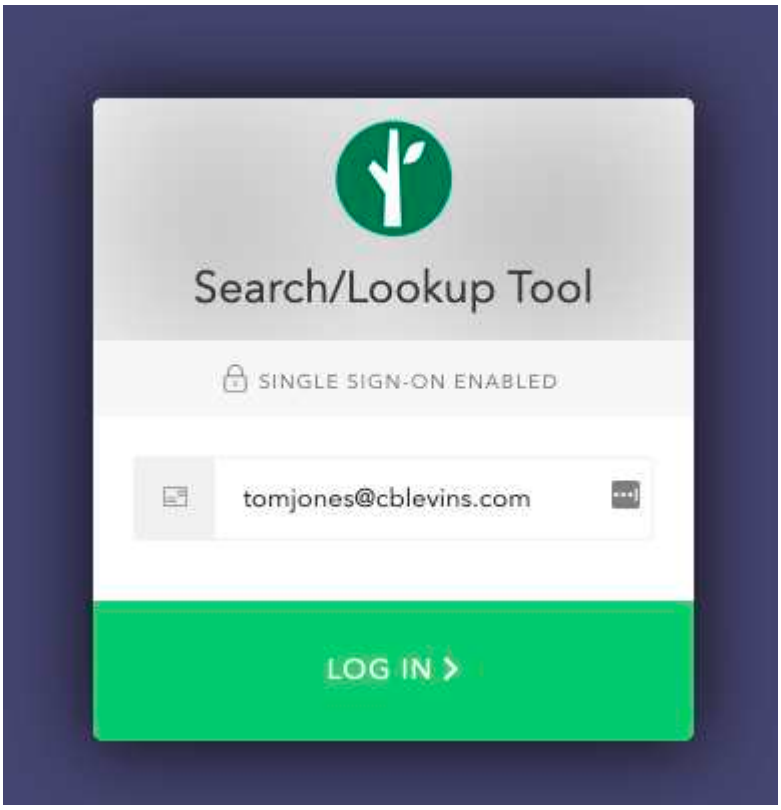

Testing your Integration

1. In your current browser, create a new test user in your Azure AD domain. This **User Name** or **Principal Name** *must* end with the `Microsoft Azure AD Domain` domain that you entered in step 2 above.

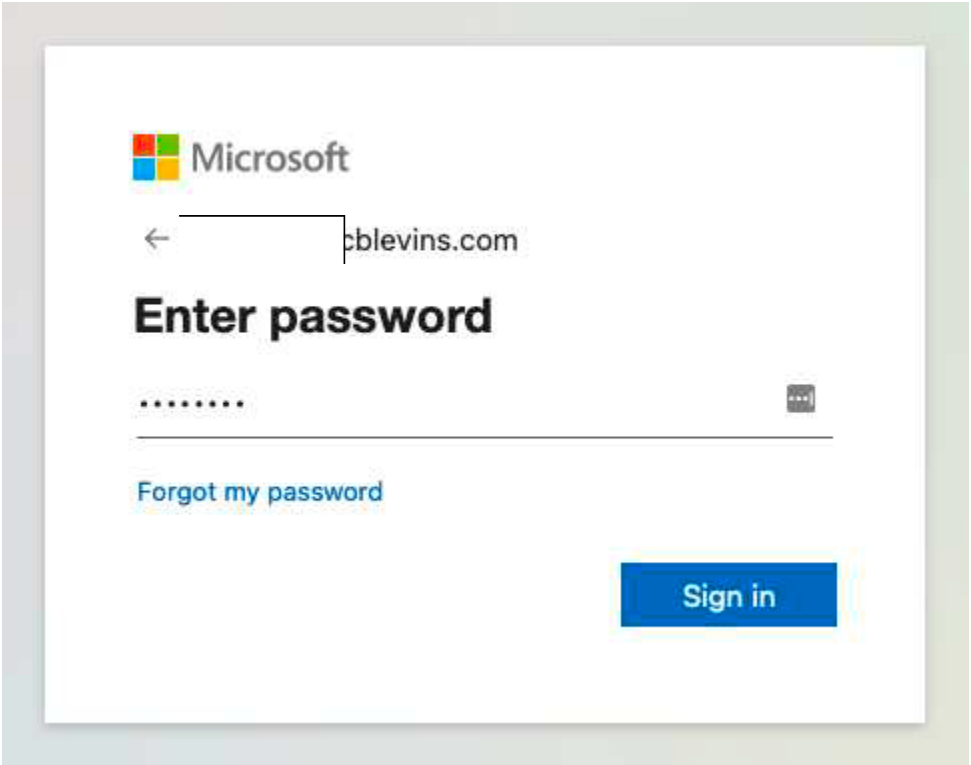

2. In this **secondary** browser, navigate to `https://flocksafety.com (https://flocksafety.com)` and click 'Sign In`. You should now see the Flock Safety login page. (Important Note: do *not* log out of Flock in your **primary** browser).

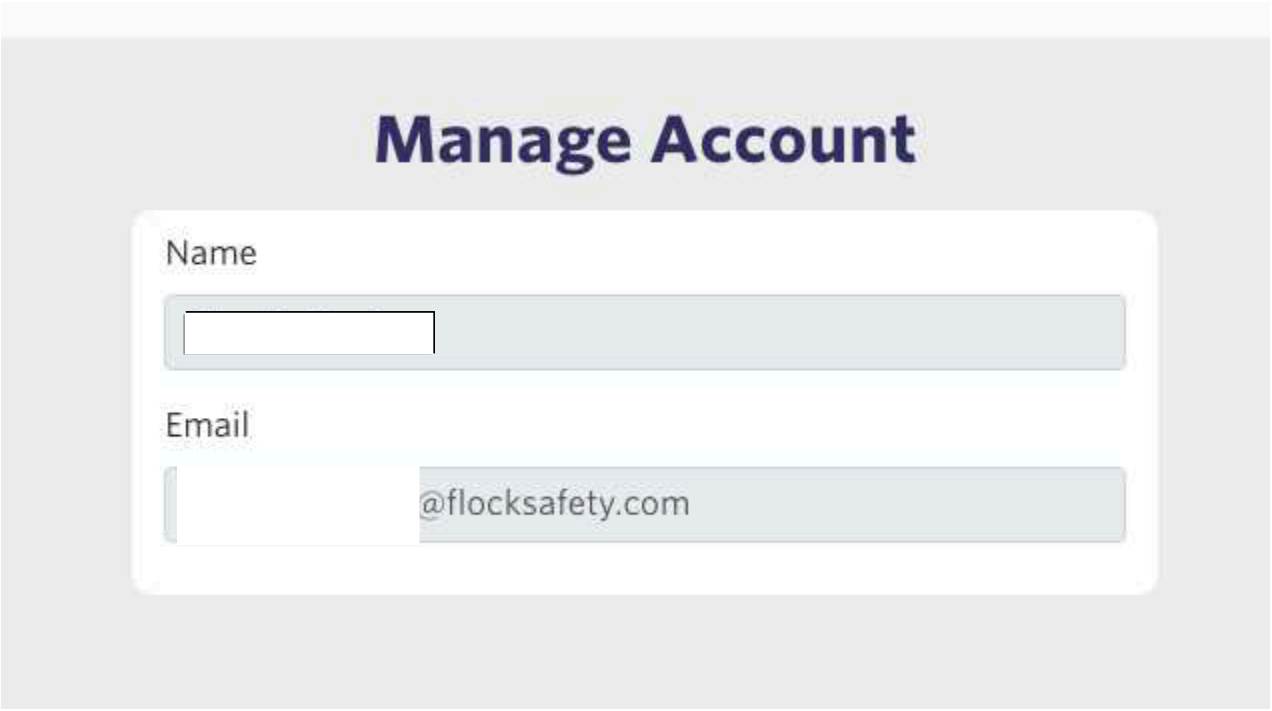

3. Enter the email of the test user you created in step 1 above. The password field should disappear and you should see `Single Sign-On Enabled`. Click 'Log In' to continue.

4. At this point, you should be re-directed to `login.microsoftonline.com (http://login.microsoftonline.com)` where you may be prompted for things like password, MFA code, or password reset (depending on your Azure settings).

5. If login is successful, you should land on the user's Flock account page

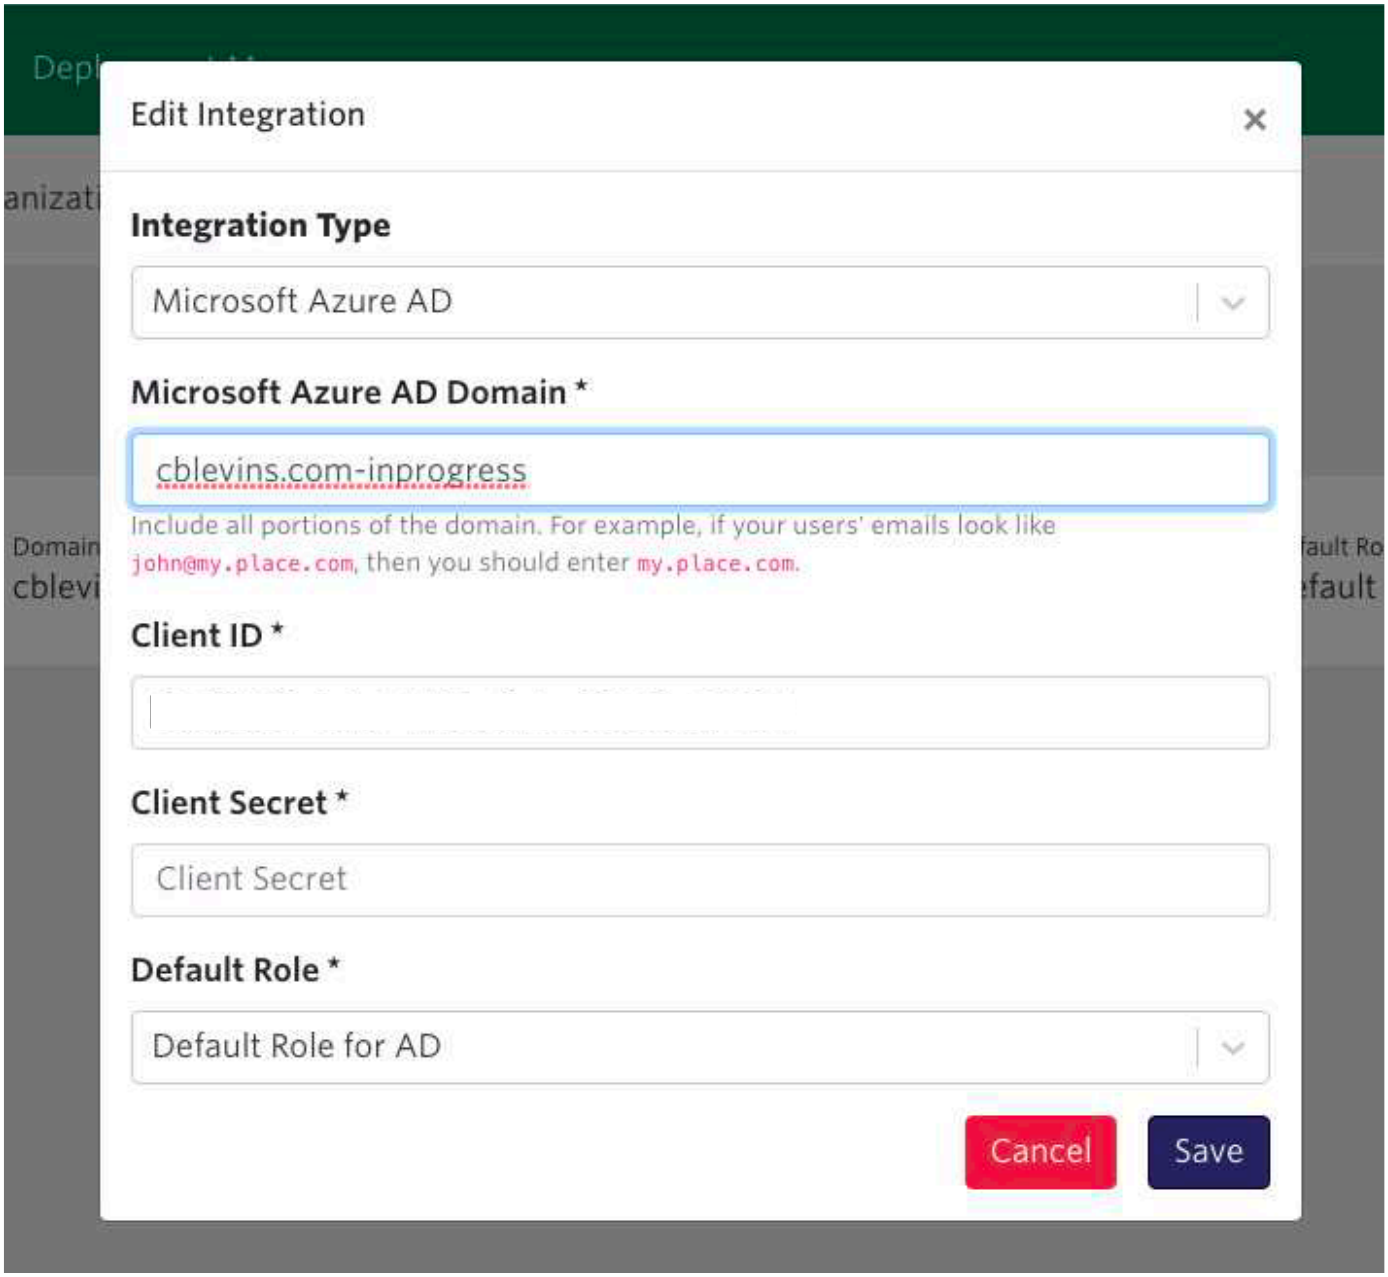

Troubleshooting

If the steps from "Testing your Integration" do not succeed we should change your integration so it does not block your existing users.

Go back to your **primary** browser and change your **domain** to something *other* than the correct one (For example, if you domain is `mypd.org (http://mypd.org)`, you could change it to `mypd.org (http://mypd.org)-inprogress)`.

With the domain changed this way, your Flock users can still be created manually and they can login with their existing accounts while we troubleshoot your integration.

Note: you will need to re-enter your Secret in this step as well. Re-entry of your secret is always required when editing this integration. Once you have made this change, please contact us so we can further assist you

Error Message Displays: Protocol Error or Missing Parameter:

If we display an error message that mentions that we detected a protocol error or a missing parameter with your organization's SSO integration.

1. This is due to an invalid Azure token, which means that it is possible the configuration described in step B.1 was copied incorrectly. It is also possible that the **Client Secret** has expired within Azure, which is how Flock retrieves an Azure token. If you've stored the **Client Secret** from Azure somewhere, you should validate that it's been entered into Flock correctly. Also validate that it is the **Secret Key** that is being used and not the **Secret ID**. An easy way to validate is that the **Secret ID** looks like a UUID (https://en.wikipedia.org/wiki/Universally_unique_identifier), while the **Secret Key** looks more random.
2. An easy way to fix this issue is to create a new **Client Secret** within Azure and re-integrate that new secret into Flock.

Please have users logging in to the SSO for the first time use the link, users.flocksafety.com (http://users.flocksafety.com/) to log in to ensure their account is created properly on the backend. If any users have any issues logging in for the first time, please reach out with their email address to [redacted] (mailto:[redacted]).

Hi there,

The technician replaced the equipment today. I'll follow up with you next week to confirm if the missing equipment has been located.

In the meantime, if you happen to find it, please let me know. I can arrange for a technician to pick it up—all I'll need is the address and a contact person for them to call.

Thank you for your help!

Stay safe,

Hi there,

[redacted] here from Flock Safety Customer Support. While responding to an alarm on camera #46, the technician noticed that the top half of the pole and equipment were

missing (see attachment). We replaced the equipment today to ensure the location was functional as soon as possible.

Do you know who removed the equipment and/or where it is located? If so, can you please provide us with the address to pick up the equipment and if there is anything we should reference/someone we should ask for upon doing so? The GPS ping from 9/9-9/11 remained unchanged and is pinging near (33.80670149, -116.94947064) with an accuracy of 45 meters.

If the equipment cannot be located or damage is discovered, we will be sending an invoice in conjunction with our reinstall fee schedule. This invoice ($800) will be emailed to [redacted] upon reinstallation. For additional information, please see Section 8.2 of our Terms and Conditions.

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology.

Stay safe,
[redacted]

Hi Martha!

During our meeting Thursday, we briefing discussed the expansion of the city's Flock camera network to include the integration of the PSCS's to provide field deputies immediate, in-car, access to city wide video. To prepare a quote, Flock needs to have a technical discussion with the PSCS's administrator to determine the best way to accomplish the integration and prepare an accurate quote. Would you mind coordinating a meeting? Jesse can work around our schedules.

Hi Deputy Chavez,

I'm copying Lt. Pierson as he is an admin and can look into all custom hotlists. Make sure you don't have the audience on your list let to alert the entire organization, even if it appears to be expired.

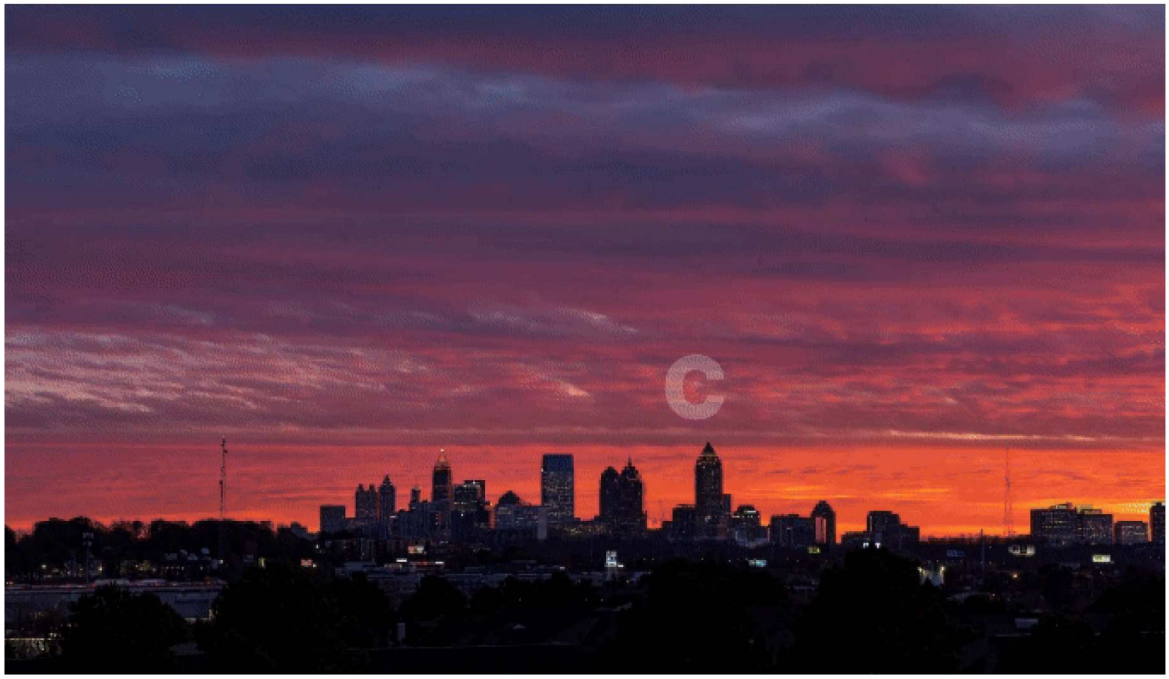

@Pierson, Victor Can you take a look in your CHL dashboard for a list under this name "Personal Custom Hotlist" and see if there is another list that belongs to someone else? You can also edit the audience of that list to not include the entire organization. Let me know if you find anything interesting that I need to look into.

Hi there,

[redacted] here from Flock Safety Customer Support. While responding to an alarm on camera #62 (Lake Matthews – County – RCSD), the technician noticed that the top half of the equipment was missing (see attachment). We will need to reinstall all of the equipment to ensure

the location is functioning properly as soon as possible. Do you know who removed the equipment and/or where it is located? If so, can you please provide us with the address to pick up the equipment and if there is anything we should reference/someone we should ask for upon doing so?

The last known GPS ping I have from the device is (33.88195275, -117.49755069) 2024-10-27 04:04:17 UTC with an accuracy of 48 meters.

If the equipment cannot be located or damage is discovered, we will be sending an invoice in conjunction with our reinstall fee schedule. This invoice ($800) will be emailed to [redacted] upon reinstallation. For additional information, please see Section 8.2 of our Terms and Conditions.

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology.

Stay safe,

<image005.jpg>

Hi there,
This is [redacted] taking over for [redacted], the integrations contact on the support team.

When a user logs in using SSO for the first time a duplicate account is created on the back end that merges with the original account for the user, updating their identity provider, and allowing them to log in through the SSO. This merge sometimes fails, leaving a duplicate on the backend. I have deleted this duplicate one more time.

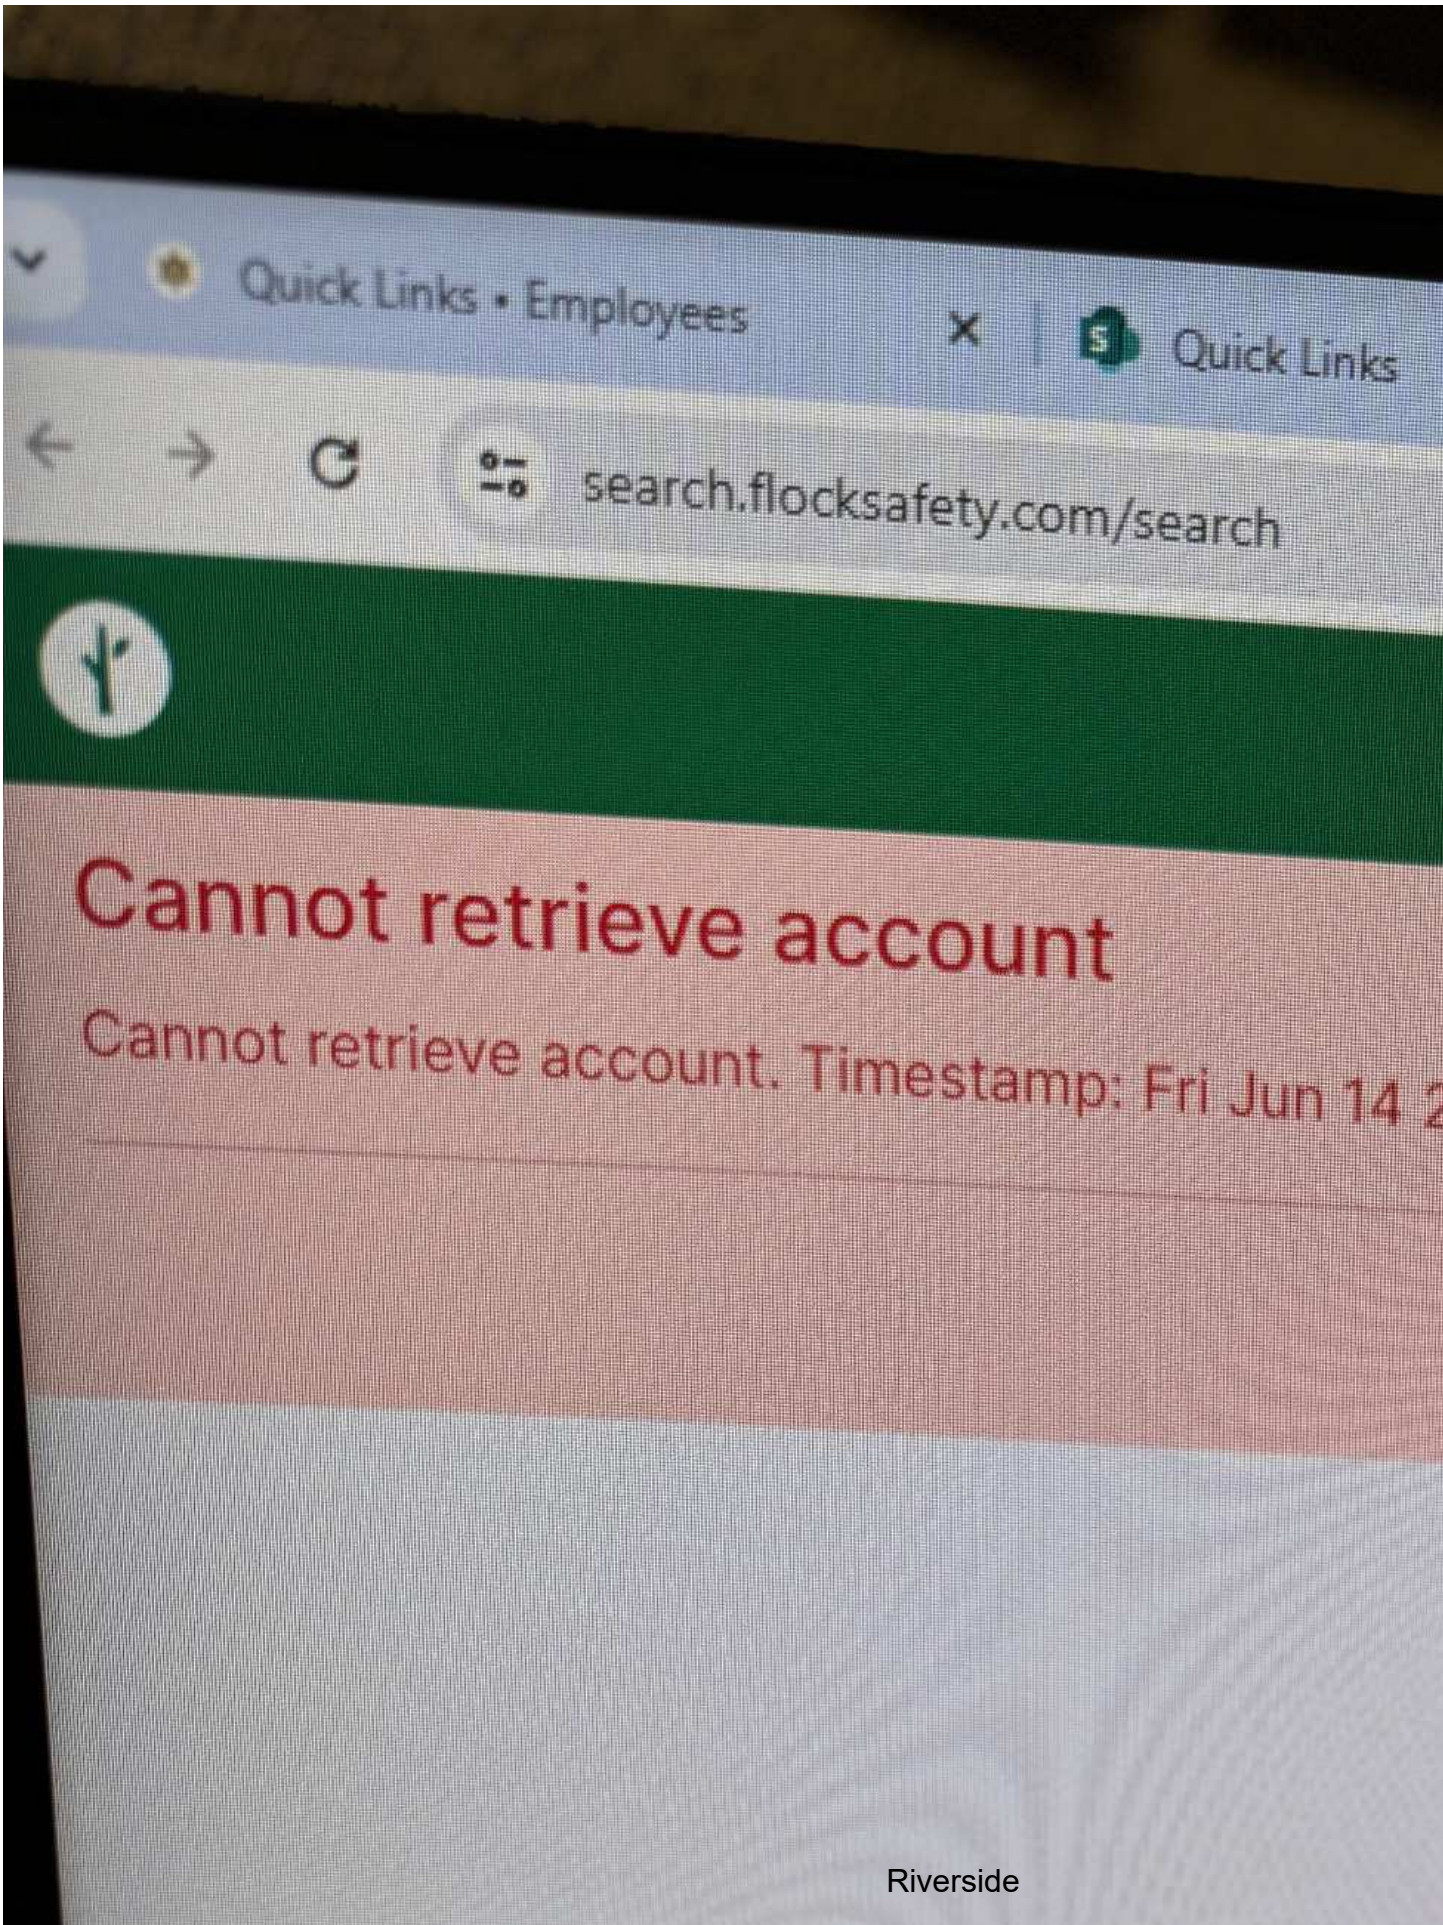

Please make sure that the user logs in using users/flocksafety.com to log in to force this merge to take place. If they try to log in through any other method, the merge will most likely fail again.

Thank you for your understanding!

Stay safe,
[redacted]

Subject: FW: Hotlist and Custom Hot List

Currently the don't have a way to configure it so that specific groups can't be added. Even if we removed Entire Organization from the option, they may still be able to grab the SIB N2 role. They'll probably never fix it for us. Right now there are over 100 custom hot lists that I would have to remove you from.

Hi there,

Thanks for reaching out! Unfortunately, as long as a role has Custom Hot List access they can be added to lists created by other users. However, as an Admin, you should be able to view Custom Hot Lists within your organization and remove users from the audience of a list is necessary.

I apologize for the inconvenience, but I will pass that to our product team for future consideration! Please let me know if you have any additional questions.

Have a nice day,
[redacted]

Subject: Hotlist and Custom Hot List

Good morning,

I am one of the administrators for our department. One of my units was requesting to be added as a separate group from our standard groups within the organization, with the hopes that their group would not receive everyone else's Custom Hot List. So what I did was create their own unique group hoping this would be the answer. However, when someone creates a

hotlist and chooses the option to share it with the Entire Organization, they are still getting those alerts.

Is there a way in the settings to specifically edit the new custom group that I created, so that they only get the alerts from their own custom hotlist?

Please call me if you have any questions. Thank you,

Hi there,

I've re-added this user to your Organization. They currently do not have a Role assigned. To assign a role, please navigate to the "Admin" tab > "Users" > "Search" and then click the three dots to the right.

If you cannot assign them a role, please let me know which role assignment you would like them to have and I can do that for you. I also sent them a password reset link. If there's anything else I can do to help, please let me know!

Subject: FW: FW: RSO Invoices INV-14277, INV-24981, INV-008132, INV-0606 Inquiry
Importance: High

Hi

We urgently need a response regarding the remaining balance of the year two charges from the initial Flock Agreement. The total cost would have been $650,000, we did process payment for INV-15222 for $75,000 of this amount (attached), but need to know when and if the remaining $575,000 will be invoiced.

Please provide an update ASAP as we are trying to project our position for the year and this $575,000 is a large amount that we need to know if it will be paid or not.

Thank you,

Hello [redacted]

Can you please assist me with the questions below?

1. Have you had a chance to review old agreement invoices INV-14277 and INV-24981? Based on the response from billing ticket BO-4024, any invoices from the old agreement should be cleared because of the new CO Term agreement. BO-4024stated, "Closing this out. I directed the rep to work with [redacted] to coterm the opps per customer agreement. Which was [redacted] and [redacted] on the new $6 Million Co Term agreement. So, any invoices open on account now from the old agreement. Should be cleared. Only the relocation and replacement invoices that are currently open should be paid." I also attached an email from [redacted].

2. Have you had a chance to review relocation invoices INV-008132 and INV-0606? We cannot pay these invoices since the camera location is not on the invoices.

3. Can you please confirm we will not be billed $650k for the old agreement year two recurring charges because of the new CO Term agreement.? Please find the attached copies of the old and new agreement.

Thank You,

Good Morning [redacted]

Just reaching out again regarding our conversation regarding the Flock Integration with the Shotover M2 camera. The CEO of Shotover reached out to me again asking for an update. Did you have someone on the integration team you could provide me contact information for so I can connect them two to start discussing this possibility and what is needed.

I know we have had discussions with Trakka, but I am not aware of any interface being completed. I'll check with my internal teams. What I'm hearing is you want Flock software to run on their cameras to check for LPR hits? Correct? Or are you simply wanting to pull the video streams into Flock so you can see the video from their cameras in Flock?

Good Afternoon[redacted]

I am reaching out to see if you can point me in the right direction of who to talk to within FLOCK regarding the below question.

I am now assigned to our Aviation unit and we are switching to the new Shotover M2 Camera and ARS Mapping System on our helicopters. The new M2 camera has LPR technology currently implemented. I was told that the new Trakka brand camera has LPR technology and they were able to implement FLOCK into the camera allowing all the license plates captured by the camera to also be cross checked with SVS/Hotlists just like a typical LPR camera does. I would like to connect someone from FLOCK and SHOTOVER to see if this is possible to be done. With how good our airborne cameras are getting, now with having LPR technology, I believe this is going to be the way of the future for Airborne Law Enforcement looking for suspects, missing people and stolen vehicles etc.

Looking forward to hearing back from you!

The transparency portal is org based and since the cities are funding streams and not operators (they have no log in to Flock), there are no metrics behind a specific network. Today, there is no solution to publicly show city network-specific metrics but I have copied Esther Rahman in to comment on whether or not this is on our roadmap. We are hearing this more and more from SO's that operate multiple contract cities, and we try to prioritize as much as possible, but as you know, sometimes foundational development is required to make what seems like the most basic of changes.

There is still the ability to report on all this information for the City of Palm Desert network via Insights if the city needs to see it regularly. I'm happy to walk through that with Lt. Porras. Here is an example of San Jose PD's portal for reference.

When we spoke last, I was under the impression that each Flock customer had its own portal. Is there anyway to do that so statistics aren't misconstrued by each city or their community?

If this isn't possible now, would it be much work to make it that way? Individual communities aren't concerned with other cities or areas so it doesn't make much sense to lump them together. if this isn't on the road map, I'd ask for it to be…

Thank you for the introduction Lt Martinez!

Lt Porras,

Let's touch base tomorrow if you have time. Our transparency portal applies to the agency and not the city network of cameras. If we activate the portal, it will reflect data for the entire Riverside County Sheriff and all city and county cameras. I'm happy to show you both how it works via zoom so we can discuss how the larger SO would like to approach.

I'm flexible after 9:30am PST.

Hi[redacted]

Hope all is well. If you weren't aware, Lt Dan Porras replaced Lt. Willison as the city Lieutenant a few days ago. I've CC'd him in this email. Dan and the City of Palm Desert are interested in building out their transparency portal. I was waiting to do it for the department until our new policy was published then give every other contract city an opportunity to work with you for their own – but this is a good opportunity to get them started and don't feel our policy changes will have much, if any, impact to the portal.

When you get a chance, can you coordinate with Dan to set it up? I'm willing and available to assist in any way possible.

Overview

Riverside County Sheriff's Office (RCSO) uses Flock Safety technology to capture objective evidence without compromising on individual privacy. ***RCSO*** utilizes retroactive search to solve crimes after they've occurred. Additionally, ***RCSO*** utilizes real time alerting of hotlist vehicles to locate and capture wanted vehicles and criminals. In an effort to ensure proper usage and communicate what guardrails are in place, they have made the below policies and usage statistics available to the public.

Policies

(This data is customizable by the agency)

- What's Detected
  - License Plates, Vehicles
- What's Not Detected
  - Facial recognition, People, Gender, Race
- Acceptable Use Policy
  - Data is used for law enforcement purposes only. Data is owned by ***Riverside County Sheriff's Office*** and is never sold to 3rd parties.
- Prohibited Uses
  - Immigration enforcement, traffic enforcement, harassment or intimidation, usage based solely on a protected class (i.e. race, sex, religion), or personal use.
- Access Policy
  - All system access requires a valid reason and is stored indefinitely. Database queries are regularly audited.
- Hotlist Policy
  - Hotlist hits are required to be human verified prior to action.

Usage

(This data is autogenerated by Flock)

- Data retention (in days)
  - This value will be automatically generated according to your Flock settings.
- Number of owned cameras
  - This value will be automatically generated according to your Flock settings.
- External organizations with access

    - This value will be automatically generated according to your Flock settings.

- Hotlists Alerted On (Hotlist Sources)
    - This value will be automatically generated according to your Flock settings.

- Vehicles detected in the last 30 days
    - This value will be automatically generated according to your Flock settings.

- Hotlist hits in the last 30 days
    - This value will be automatically generated according to your Flock settings.

- Searches in the last 30 days
    - This value will be automatically generated according to your Flock settings.

- Public Search Audit **(DO NOT ACTIVATE)**
    - Search Audit of all searches in last 30 days
      (This value will be automatically generated according to your Flock settings. Your organization search audit will be made available to the public with the fields: anonymized user id, search time, number of cameras searched, reason for search.)

AGREEMENT FOR PROFESSIONAL SERVICES
BETWEEN CITY OF PERRIS AND
FLOCK GROUP INC. dba FLOCK SAFETY

THIS AGREEMENT FOR PROFESSIONAL SERVICES ("**Agreement**") is made and entered into this 19 day of March, 2024 by and between CITY OF PERRIS, a California municipal corporation ("**City**") and FLOCK GROUP INC. dba FLOCK SAFETY, a Delaware corporation ("**Consultant**"). City and Consultant may be referred to individually as "**Party**" or collectively as "**Parties**."

RECITALS

A. Pursuant to the Perris Municipal Code, City has the authority to enter into and execute this Agreement.

B. The Parties desire to formalize the selection of Consultant for performance of those services defined and described particularly in this Agreement and desire that the terms of that performance be as particularly defined and described herein.

OPERATIVE PROVISIONS

NOW, THEREFORE, in consideration of the mutual promises and covenants made by the Parties and contained herein and other consideration, the value and adequacy of which are hereby acknowledged, the Parties agree as follows:

ARTICLE 1. SERVICES OF CONSULTANT

1.1 Scope of Services. In compliance with all terms and conditions of this Agreement, Consultant shall provide those services specified in the "Scope of Services" attached hereto as **Exhibit A** and incorporated herein by this reference, which may be referred to herein as the "**services**" or "**work**" hereunder. As a material inducement to City entering into this Agreement, Consultant represents and warrants: a) all services set forth in the Scope of Services will be performed in a competent and satisfactory manner; b) all materials used for services will be both of good quality as well as fit for the purpose intended; and, c) Consultant shall follow the highest professional standards and practices in performing the services required hereunder.

1.2 Consultant's Proposal. The Scope of Services shall include the scope of services or work included in Consultant's proposal or bid, which shall be incorporated herein by this reference as though fully set forth herein. In the event of any inconsistency between the terms of such proposal or bid, and this Agreement, the terms of this Agreement shall govern. No other terms and conditions from Consultant's proposal or bid, other than description of scope of services or work, shall apply to this Agreement, unless specifically agreed to by City in writing.

1.3 Compliance with Law. All services rendered hereunder shall be provided in accordance with all ordinances, resolutions, statutes, rules and regulations of City and any federal, State or local governmental agency having jurisdiction in effect at the time services are rendered.

Riverside

City, and its officers, employees and agents, shall not be liable at law or in equity for failure of Consultant to comply with this Section.

1.4 Licenses, Permits, Fees and Assessments. Consultant shall obtain at its sole cost and expense such licenses, permits and approvals as may be required by law for the performance of the services required by this Agreement. Consultant shall have the sole obligation to pay for any fees, assessments and taxes, plus applicable penalties and interest, which may be imposed by law and arise from or are necessary for Consultant's performance of the services required by this Agreement, and shall indemnify, defend and hold harmless City against any such fees, assessments, taxes, penalties or interest levied, assessed or imposed against City hereunder.

1.5 Additional Services and Compensation. City shall have the right at any time during the performance of the services, without invalidating this Agreement, to order extra work beyond that specified in the Scope of Services or make changes to the work by altering, adding to or deducting from said work. No such extra work may be undertaken unless a written order, consistent with both Section 9.4 as well as the Perris Municipal Code ("**PMC**"), is first given by City to Consultant, incorporating therein any adjustment in the Contract Sum for the actual costs of the extra work and/or the time to perform this Agreement, which said adjustments are subject to the written approval of Consultant. Any increase in the Contract Sum of up to ten percent (10%) of the Contract Sum or $30,000, whichever is less, may be approved by the City Manager pursuant to Section 9.4. Any greater increases, taken either separately or cumulatively, must be approved by the City Council. It is expressly understood by Consultant that the provisions of this Section shall not apply to services specifically set forth in the Scope of Services or reasonably contemplated therein. Consultant hereby acknowledges that it accepts the risk that the services to be provided pursuant to the Scope of Services may be more costly or time consuming than Consultant anticipates and that Consultant shall not be entitled to additional compensation therefor. City may in its sole and absolute discretion have similar work done by other consultants.

1.6 Familiarity with Work. By executing this Agreement, Consultant represents and warrants Consultant: a) has thoroughly investigated and considered services to be performed, b) has carefully considered how services should be performed, and c) fully understands the facilities, difficulties and restrictions attending performance of services under this Agreement.

1.7 Software and Computer Services. If the Scope of Services includes the provision and/or installation of any software, computer system, or other computer technology, Consultant represents and warrants that it is familiar with and/or has inspected City's current infrastructure, equipment, computer system and software and that the software, computer system, or other computer technology provided and/or installed by Consultant under this Agreement is compatible, and shall be fully functional, with such infrastructure, equipment, computer system and software of City. Consultant acknowledges that City is relying on this representation by Consultant as a material consideration in entering into this Agreement.

1.8 Prevailing Wages. If services include any "public work" or "maintenance work," as those terms are defined in California Labor Code section 1720 *et seq.* and California Code of Regulations, Title 8, section 16000 *et seq.*, and if the total compensation is $1,000 or more,

Consultant shall pay prevailing wages for such work and comply with the requirements in California Labor Code section 1770 *et seq.* and 1810 *et seq.*, and all other applicable laws.

1.9 Special Requirements. Additional terms and conditions of this Agreement, if any, which are made a part hereof are set forth in the "Special Requirements" attached hereto as **Exhibit B** and incorporated herein by this reference. In the event of a conflict between the provisions of Exhibit B and any other provisions of this Agreement, the provisions of Exhibit B shall govern.

ARTICLE 2. COMPENSATION AND METHOD OF PAYMENT

2.1 Contract Sum. Subject to any limitations set forth in this Agreement, City agrees to pay Consultant the amounts specified in the "Schedule of Compensation" attached hereto as **Exhibit C** and incorporated herein by this reference. The total compensation, including reimbursement for actual expenses, shall not exceed Six Hundred Fifty-Three Thousand Five Hundred Thirty Eight Dollars ($653,538.00) ("**Contract Sum**"), unless additional compensation is approved pursuant to Section 1.5. Compensation may include reimbursement, for actual and necessary expenditures, if both specified in the Schedule of Compensation, as well as approved by City in advance. The Contract Sum shall include the attendance of Consultant at all project meetings reasonably deemed necessary by City. Consultant agrees that if Consultant becomes aware of any facts, circumstances, techniques, or events that may or will materially increase or decrease the cost of the work or services, Consultant shall promptly notify the Contract Officer of said fact, circumstance, technique or event and the estimated increased or decreased cost related thereto.

2.2 Invoices. Unless some other method of payment is specified in Exhibit C, Schedule of Compensation, in any month in which Consultant wishes to receive payment, no later than the first business day of such month, Consultant shall submit to City, in a form approved by City's Finance Director, an invoice for services rendered prior to the date of the invoice. By submitting an invoice for payment under this Agreement, Consultant is certifying compliance with all provisions of this Agreement. Except as provided in Sections 7.3, 7.4 and 7.5, City shall pay Consultant for all expenses stated thereon which are approved by City pursuant to this Agreement generally within thirty (30) days, and City will use its best efforts to make payment no later than forty-five (45) days, from the submission of an invoice in an approved form. In the event any charges or expenses are disputed by City, the original invoice shall be returned by City to Consultant for correction and resubmission. Review and payment by City for any invoice provided by Consultant shall not constitute a waiver of any rights or remedies provided herein or any applicable law. Each invoice is to include (unless otherwise specified by City): 1) line items for all personnel describing the work performed, the number of hours worked, and the hourly rate; 2) line items for all materials and equipment properly charged to the Services; 3) line items for all other approved reimbursable expenses claimed, with supporting documentation; and 4) line items for all approved subcontractor labor, supplies, equipment, materials, and travel properly charged to the Services.

ARTICLE 3. PERFORMANCE SCHEDULE

3.1 Time of Essence. Time is of the essence in the performance of this Agreement.

3.2 Term. Unless earlier terminated in accordance with Article 7 of this Agreement,

this Agreement shall continue in full force and effect until completion of the services, which shall be no later than June 30, 2026 ("**Term**").

3.3 Schedule of Performance. Consultant shall commence the services pursuant to this Agreement upon receipt of a written notice to proceed and shall perform all services within the time period(s) established in the "Schedule of Performance" attached hereto as **Exhibit D** and incorporated herein by this reference. Such time period(s) may be increased by the Contract Officer, provided that such increases shall not serve to extend the Term.

3.4 Force Majeure. The time period(s) specified in the Schedule of Performance for performance of the services rendered pursuant to this Agreement shall be extended because of any delays due to unforeseeable causes beyond the control and without the fault or negligence of Consultant, including, but not restricted to, acts of God or of the public enemy, unusually severe weather, fires, earthquakes, floods, epidemics, quarantine restrictions, riots, strikes, freight embargoes, wars, litigation, and/or acts of any governmental agency, including City, if Consultant shall within ten (10) days of the commencement of such delay notify City in writing of the causes of the delay. City shall ascertain the facts and the extent of delay, and extend the time for performing the services for the period of the enforced delay when and if in the judgment of City such delay is justified. City's determination shall be final and conclusive upon the Parties to this Agreement. In no event shall Consultant be entitled to recover damages against City for any delay in the performance of this Agreement, however caused, Consultant's sole remedy being extension of this Agreement pursuant to this Section.

ARTICLE 4. COORDINATION OF WORK

4.1 Representative of Consultant. The representative of Consultant is Jesse Mund, Major Accounts Manager, who is authorized to act on Consultant's behalf with respect to the work or services specified herein and to make all decisions in connection therewith. It is expressly understood that the experience, knowledge, capability and reputation of the representative was a substantial inducement for City to enter into this Agreement. Therefore, the representative shall be responsible during the term of this Agreement for directing all activities of Consultant and devoting sufficient time to personally supervise the services hereunder. For purposes of this Agreement, the representative may not be replaced nor may their responsibilities be substantially reduced by Consultant without the express written approval of City.

4.2 Contract Officer for City. The Contract Officer for City is Ernie Reyna, Deputy City Manager (or such person as may be designated by the City Manager). The Contract Officer shall be the primary person on behalf of City responsible for the administration of the Agreement. It shall be Consultant's responsibility to assure that the Contract Officer is kept informed of both the progress of the performance of the services as well as any decisions which must be made by City.

4.3 Approvals from City. City approvals or actions, pursuant to the authority of this Agreement, are to be made (unless otherwise specified) either by the City Manager or by their delegate as provided for in writing.

4.4 Independent Contractor. Neither City, nor any of its officers, employees or agents, shall have any control over the manner or means by which Consultant, or its officers,

Riverside

employees, agents or subcontractors, perform the services required herein, except as otherwise set forth herein. Consultant shall perform all services required herein as an independent contractor of City and shall remain under only such obligations as are consistent with that role. Consultant shall not at any time or in any manner represent that it, or any of its officers, employees, agents or subcontractors, are officers, employees or agents of City. City shall not in any way or for any purpose become or be deemed to be a partner of Consultant in its business or otherwise or a joint venturer or a member of any joint enterprise with Consultant. Consultant shall not incur or have the power to incur any debt, obligation or liability whatever against City, or bind City in any manner. Consultant represents and warrants that the personnel used to provide services to City pursuant to this Agreement shall at all times be under Consultant's exclusive control and direction. No City employee benefits shall be available to Consultant, its officers, employees, agents or subcontractors, in connection with the performance of this Agreement. City shall not be liable for compensation or indemnification to Consultant, its officers, employees, agents or subcontractors, for injury or sickness arising out of performing services hereunder. In the event that Consultant or any officer, employee, agent, or subcontractor of Consultant providing services under this Agreement claims or is determined by a federal or state agency, a court of competent jurisdiction, or the California Public Employees' Retirement System, to be classified as other than an independent contractor for City, then Consultant shall indemnify, defend, and hold harmless City for the payment of any and all assessed fines, penalties, judgments, employee and/or employer contributions, and any other damages and costs assessed to City as a consequence of, or in any way attributable to, the assertion that Consultant, or any officer, employee, agent, or subcontractor Consultant used to provide services under this Agreement, is/are employees of City.

4.5 Subcontracting or Assignment. The experience, knowledge, capability and reputation of Consultant, its principals and employees were a substantial inducement for City to enter into this Agreement. Therefore, without express written approval of City, Consultant shall not contract with any other entity to perform in whole or in part services required hereunder without express written approval of City, and neither this Agreement nor any interest herein may be transferred or assigned. No approved transfer shall release Consultant, or any surety or insured of Consultant, of any liability hereunder without express written consent of City.

ARTICLE 5. INSURANCE AND INDEMNIFICATION

5.1 Insurance Coverages. Prior to commencement of any services under this Agreement, and without limiting Consultant's indemnification obligation to City, Consultant shall procure and maintain, at its sole cost and expense, in a form and content satisfactory to City, for the duration of the Agreement, primary policies of insurance of the type and amounts below, issued by an insurance company currently authorized by the Insurance Commissioner to transact business of insurance or is on the List of Approved Surplus Line Insurers in the State of California, with an assigned policyholders' Rating of A- (or higher) and Financial Size Category Class VII (or larger) in accordance with the latest edition of Best's Key Rating Guide, unless otherwise approved by City, which shall cover all elected and appointed officers, employees and agents of City. City reserves the right at any time during the term of the Agreement to change the amounts and types of insurance required by giving Consultant ninety (90) days advance written notice of such change. If such change results in substantial additional cost to Consultant, City and Consultant may renegotiate Consultant's compensation.

(a) Commercial General Liability Insurance. A policy of commercial general liability insurance, with coverage at least as broad as Insurance Services Office ("**ISO**") form CG 00 01, written on a per occurrence basis for bodily injury, personal injury and property damage. Defense costs must be paid in addition to limits. Coverage for an additional insured shall not be limited to its vicarious liability. The policy must include contractual liability that has not been amended. Any endorsement restricting standard ISO "insured contract" language will not be accepted. Limits shall be no less than $1,000,000 per occurrence for all covered losses and no less than $2,000,000 general aggregate.

(b) Worker's Compensation Insurance. A policy of worker's compensation insurance in such amount as will fully comply with the laws of the State of California and which shall indemnify, insure and provide legal defense for Consultant against any loss, claim or damage arising from any injuries or occupational diseases occurring to any worker employed by or any persons retained by Consultant in the course of carrying out the work or services contemplated in this Agreement.

(c) Automobile Liability. A policy of comprehensive automobile liability insurance, at least as broad as ISO form CA 00 01, written on a per occurrence basis covering bodily injury and property damage in an amount not less than $1,000,000 combined single limit for each accident. Said policy shall include coverage for owned, non-owned, leased, hired cars and any automobile.

(d) Professional Liability. Professional liability insurance appropriate to Consultant's profession. This coverage may be written on a "claims made" basis and must include coverage for contractual liability. Any policy inception date, continuity date, or retroactive date must be before the effective date of this Agreement. The professional liability insurance required by this Agreement must be endorsed to be applicable to claims based upon, arising out of, or related to services performed under this Agreement. The insurance must be maintained for at least five (5) consecutive years following the completion of Consultant's services or the termination of this Agreement. During this additional 5-year period, Consultant shall annually and upon request of City submit written evidence of this continuous coverage. Limits shall be no less than $1,000,000 per claim and no less than $1,000,000 general aggregate.

(e) Cyber Liability. Cyber liability insurance appropriate to Consultant's profession and the services hereunder, written on a per occurrence basis, with limits not less than $1,000,000 per occurrence/loss, and $2,000,000 in the aggregate. Coverage shall be sufficiently broad to respond to the duties and obligations undertaken by Consultant pursuant to this Agreement and shall include, but not be limited to, claims involving: infringement of intellectual property; copyright; trademark; invasion of privacy violations; data breach; electronic information theft, loss, damage, destruction, alteration or misuse; release of private information; extortion; and, network security. The policy shall provide coverage for breach response costs, regulatory fines and penalties, and credit monitoring expenses, with limits sufficient to respond to these obligations.

(f) Excess Liability Insurance. Excess liability insurance may be used to satisfy the obligations herein. If excess liability insurance is used then the policy shall meet all the requirements herein and be at least as broad as the primary coverages set forth herein. Such policy shall: 1) include a drop down feature requiring the policy to respond if primary insurance that

would otherwise have applied proves to be uncollectible in whole or in part for any reason; 2) be payable on behalf of wording as opposed to reimbursement; 3) have concurrency of effective dates with primary policies; 4) "follow form" to the underlying primary policies; and, 5) provide insureds, under primary policies required herein, shall be insureds under the excess liability policy.

(g) Subcontractors. In the event Consultant subcontracts any portion of the work in compliance with Section 4.5 of this Agreement, Consultant shall either: 1) include each subcontractor as insureds under its policies of insurance required herein; or, 2) Consultant shall furnish to City all documentation, required in Article 5 for Consultant, for each subcontractor. All coverages for subcontractors shall include all of the requirements stated herein.

5.2 General Insurance Requirements.

(a) Proof of Insurance, Enforcement and Notice. No work or services under this Agreement shall commence until both Consultant has provided City with insurance certificates, endorsement forms and appropriate insurance binders evidencing the above insurance coverages, as well as said documentation is approved by City. City reserves the right to inspect complete, certified copies of, and endorsements to, all required insurance policies, at any time. Any failure to comply with the reporting or other provisions of the policies including breaches or warranties shall not affect coverage provided to City. In the event any insurance policy required under this Agreement is cancelled or amended (and the insurance policy is not replaced pursuant to subsection (b) below), or does not comply with Article 5, then: 1) City has the right but not the duty to obtain insurance required herein and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments; or, 2) City, notwithstanding any other provisions of this Agreement, may immediately terminate this Agreement. Consultant shall give City prompt and timely notice of claims made or suits instituted that arise out of or result from Consultant's performance under this Agreement, and that involve or may involve coverage under any of the required insurance policies.

(b) Cancellation/Amendment. All of herein required policies of insurance shall provide the insurance may not be amended or cancelled by insurer or any Party hereto without providing thirty (30) calendar days prior written notice (with exception of ten (10) calendar days prior written notice for nonpayment) to City. In the event any of said policies of insurance are amended or cancelled, Consultant shall, five (5) business days prior to the cancellation date, submit new evidence of insurance in conformance with this Agreement to City.

(c) Additional Insureds. The commercial general liability policy provided for in Section 5.1(a) and the automobile liability policy provided for in Section 5.1(c) both shall name City and its elected and appointed officers, employees and agents ("**City Parties**") as additional insureds and such coverage shall contain no special limitations on the scope of protection afforded to City and City Parties. A severability of interests provision must apply for all additional insureds ensuring that Consultant's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability, and policies of insurance shall not contain any cross-liability exclusions.

(d) Primary, Subrogation, Contribution and Coverage. All of the above policies of insurance shall be primary insurance. The insurers for the above policies, Consultant and any subcontractors are all deemed hereof to waive all rights of subrogation and contribution

they may have against City or City Parties, and their respective insurers, and all insurance policies required herein shall be endorsed to waive such rights. Any insurance maintained by City or City Parties will apply in excess of, and not contribute with, Consultant's insurance. If Consultant maintains broader coverage and/or higher limits than the minimum amounts provided herein, City requires and shall be entitled to the broader coverage and/or higher limits maintained by Consultant. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to City and City Parties. None of the coverages required herein will be in compliance with this Agreement if they include any limiting endorsement of any kind that has not been first submitted to City and approved of in writing. Requirements of specific coverage features or limits contained herein are not intended as a limitation on coverage, limits or other requirements, or a waiver of any coverage normally provided by any insurance. Specific reference to a given coverage feature is for purposes of clarification only as it pertains to a given issue and is not intended by any Party or insured to be all inclusive, or to the exclusion of other coverage, or a waiver of any type.

(e) Limitations, Self- Insured Retention and Deductibles. Consultant agrees that requirements of Article 5 shall not be construed as limiting in any way the extent to which Consultant may be held responsible for the payment of damages to any persons or property resulting from Consultant's activities or the activities of any person or persons for which Consultant is otherwise responsible nor shall it limit Consultant's indemnification liabilities as provided in Section 5.3. All insurance policies must specify that where the primary insured does not satisfy any self-insured retention, any additional insured may satisfy the self-insured retention. Any deductibles or self-insured retentions must be declared to and approved by City. At City's option, either the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects City and City Parties, or Consultant shall procure a bond guaranteeing payment of losses and related investigations, claim administration, attorneys' fees, defense expenses and claims.

5.3 Indemnification.

(a) General Obligations. Consultant agrees, to the full extent permitted by law, to indemnify, defend and hold harmless City and its elected and appointed officers, employees and agents (each an "**Indemnitee**" and collectively, "**Indemnitees**") against, and will hold and save them and each of them harmless from, whether actual or threatened, any and all actions, either judicial, administrative, arbitration or regulatory claims, damages to persons or property, losses, costs, penalties, obligations, errors, omissions or liabilities (herein "**Claims or Liabilities**") that may be asserted or claimed by any person, firm or entity arising out of or in connection with the negligent performance of the work, operations or activities provided herein of Consultant, its officers, employees, agents, subcontractors, or invitees, or any individual or entity for which Consultant is legally liable (each an "**Indemnitor**" and collectively, "**Indemnitors**"), or arising from Indemnitors' reckless or willful misconduct, or arising from Indemnitors' negligent performance of or failure to perform any term, provision, covenant or condition of this Agreement, and in connection therewith: 1) Consultant will defend any action or actions filed or threatened in connection with any such Claims or Liabilities, or at option of Indemnitee(s) will reimburse and pay for all costs and expenses, including legal costs and attorneys' fees, incurred by Indemnitee(s) in connection therewith; and, 2) Consultant will promptly pay any judgment rendered against Indemnitee(s) for any such Claims or Liabilities, and will save and hold Indemnitee(s) harmless therefrom.

Riverside

(b) **Further Provisions.** The indemnity obligation herein shall be binding on successors, assigns and heirs of Consultant and shall survive termination of this Agreement. Consultant shall incorporate similar indemnity agreements as provided herein with its subcontractors, and if Consultant fails to do so Consultant shall be fully responsible to indemnify City hereunder therefor. Failure of City and/or City Parties (collectively "City" for solely this Section 5.3(b)) to monitor compliance with any of the indemnification provisions herein shall not be a waiver hereof. The indemnification provisions herein do not apply to claims or liabilities occurring as a result of City's sole negligence or willful misconduct, but, to the fullest extent permitted by law, shall apply to claims and liabilities resulting in part from City's negligence, except that design professionals' indemnity hereunder shall be limited to claims and liabilities arising out of the negligence, recklessness or willful misconduct of the design professional. The indemnification provided herein includes Claims or Liabilities arising from any negligent or wrongful act, error or omission, or reckless or willful misconduct of Indemnitors in the performance of professional services hereunder. Payment of invoices by City is not a condition precedent to enforcement of the indemnity obligation herein. In the event of any dispute between Consultant and City, as to whether liability arises from the sole negligence or willful misconduct of City, Consultant will be obligated to pay for City's defense until such time as a final judgment has been entered adjudicating City as solely negligent or responsible for willful misconduct. Consultant will not be entitled in the absence of such a determination to any reimbursement of defense costs including but not limited to attorneys' fees, expert fees and costs of litigation.

(c) **Professional Liability.** When the law establishes a professional standard of care for Consultant's services, to the fullest extent permitted by law, Consultant shall indemnify, defend and hold harmless Indemnitees against, and will hold and save them and each of them harmless from, whether actual or threatened, any and all Claims and Liabilities, consistent with all obligations provided for in this Section 5.3, to the extent same are caused in whole or in part by any negligent or wrongful act, error or omission, or reckless or willful misconduct of Indemnitors in the performance of professional services under this Agreement.

ARTICLE 6. RECORDS, REPORTS AND RELEASE OF INFORMATION

6.1 Records. Consultant shall keep, and require subcontractors to keep, such ledgers, books of accounts, invoices, vouchers, canceled checks, reports, studies or other documents relating to the disbursements charged to City and services performed hereunder ("**books and records**") as shall be necessary to perform the services required by this Agreement and enable City to evaluate the performance of such services. Any and all such books and records shall be maintained in accordance with generally accepted accounting principles, shall be complete and detailed, and shall be readily accessible. City shall have full and free access to such books and records at all times during normal business hours of City, including the right to inspect, copy, audit and make records and transcripts. Such books and records shall be maintained for a period of three (3) years following completion of the services hereunder. City shall have access to such books and records in the event any audit is required. Consultant shall fully cooperate with City in providing access to any and all Consultant records and documents if a public records request is made and disclosure is required by law including but not limited to the California Public Records Act.

6.2 Ownership of Documents. All drawings, specifications, maps, designs, photographs, studies, surveys, data, notes, computer files, reports, records, documents and other

materials ("**documents and materials**") prepared by Consultant, its officers, employees, agents and subcontractors in the performance of this Agreement shall be the property of City and shall be delivered to City upon request of City and/or upon the termination of this Agreement, and Consultant shall have no claim for further employment or additional compensation as a result of the exercise by City of its full rights of ownership, use, reuse, or assignment of the documents and materials hereunder. Consultant may retain copies of such documents and materials for its own use. Consultant shall have the right to use the concepts embodied therein. All subcontractors shall provide for assignment to City of any documents and materials prepared by them, and in the event Consultant fails to secure such assignment, Consultant shall indemnify City for all damages resulting therefrom. Moreover, with respect to any Consultant documents and materials that may qualify as "works made for hire" as defined in 17 U.S.C. § 101, such documents and materials are hereby deemed "works made for hire" for City.

6.3 Confidentiality and Release of Information. All information gained or work product produced by Consultant in its performance of this Agreement shall be considered confidential, unless such information is in the public domain or already known to Consultant. Consultant shall not release or disclose any such information or work product to persons or entities other than City without prior written authorization from City. Consultant, its officers, employees, agents or subcontractors, shall not, without prior written authorization from City or unless requested by the City Attorney, voluntarily provide documents, declarations, letters of support, testimony at depositions, response to interrogatories or other information concerning the work performed under this Agreement. Response to a subpoena or court order shall not be considered "voluntary" provided Consultant immediately gives City notice of such court order or subpoena. If Consultant, or any officer, employee, agent or subcontractor of Consultant, provides any information or work product in violation of this Agreement, then City shall have the right to reimbursement and indemnity from Consultant for any damages, costs and fees, including attorneys' fees, caused by or incurred as a result of Consultant's conduct. As concerning, regarding or related to, in any way, this Agreement and the work performed thereunder: a) Consultant shall immediately notify City should Consultant, its officers, employees, agents or subcontractors be served with any summons, complaint, subpoena, notice of deposition, request for documents, interrogatories, request for admissions or other discovery request, court order or subpoena from any party; b) City retains the right, but has no obligation, to represent Consultant or be present at any deposition, hearing or similar proceeding; and, c) Consultant agrees to cooperate fully with City and to provide City with the opportunity to review any response to discovery requests provided by Consultant, however, this right to review any such response does not imply or mean the right by City to control, direct, or rewrite said response.

ARTICLE 7. ENFORCEMENT OF AGREEMENT AND TERMINATION

7.1 California Law. This Agreement shall be interpreted, construed and governed both as to validity and to performance of the Parties in accordance with the laws of the State of California. Legal actions concerning any dispute, claim or matter arising out of or in relation to this Agreement shall be instituted in the Superior Court of the County of Riverside, State of California, or any other appropriate court in such county, and Consultant agrees to submit to the personal jurisdiction of such court in the event of such action. In the event of litigation in a U.S. District Court, venue shall lie exclusively in the Central District of California, in the County of Riverside, State of California.

7.2 Suspension, or Termination, Prior to Expiration of Term. This Section shall govern any termination of this Agreement except as specifically provided in Section 7.4 for termination for cause. City reserves the right to terminate or suspend this Agreement, or any portion hereof, at any time, for any reason, with or without cause, upon ten (10) days' notice to Consultant, except that where termination or suspension is due to the fault of Consultant, the period of notice may be such shorter time as determined by City. Upon receipt of any notice of termination or suspension, Consultant shall immediately cease all services hereunder, unless the notice provides otherwise, or except such as specifically approved by City. Upon submittal of an invoice consistent with Section 2.2, Consultant shall be entitled to compensation for all services rendered prior to the effective date of the notice of termination or suspension and for any services authorized by City thereafter in accordance with the Schedule of Compensation, or such as may be approved by City, except as provided in Section 7.5. In event of termination, or suspension, without cause pursuant to this Section, there is no need to provide opportunity to cure pursuant to Section 7.3.

7.3 Default of Consultant and Opportunity to Cure. In the event that Consultant is in default under the terms of this Agreement, City shall not have any obligation or duty to continue compensating Consultant for any work performed after the date of default. Instead, City may give notice to Consultant of the default and the reasons for the default. The notice shall include the timeframe in which Consultant may cure the default. This timeframe is presumptively ten (10) days, but may be extended, or reduced, if circumstances warrant, as determined by City. During the period of time that Consultant is in default, City shall hold all invoices and shall, when the default is cured, proceed with payment on the invoices, without liability for interest. In the alternative, City may, in its sole discretion, elect to pay some or all of the outstanding invoices during the period of default. If Consultant does not cure the default by conclusion of noticed timeframe, City may immediately both terminate this Agreement with notice to Consultant as well as pursue the remedy in Section 7.4, without prejudice to any other remedy to which City may be entitled at law, in equity or under this Agreement. Any failure on the part of City to give notice of Consultant's default shall not be deemed to result in a waiver of City's legal rights or any rights arising out of any provision of this Agreement.

7.4 Termination for Default of Consultant. If termination is due to the failure of Consultant to fulfill its obligations under this Agreement, City may, after compliance with the provisions of Section 7.3, take over the work and prosecute the same to completion by contract or otherwise, and Consultant shall be liable to the extent that the total cost for completion of the services required hereunder exceeds the compensation herein stipulated (provided that City shall use reasonable efforts to mitigate such damages), and City may withhold any payments to Consultant for the purpose of set-off or partial payment of the amounts owed to City as previously stated.

7.5 Retention of Funds. Consultant hereby authorizes City to deduct from any amount payable to Consultant (whether or not arising out of this Agreement) (i) any amounts the payment of which may be in dispute hereunder or which are necessary to compensate City for any losses, costs, liabilities, or damages suffered by City, and (ii) all amounts for which City may be liable to third parties, by reason of Consultant's acts or omissions in performing or failing to perform Consultant's obligation under this Agreement. In the event that any claim is made by a third party, the amount or validity of which is disputed by Consultant, or any indebtedness shall exist which shall appear to be the basis for a claim of lien, City may withhold from any payment due, without

liability for interest because of such withholding, an amount sufficient to cover such claim. The failure of City to exercise such right to deduct or to withhold shall not, however, affect the obligations of Consultant to insure, indemnify, and protect City as elsewhere provided herein.

7.6 Waiver. Waiver by any Party to this Agreement of any term, condition, or covenant of this Agreement shall not constitute a waiver of any other term, condition, or covenant. Waiver by any Party of any breach of the provisions of this Agreement shall not constitute a waiver of any other provision or a waiver of any subsequent breach or violation of any provision of this Agreement. Acceptance by City of any work or services by Consultant shall not constitute a waiver of any of the provisions of this Agreement. No delay or omission in the exercise of any right or remedy by a non-defaulting Party on any default shall impair such right or remedy or be construed as a waiver. Any waiver by either Party of any default must be in writing and shall not be a waiver of any other default concerning the same or any other provision of this Agreement. Consultant acknowledges and agrees that any actual or alleged failure on the part of City to inform Consultant of non-compliance with any requirement of this Agreement imposes no additional obligations on City nor does it waive any rights hereunder. Payment to Consultant for work performed pursuant to this Agreement shall not be deemed to waive any defects in work performed by Consultant.

7.7 Rights and Remedies are Cumulative. Except with respect to rights and remedies expressly declared to be exclusive in this Agreement, the rights and remedies of the Parties are cumulative and the exercise by either Party of one or more of such rights or remedies shall not preclude the exercise by it, at the same or different times, of any other rights or remedies for the same default or any other default by the other Party.

7.8 Legal Action. In addition to any other rights or remedies, either Party may take legal action, in law or in equity, to cure, correct or remedy any default, to recover damages for any default, to compel specific performance of this Agreement, to obtain declaratory or injunctive relief, or to obtain any other remedy consistent with the purposes of this Agreement. Notwithstanding any contrary provision herein, Consultant shall file a statutory claim pursuant to Government Code sections 905 *et seq*. and 910 *et seq*., in order to pursue a legal action under this Agreement.

7.9 Attorneys' Fees. If either Party to this Agreement is required to initiate or defend or made a party to any action or proceeding in any way connected with this Agreement, the prevailing party in such action or proceeding, in addition to any other relief which may be granted, whether legal or equitable, shall be entitled to reasonable attorneys' fees. Attorneys' fees shall include attorneys' fees on any appeal, and a Party entitled to attorneys' fees shall be entitled to all other reasonable costs for investigating such action, consultants' fees, taking depositions and discovery and all other necessary costs the court allows which are incurred in such litigation. Such fees and costs shall be enforceable whether or not such action is prosecuted to judgment.

ARTICLE 8. INDIVIDUAL LIABILITY, CONFLICTS AND NON-DISCRIMINATION

8.1 Non-liability of City Officers and Employees. No officer or employee of City shall be personally liable to Consultant, or any successor in interest, in the event of any default or breach by City or for any amount which may become due to Consultant or to its successor, or for breach of any obligation of the terms of this Agreement.

8.2 Conflict of Interest. Consultant covenants that neither it, nor any officer or principal of its firm, has or shall acquire any interest, directly or indirectly, which would conflict in any manner with the interests of City or which would in any way hinder Consultant's performance of services under this Agreement. Consultant further covenants that in the performance of this Agreement, no person having any such interest shall be employed by it as an officer, employee, agent or subcontractor without the express written consent of City. Consultant agrees to at all times avoid conflicts of interest or the appearance of any conflicts of interest with the interests of City in the performance of this Agreement. City, in its sole discretion, shall determine the existence of a conflict of interest and may terminate this Agreement in the event such a conflict of interest exists upon sending Consultant written notice describing the conflict. No officer or employee of City shall have any financial interest, direct or indirect, in this Agreement nor shall any such officer or employee participate in any decision relating to this Agreement which affects their financial interest or the financial interest of any corporation, partnership or association in which they are, directly or indirectly, interested, in violation of any State statute or regulation. Consultant warrants that it has not paid or given and will not pay or give any third party any money or other consideration for obtaining this Agreement.

8.3 Covenant Against Discrimination. Consultant covenants that, by and for itself, its heirs, executors, assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, color, creed, religion, sex, gender, sexual orientation, marital status, national origin, ancestry or other protected class in the performance of this Agreement. Consultant shall take affirmative action to insure that applicants are employed and that employees are treated during employment without regard to their race, color, creed, religion, sex, gender, sexual orientation, marital status, national origin, ancestry or other protected class.

ARTICLE 9. MISCELLANEOUS PROVISIONS

9.1 Notices. Any notice or other communication either Party desires or is required to give to the other Party or any other person in regards to this Agreement must be in writing and may be given either by (i) personal service, (ii) delivery by a reputable document delivery service, such as but not limited to, Federal Express, which provides a receipt showing date and time of delivery, or (iii) mailing in the United States Mail, certified mail, postage prepaid, return receipt requested, in the case of City addressed to the Contract Officer at City of Perris, 101 N. "D" Street, Perris, CA 92570, and in the case of Consultant, to the person(s) at the address designated on the execution page of this Agreement. Either Party may change its address by notifying the other Party of the change of address in writing. Notice shall be deemed communicated at the time personally delivered or in seventy-two (72) hours from the time of mailing if mailed as provided in this Section.

9.2 Interpretation. The terms of this Agreement shall be construed in accordance with the meaning of the language used and shall not be construed for or against either Party by reason of the authorship of this Agreement, headings used, or any other rule of construction which might otherwise apply.

9.3 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, and such counterparts shall constitute one and the same instrument.

9.4 Integration; Amendment. This Agreement including the attachments hereto is the entire, complete and exclusive expression of the understanding of the Parties as to the Agreement. It is understood that there are no oral agreements between the Parties hereto affecting this Agreement, and this Agreement supersedes and cancels any and all prior and contemporaneous negotiations, arrangements, agreements and understandings, if any, between the Parties, concerning this Agreement, and none shall be used to interpret this Agreement. No amendment to or modification of this Agreement shall be valid unless made in writing and approved by Consultant and by City, provided that City's approval thereof shall only be valid if made in a manner consistent with the PMC.

9.5 Severability. Should a portion of this Agreement be declared invalid or unenforceable by a judgment or decree of a court of competent jurisdiction, such invalidity or unenforceability shall not affect any of the remaining portions of this Agreement which are hereby declared as severable and shall be interpreted to carry out the intent of the Parties unless the invalid provision is so material that its invalidity deprives either Party of the basic benefit of their bargain or renders this Agreement meaningless.

9.6 No Undue Influence. Consultant declares and warrants that no undue influence or pressure was used against or in concert with any officer or employee of City in connection with the award, terms or implementation of this Agreement, including any method of coercion, confidential financial arrangement, or financial inducement. No officer or employee of City has or will receive compensation, directly or indirectly, from Consultant, or from any officer, employee or agent of Consultant, in connection with the award of this Agreement or any work to be conducted as a result of this Agreement. Violation of this Section shall be a material breach of this Agreement entitling City to remedies in Section 7.4 and any and all remedies at law or equity.

9.7 Corporate Authority. The persons executing this Agreement on behalf of the Parties hereto warrant that (i) such Party is duly organized and existing, (ii) they are duly authorized to execute and deliver this Agreement on behalf of said Party, (iii) by so executing this Agreement, such Party is formally bound to the provisions of this Agreement, and (iv) entering into this Agreement does not violate any provision of any other agreement to which said Party is bound. This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the Parties.

[SIGNATURES ON FOLLOWING PAGE]

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement on the date and year first-above written.

CITY:
CITY OF PERRIS, a California municipal corporation

Clara Miramontes
City Manager

ATTEST:

Nancy A. Salazar, City Clerk

APPROVED AS TO FORM:
ALESHIRE & WYNDER, LLP

[redacted] City Attorney

CONSULTANT:
FLOCK GROUP INC. dba FLOCK SAFETY, a Delaware corporation

By: [redacted]
Name: [redacted]
Title: CEO & PRESIDENT

By: [redacted]
Name: [redacted]
Title: GENERAL COUNSEL & SECRETARY

Address: 1170 HOWELL MILL RD NW
SUITE 210
ATLANTA, GA 30318

Two corporate officer signatures required when Consultant is a corporation, with one signature required from each of the following groups: 1) Chairperson of the Board, President or any Vice President; and 2) Secretary, any Assistant Secretary, Chief Financial Officer or any Assistant Treasurer. (Cal. Corp. Code § 313.) APPROPRIATE ATTESTATIONS SHALL BE INCLUDED AS MAY BE REQUIRED BY THE BYLAWS, ARTICLES OF INCORPORATION, OR OTHER RULES OR REGULATIONS APPLICABLE TO CONSULTANT'S BUSINESS ENTITY.

EXHIBIT A
SCOPE OF SERVICES

I. **Consultant will perform services described in Consultant's Proposal and attached hereto. Consultant's Proposal includes the Master Services Agreement between City and Consultant and its accompanying attachments including Exhibit A - Order Form, Exhibit B – Insurance, and Exhibit C – Customer Implementation Guide.**

II. **All work product is subject to review and acceptance by City, and must be revised by Consultant without additional charge to City until found satisfactory and accepted by City.**

EXHIBIT B
SPECIAL REQUIREMENTS
(Superseding Agreement Boilerplate)

Deleted text is indicated in ~~strikethrough~~ and added text in ***bold italics***.

I. Section 7.2 shall be amended as follows:

"This Section shall govern any termination of this Agreement except as specifically provided in Section 7.4 for termination for cause. ~~City reserves the right to terminate or suspend this Agreement, or any portion hereof, at any time, for any reason, with or without cause, upon ten (10) days' notice to Consultant, except that where termination or suspension is due to the fault of Consultant, the period of notice may be such shorter time as determined by City.~~ Upon receipt of any notice of termination or suspension, Consultant shall immediately cease all services hereunder, unless the notice provides otherwise, or except such as specifically approved by City. Upon submittal of an invoice consistent with Section 2.2, Consultant shall be entitled to compensation for all services rendered prior to the effective date of the notice of termination or suspension and for any services authorized by City thereafter in accordance with the Schedule of Compensation, or such as may be approved by City, except as provided in Section 7.5. ~~In event of termination, or suspension, without cause pursuant to this Section, there is no need to provide opportunity to cure pursuant to Section 7.3.~~"

EXHIBIT C

SCHEDULE OF COMPENSATION

I. Consultant will be compensated for Services provided under this Agreement in accordance with the schedule in Consultant's Proposal and attached hereto.

II. City will compensate Consultant for the Services performed upon submission of a valid invoice, as described in Section 2.2.

III. The total compensation for the Services shall not exceed the Contract Sum, as provided in Section 2.1 of this Agreement.

IV. Consultant shall perform the following tasks at the following rates:

Item	Cost	Quantity	Total
Flock Safety Platform			**$308,292.00**
Flock Safety Flock OS			
FlockOS® Advanced Package	Included	1	Included
Flock Safety LPR Products			
Flock Safety Falcon ®	Included	99	Included
Flock Safety Video Products			
Flock Safety Wing ™ VMS	Included	158	Included

Professional Services and One Time Purchases

Item	Cost	Quantity	Total
One Time Fees			
Flock Safety Professional Services			
Professional Services - Standard Implementation Fee	$650.00	48	$31,200.00
Professional Services - Existing Infrastructure Implementation Fee	$150.00	51	$7,650.00

Subtotal Year 1:	$347,142.00
Annual Recurring Subtotal:	$308,292.00
Discounts:	$1,896.00
Estimated Tax:	$0.00
Contract Total:	$653,538.00

EXHIBIT D
SCHEDULE OF PERFORMANCE

I. **Consultant shall perform all services and deliver all work products timely in accordance with the schedule described in Consultant's Proposal and attached hereto.**

II. **Consultant shall perform all Services timely in accordance with the following schedule:**

From: Valdez Price, Brandon

Hello,

Thank you so much for your time today! Here are the items I needed to follow up with post training:

- **Recorded Training**
- [redacted]
- **Flock Training Guide:**
  attached, a great resource for getting your department trained
- **Certification Course:**
  this is a really great resource for making sure your folks are properly trained and helps drive adoption/usage. A lot of our departments require this for new officers in training. It is quick, easy and when they pass we will send over a certificate they can add to their training file. It is optional but we are finding a direct link to an increase in user adoption and associated case closures.

- **NEW SHARING FEATURE:**
  - Video
    Tutorial
  - **Step-by-Step Instructions:**
    attached

- **Mobile App Download:**
  attached

-

  Video
  Tutorial

Next Steps:

1. Determine your plan for training the rest of your department. Do you want to train before everyone receives their activation email or after they get trained. Entirely up to you, just something to consider.
2. Create roles
3. Create user profiles
4. Request access to neighboring agencies - reference Step-by-Step instructions (attached)
5. Once agencies have approved, add all appropriate agencies to each appropriate role: Admin > Roles > click the 3 dots >click cursor into the Network field > add the agencies > save

Please don't hesitate to reach out with additional questions!

- Using Alerts
- Custom Hot Lists

FLOCK SAFETY FEATURES
USE CASES

SEARCH	LOOKUP TOOL	VEHICLE DESCRIPTION ALERT
When a user obtains a vehicle description (detailed or vague), Search can be used to gather a license plate.	Use it as a virtual tracker to monitor a vehicle's most frequently passed cameras over the last 30 days	Use it to create an alert for a stolen car when you have a vehicle description but no license plate number.
When a user has a license plate but very vague vehicle description, Search can be used to gather image(s) & detailed descriptions.	Verify information shared in an interview by comparing where a suspect says they've been with actual evidence captured by the Lookup Tool.	When the same car has been attached to a crime series but they change the plates. Create a VDA based on the vehicle & assumed patterns.
Use when additional vehicle photos are needed to support an investigation.	Use National or Statewide Lookup Tool to develop leads when the suspect's location is unknown.	When there is new construction that should have no traffic between 9PM-6AM, create VDA so the agency is alerted when there are trespassers.
When investigating a hit and run, search all vehicles that pass through an area during a given time frame to identify any that may have collision damage to establish a lead.	Develop a safe plan of apprehension by using known paths of travel to identify the best time/location to intercept and take a wanted person into custody.	Create a VDA when a person makes threats against an officer or during domestic violence situations so that alerts are received as soon as a vehicle matching theirs enters the area.

FLOCK SAFETY FEATURES
USE CASES

ALERTS	CUSTOM HOT LIST	MAPS Standard Use
Monitor alerts anytime a vehicle wanted in NCIC - or associated databases - passes an ALPR camera	Enter a wanted vehicle, such as a catalytic converter theft suspect, that may not otherwise qualify as a felony vehicle for entry into NCIC (and other associated databases).	All of the information provided on the Alerts page, but displayed on a Map to increase driver safety & minimize amount of computer work needed while en-route to an incident
Notify officers of dangerous vehicles as they drive around your jurisdiction, providing the overwatch they need to be safe & efficient.	Create CHL for a missing person's vehicle to avoid potential delays in NCIC or associated databases.	Enable Live Traffic to plan the best route of travel when responding to alerts.
Receive a notification as soon as a wanted person's vehicle enters a community, instead of after they commit a crime.	If responding to a domestic disturbance where the offender has fled, create a CHL so that officers canvassing the area can be notified when suspect passes a Flock camera.	Enhance situational awareness by visualizing all available resources on a map in one single view, including Flock cameras, integrated IP cameras, satellite view, etc.
Receive alerts based on your specialty to focus your response (traffic enforcement, wanted persons, etc.)	Allow investigators to monitor movements of key suspect vehicles when there is no probable cause to stop, but are critical to an investigation.	Combines information sources (Esri maps, Alerts, integrations, etc.) so Dispatchers feel empowered to more efficiently and safely dispatch.

FLOCK SAFETY FEATURES
USE CASES

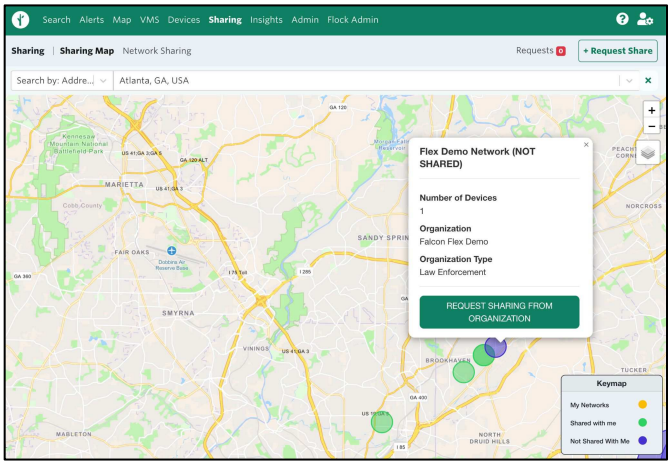

SHARING	INSIGHTS	ADMIN
Request access to other agencies' networks, including Hot List Alerts.	Easily pull data when requested by City Council, such as total plate reads in the last 30 days.	Roles: Create specific types of Roles to determine appropriate permissions for each.
Bulk request/accept and/or automatically accept requests from other agencies.	Audit all Searches that users in your network are conducting.	Users: Manage user profiles. Identify users who have never logged in & may need training.
Easily identify & download a list of all the agencies (LE & Private) that you have access to, as well as who has access to your network.	Use the Outcomes report to track Flock's impact directly through the platform.	Transparency Portal: Create a publicly-facing portal to share data on your ALPR program. *Contact CSM for more info.*

flock safety

Requesting Shares via the Map

The Sharing Map can be used to view your owned networks along with networks from nearby agencies (if you're a law enforcement customer). You can also easily view which agencies are sharing their networks with you and which agencies are not directly on the Map.

To request shares from nearby agencies:

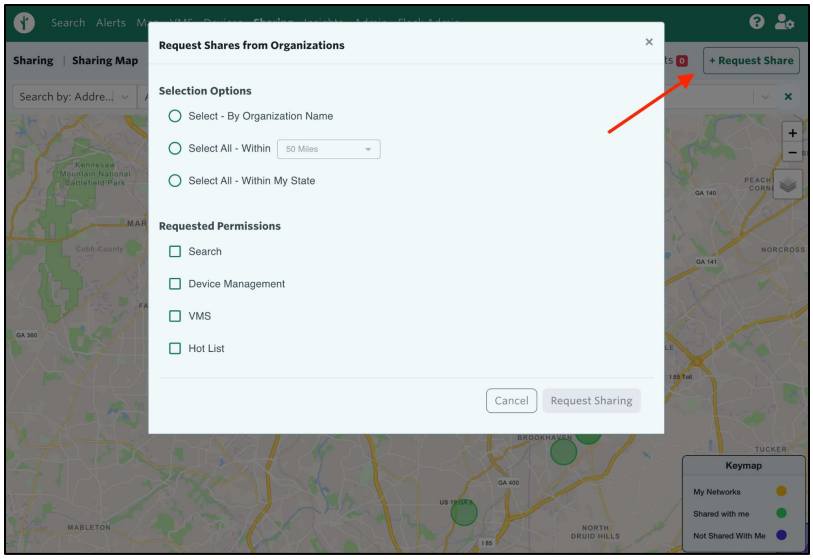

1. **Ensure that you are on the Sharing Map page**
   Navigate to Sharing from the navigation page or enter https://sharing.flocksafety.com/sharingMap in your browser
2. **Search by address or location**
   Utilize the address bar to search by address or location
3. **Request access**
   Purple bubbles indicate networks not currently shared with your organization. Click on the bubble to get more information about the organization. If you would like to request access, click 'Request Sharing from Organization' and the network permissions you would like access to.
   a. **Search**
      i. Allows access to networks to utilize in Flock's Search tool
   b. **Device Management**
      i. Allows access to view, edit, and modify an agency's Device
      ii. Please note, this should not be requested regularly as each agency should maintain their own devices.
   c. **VMS**
      i. Allows access to video feed
      ii. Please note, this should not be requested regularly; proper agreements should be in place between agencies prior to requesting.
   d. **Hot List**
      Allows access to networks in Flock's Alerts and Hot List Map tool

*** To gain access to the Sharing Map, you must be a part of a Law Enforcement agency and have both the Admin and the Can Share permissions enabled for your role.*

Requesting Shares via the Modal

The Sharing Modal is beneficial as it provides a more simplified experience when requesting shares from a specific agency or agencies, agencies within 50, 100, or 200 miles, and agencies within your state.

To request shares from nearby agencies:

1. **Ensure that you are on the Sharing Map page**
   Navigate to Sharing from the navigation page or enter https://sharing.flocksafety.com/sharingMap in your browser
2. **Click on +Request Share button**
   Click on the button in the top right corner of the page to open Request Share modal
3. **Request access**
   Select a specific organization, or agencies within 50, 100 or 200 miles of your agency, or agencies within your state along with the network permissions you would like access to.
   a. **Search**
      i. Allows access to networks to utilize in Flock's Search tool
   b. **Device Management**
      i. Allows access to view, edit, and modify an agency's Device
      ii. *Please note, this should not be requested regularly as each agency should maintain their own devices.*
   c. **VMS**
      i. Allows access to video feed
      ii. *Please note, this should not be requested regularly; proper agreements should be in place between agencies prior to requesting.*
   d. **Hot List**
      Allows access to networks in Flock's Alerts and Hot List Map tool

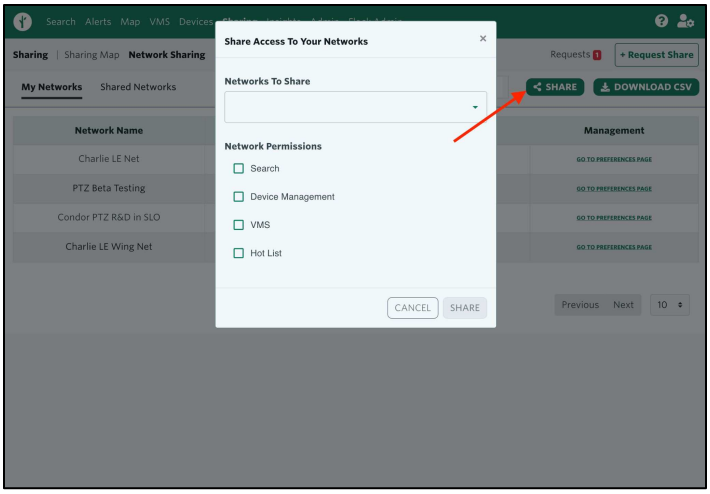

*** To gain access to the Sharing Map, you must be a part of a Law Enforcement agency, and have both the Admin and the Can Share permissions enabled for your role.*

flock safety

Sharing My Networks

The Sharing Modal is beneficial as it provides a more simplified experience when proactively sharing your owned networks to a specific agency or agencies, agencies within 50, 100, or 200 miles, and agencies within your state.

To proactively share your owned networks with nearby agencies:

1. **Ensure that you are on the My Networks page**
   Navigate to Sharing from the navigation page or type https://sharing.flocksafety.com/networkSharing in your browser
2. **Click on Share button**
   Click on the Share button that is located to the right of the search toolbar
3. **Share Access**
   Select a specific organization, or agencies within 50, 100 or 200 miles of your organization, or agencies within your state along with the network permissions you would like access to.
   a. **Search**
      i. Allows access to networks to utilize in Flock's Search tool
   b. **Device Management**
      i. Allows access to view, edit, and modify an agency's Device
      ii. *Please note, this should not be requested regularly as each agency should maintain their own devices.*
   c. **VMS**
      i. Allows access to video feed
      ii. *Please note, this should not be requested regularly; proper agreements should be in place between agencies prior to requesting.*
   d. **Hot List**
      Allows access to networks in Flock's Alerts and Hot List Map tool

*** To be able to share your owned networks, you must have both the Admin and the Can Share permissions enabled for your role.*

View My Networks and Shared Networks

The new Networks table provides a more simplified view of owned networks and shared networks, along with the ability to easily view shared permissions and the ability to download a .CSV report.

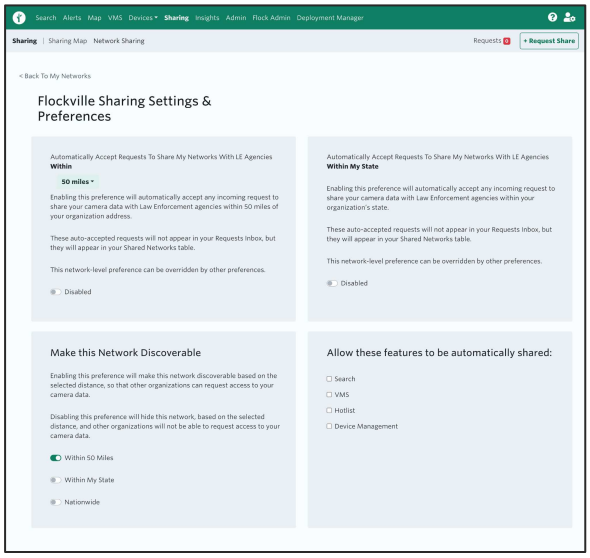

1. **Ensure that you are on the My Networks or Shared Networks page**
   Navigate to Sharing from the navigation page and click on My Networks or Shared Networks. You can also type https://sharing.flocksafety.com/networkSharing in your browser
2. **Click on My Networks**
   This page will display all of your organization's owned networks and permissions enabled when sharing.
3. **Click on Shared Network**
   This page will display all networks your organization is sharing, and other organizations sharing their networks with you. It also provides other pertinent information such as permissions shared and share date.
4. **Download CSV**
   Users can download a .CSV report of My Networks or Shared Networks for easier reporting. You must be on the specific tab to download the corresponding report.

*** To be able to view your owned and shared networks, you must have the Admin permission enabled for your role.*

flock safety

Setting Network Sharing Preferences

Users can set up different sharing preferences for networks they own to help with auto accepting requests, or turning off discoverability of a network if they do not wish to share.

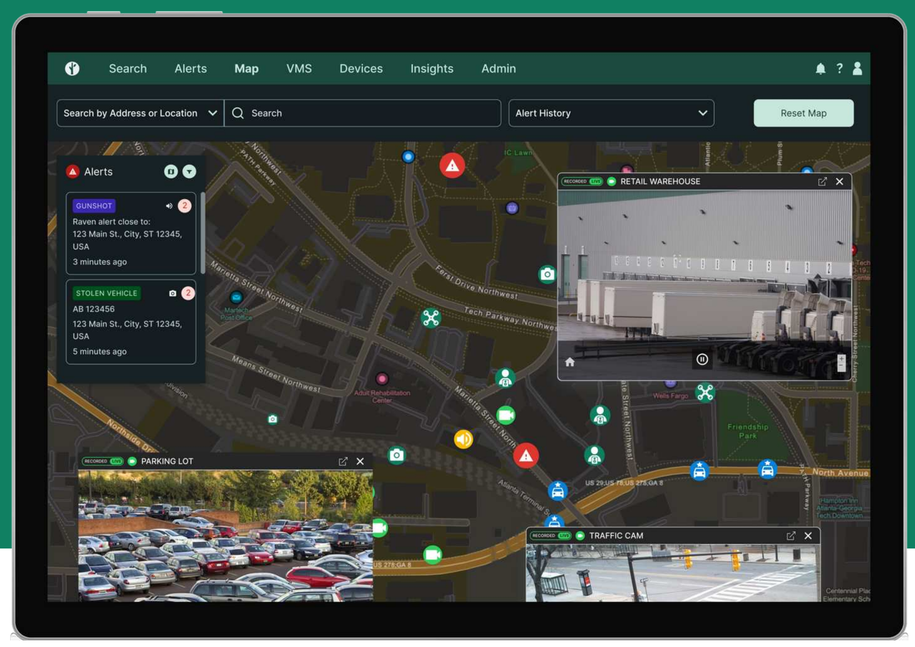

1. **Ensure that you are on the My Networks page**
   Navigate to Sharing from the navigation page and click on My Networks. You can also type https://sharing.flocksafety.com/networkSharing in your browser
2. **Click on 'Go To Preference Page'**
   Navigate to the preference page of the network you want to set preferences for.
3. **Set a preference:**
   a. **Automatically Accept Requests to Share My Networks with LE Agencies within X miles**
   b. **Automatically Accept Requests to Share My Networks with LE agencies Within My State**
   c. **Make This Network Discoverable**
   d. **Allow for these features to be shared**
      i. **Search**
         1. Allows access to networks to utilize in Flock's Search tool
      ii. **Device Management**
         1. Allows access to view, edit, and modify an agency's Device
         2. *Please note, this should not be requested regularly as each agency should maintain their own devices.*
      iii. **VMS**
         1. Allows access to video feed
         2. *Please note, this should not be requested regularly; proper agreements should be in place between agencies prior to requesting.*
      iv. **Hot List**
         Allows access to networks in Flock's Alerts and Hot List Map tool

*** To be able to set sharing preferences for your owned networks, you must have both the Admin and the Can Share permissions enabled for your role.*

About the Permissions

Admin	Allows those assigned to access the Admin page (edit roles, users, networks, etc.)
Network	List networks that are available for the role. Allows you to add additional networks to this role.
Can Edit Organization	Allows those assigned to the role to access the Organization page (edit organization location, allow/disable Lookup, enable MFA)
Can Share Network	Allows those assigned to share out your camera network and request access to other law enforcement agency networks.
Search	Grants permission to access the Flock search portal
Lookup	Allows access to State or National Lookup
Visual Search	Grants Permission to Visual Search Tool
Convoy Searh	Grants Permission to Convoy Search
MultiGeo Search	Grants Permission to Multi-Geography Search
Hot List	Allows those assigned to access the Alerts page to view Hot Lists
Custom Hot List Admin	Allows those assigned to create, edit, share, delete & view Custom Hot Lists in theirorganization, as well as enable notifications on any Custom Hot List that is shared with their organization. *Select both Custom Hot List Admin & Customer Hot ListAccess.*

flock safety

About the Permissions

Custom Hot List Access	Allows those assigned to create, edit and delete their own Custom Host List and view any list they are the selected audience of.
Managed Suppressed Hits	Allows those assigned to suppress individual plates for their agency.
Hot List Attachments	Allows those to utilize the Hot List Attachments feature. *Must have Custom Hot List Access at minimum.*
Hot List Deconfliction	Allows those to utilize the Hot List Deconfliction feature. *Must have Custom Hot List Access at minimum.*
Vehicle Description Alerts	Allows those assigned to send notifications when vehicles matching a specific set of filters pass a Flock camera. User must have Search & Hot List enabled
Real-Time Routing	Enables the Real-Time Routing feature on the Map page. *Must have Hot List access to utilize.*
Custom Map Layers	Enables the Custom Map Layers feature on the Map page. *Must have Hot List access to utilize.*
Devices	Allows those assigned to access the Device Management page (view device status, reboot device, etc.)
Device Managemet	Allows those assigned to access the "Device Health Page," to view their devices, status/health of those devices, rename/relocate the devices and register/unregister devices.
Insights	Allows those assigned to access the Analytics page.
Can Add Evidence to Axon	Allows those assigned to upload images from Flock to Axon's evidence.com after evidence.com integration.

flock safety

About the Permissions

VMS Go-Live	Allows those assigned to the role to click on a device and view live video in the VMS experience
VMS Historical	Allows those assigned to the role to playback previous video footage securely stored in the cloud
VMS Download	Allows those assigned to the role to download a defined start/stop time video clip.
VMS PTZ	Allows those assigned to the role to manipulate the Pan-Tilt-Zoom feature on agency purchased or integrated PTZ cameras.

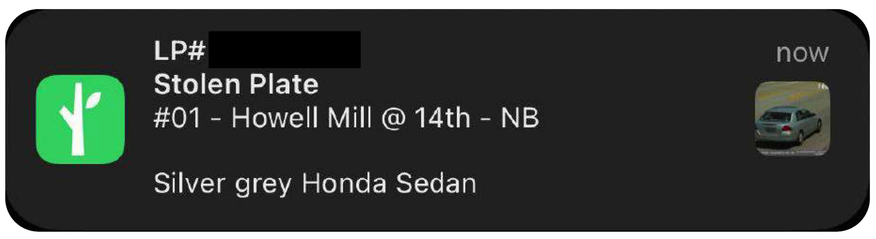

flock safety

Flock Safety Mobile App

SCAN FOR MOBILE APP

ACCESSING FLOCK SAFETY

Once downloaded, log in with the same username and password as you use to access Flock Safety on the computer. Once logged in, Allow Flock Safety to send notifications to your device so you receive alerts as push notifications.

ALERTS & NOTIFICATIONS

Flock Safety Mobile App will deliver real-time push notifications based on the Cameras and Alerts you have pre-selected. In addition, you will be notified based on Custom Hotlist and Vehicle Description Alerts.

Tapping the notification to launch Flock Safety will bring you directly to the Alert Details.

SEARCH FOR A VEHICLE

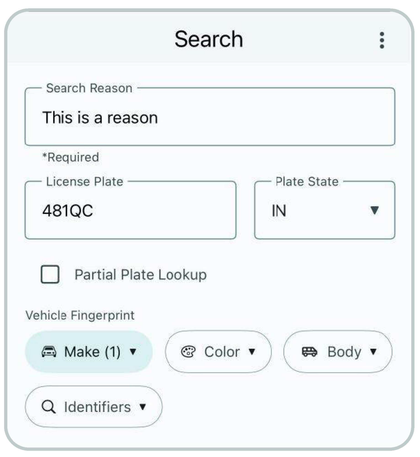

Enter a Reason, License Plate, and Plate State to find a vehicle.

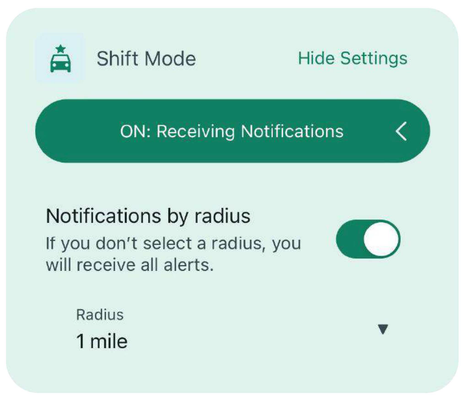

We will start by searching cameras owned by your PD over the last 24 hours. However, you can change the search parameters at any time.

SHIFT MODE WITH NOTIFICATION BY RADIUS

Channel push notifications to only be delivered to you while you are on shift and/or near you by enabling Shift Mode and Notifications by Radius.

By Enabling Shift Mode you will temporarily enable and pause your push notifications while you are working. To be notified for alerts that are close to you enable Notification by Radius and select a radius. The area will move as you move, based on your phone's location.

LOOKING FOR OTHER FEATURES?

We are constantly listening directly to your feedback and product needs on what to build in the mobile app.
To give feedback, feature enhancements, or new ideas, tap the three dots in the top right corner of the Flock Safety Mobile App, then tap Feedback.

Download on the App Store

GET IT ON Google Play

FLOCK SAFETY FEATURES
USE CASES

SEARCH	LOOKUP TOOL	VEHICLE DESCRIPTION ALERT
When a user obtains a vehicle description (detailed or vague), Search can be used to gather a license plate.	Use it as a virtual tracker to monitor a vehicle's most frequently passed cameras over the last 30 days	Use it to create an alert for a stolen car when you have a vehicle description but no license plate number.
When a user has a license plate but very vague vehicle description, Search can be used to gather image(s) & detailed descriptions.	Verify information shared in an interview by comparing where a suspect says they've been with actual evidence captured by the Lookup Tool.	When the same car has been attached to a crime series but they change the plates. Create a VDA based on the vehicle & assumed patterns.
Use when additional vehicle photos are needed to support an investigation.	Use National or Statewide Lookup Tool to develop leads when the suspect's location is unknown.	When there is new construction that should have no traffic between 9PM-6AM, create VDA so the agency is alerted when there are trespassers.
When investigating a hit and run, search all vehicles that pass through an area during a given time frame to identify any that may have collision damage to establish a lead.	Develop a safe plan of apprehension by using known paths of travel to identify the best time/location to intercept and take a wanted person into custody.	Create a VDA when a person makes threats against an officer or during domestic violence situations so that alerts are received as soon as a vehicle matching theirs enters the area.

FLOCK SAFETY FEATURES
USE CASES

ALERTS	CUSTOM HOT LIST	MAPS Standard Use
Monitor alerts anytime a vehicle wanted in NCIC - or associated databases - passes an ALPR camera	Enter a wanted vehicle, such as a catalytic converter theft suspect, that may not otherwise qualify as a felony vehicle for entry into NCIC (and other associated databases).	All of the information provided on the Alerts page, but displayed on a Map to increase driver safety & minimize amount of computer work needed while en-route to an incident
Notify officers of dangerous vehicles as they drive around your jurisdiction, providing the overwatch they need to be safe & efficient.	Create CHL for a missing person's vehicle to avoid potential delays in NCIC or associated databases.	Enable Live Traffic to plan the best route of travel when responding to alerts.
Receive a notification as soon as a wanted person's vehicle enters a community, instead of after they commit a crime.	If responding to a domestic disturbance where the offender has fled, create a CHL so that officers canvassing the area can be notified when suspect passes a Flock camera.	Enhance situational awareness by visualizing all available resources on a map in one single view, including Flock cameras, integrated IP cameras, satellite view, etc.
Receive alerts based on your specialty to focus your response (traffic enforcement, wanted persons, etc.)	Allow investigators to monitor movements of key suspect vehicles when there is no probable cause to stop, but are critical to an investigation.	Combines information sources (Esri maps, Alerts, integrations, etc.) so Dispatchers feel empowered to more efficiently and safely dispatch.

Requesting Shares via the Map

The Sharing Map can be used to view your owned networks along with networks from nearby agencies (if you're a law enforcement customer). You can also easily view which agencies are sharing their networks with you and which agencies are not directly on the Map.

To request shares from nearby agencies:

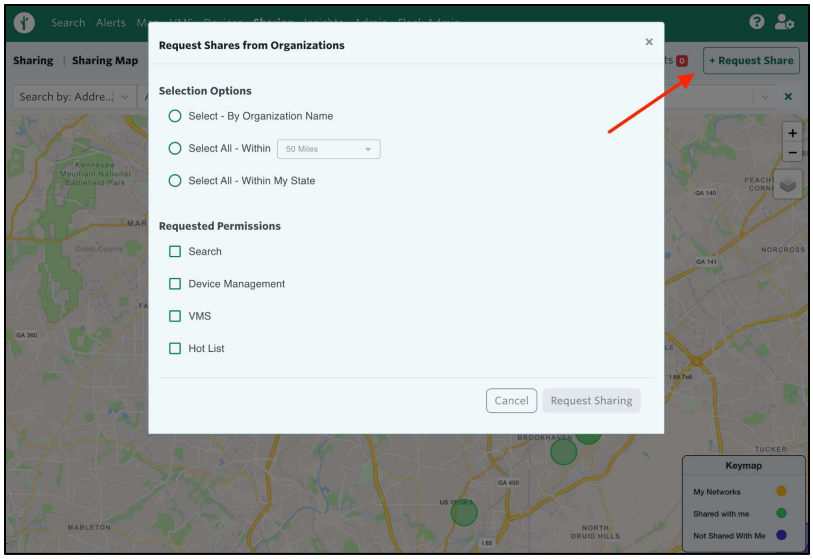

1. **Ensure that you are on the Sharing Map page**
   Navigate to Sharing from the navigation page or enter https://sharing.flocksafety.com/sharingMap in your browser
2. **Search by address or location**
   Utilize the address bar to search by address or location
3. **Request access**
   Purple bubbles indicate networks not currently shared with your organization. Click on the bubble to get more information about the organization. If you would like to request access, click 'Request Sharing from Organization' and the network permissions you would like access to.
   a. **Search**
      i. Allows access to networks to utilize in Flock's Search tool
   b. **Device Management**
      i. Allows access to view, edit, and modify an agency's Device
      ii. Please note, this should not be requested regularly as each agency should maintain their own devices.
   c. **VMS**
      i. Allows access to video feed
      ii. Please note, this should not be requested regularly; proper agreements should be in place between agencies prior to requesting.
   d. **Hot List**
      Allows access to networks in Flock's Alerts and Hot List Map tool

*** To gain access to the Sharing Map, you must be a part of a Law Enforcement agency and have both the Admin and the Can Share permissions enabled for your role.*

Requesting Shares via the Modal

The Sharing Modal is beneficial as it provides a more simplified experience when requesting shares from a specific agency or agencies, agencies within 50, 100, or 200 miles, and agencies within your state.

To request shares from nearby agencies:

1. **Ensure that you are on the Sharing Map page**
   Navigate to Sharing from the navigation page or enter https://sharing.flocksafety.com/sharingMap in your browser
2. **Click on +Request Share button**
   Click on the button in the top right corner of the page to open Request Share modal
3. **Request access**
   Select a specific organization, or agencies within 50, 100 or 200 miles of your agency, or agencies within your state along with the network permissions you would like access to.
   a. **Search**
      i. Allows access to networks to utilize in Flock's Search tool
   b. **Device Management**
      i. Allows access to view, edit, and modify an agency's Device
      ii. *Please note, this should not be requested regularly as each agency should maintain their own devices.*
   c. **VMS**
      i. Allows access to video feed
      ii. *Please note, this should not be requested regularly; proper agreements should be in place between agencies prior to requesting.*
   d. **Hot List**
      Allows access to networks in Flock's Alerts and Hot List Map tool

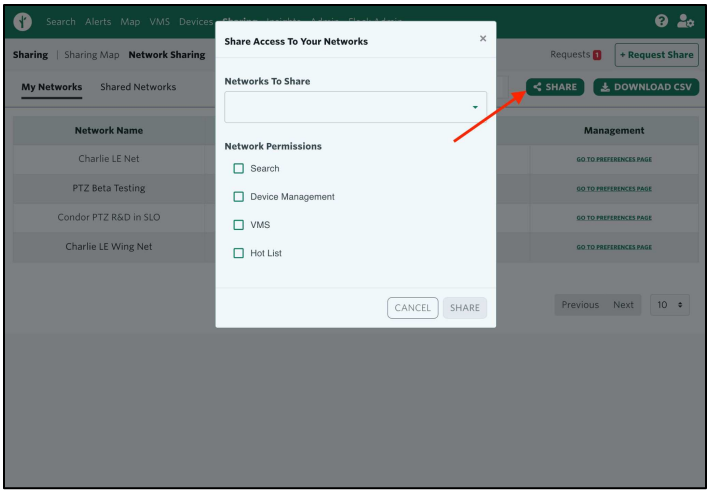

*** To gain access to the Sharing Map, you must be a part of a Law Enforcement agency, and have both the Admin and the Can Share permissions enabled for your role.*

flock safety

Sharing My Networks

The Sharing Modal is beneficial as it provides a more simplified experience when proactively sharing your owned networks to a specific agency or agencies, agencies within 50, 100, or 200 miles, and agencies within your state.

To proactively share your owned networks with nearby agencies:

1. **Ensure that you are on the My Networks page**
   Navigate to Sharing from the navigation page or type https://sharing.flocksafety.com/networkSharing in your browser
2. **Click on Share button**
   Click on the Share button that is located to the right of the search toolbar
3. **Share Access**
   Select a specific organization, or agencies within 50, 100 or 200 miles of your organization, or agencies within your state along with the network permissions you would like access to.
   a. **Search**
      i. Allows access to networks to utilize in Flock's Search tool
   b. **Device Management**
      i. Allows access to view, edit, and modify an agency's Device
      ii. *Please note, this should not be requested regularly as each agency should maintain their own devices.*
   c. **VMS**
      i. Allows access to video feed
      ii. *Please note, this should not be requested regularly; proper agreements should be in place between agencies prior to requesting.*
   d. **Hot List**
      Allows access to networks in Flock's Alerts and Hot List Map tool

*** To be able to share your owned networks, you must have both the Admin and the Can Share permissions enabled for your role.*

View My Networks and Shared Networks

The new Networks table provides a more simplified view of owned networks and shared networks, along with the ability to easily view shared permissions and the ability to download a .CSV report.

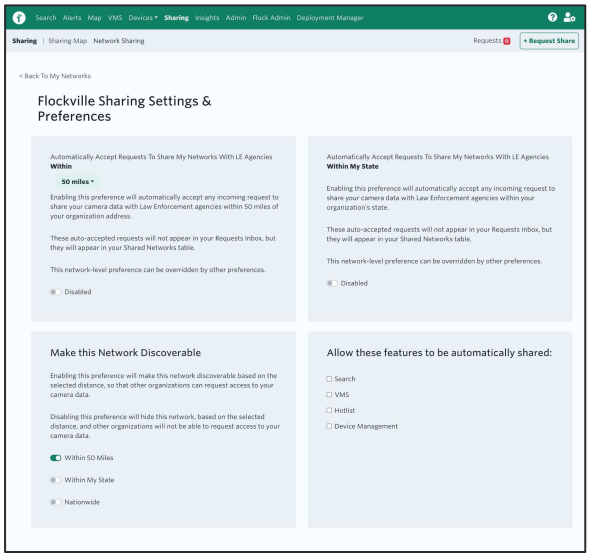

1. **Ensure that you are on the My Networks or Shared Networks page**
   Navigate to Sharing from the navigation page and click on My Networks or Shared Networks. You can also type https://sharing.flocksafety.com/networkSharing in your browser
2. **Click on My Networks**
   This page will display all of your organization's owned networks and permissions enabled when sharing.
3. **Click on Shared Network**
   This page will display all networks your organization is sharing, and other organizations sharing their networks with you. It also provides other pertinent information such as permissions shared and share date.
4. **Download CSV**
   Users can download a .CSV report of My Networks or Shared Networks for easier reporting. You must be on the specific tab to download the corresponding report.

*** To be able to view your owned and shared networks, you must have the Admin permission enabled for your role.*

flock safety

Setting Network Sharing Preferences

Users can set up different sharing preferences for networks they own to help with auto accepting requests, or turning off discoverability of a network if they do not wish to share.

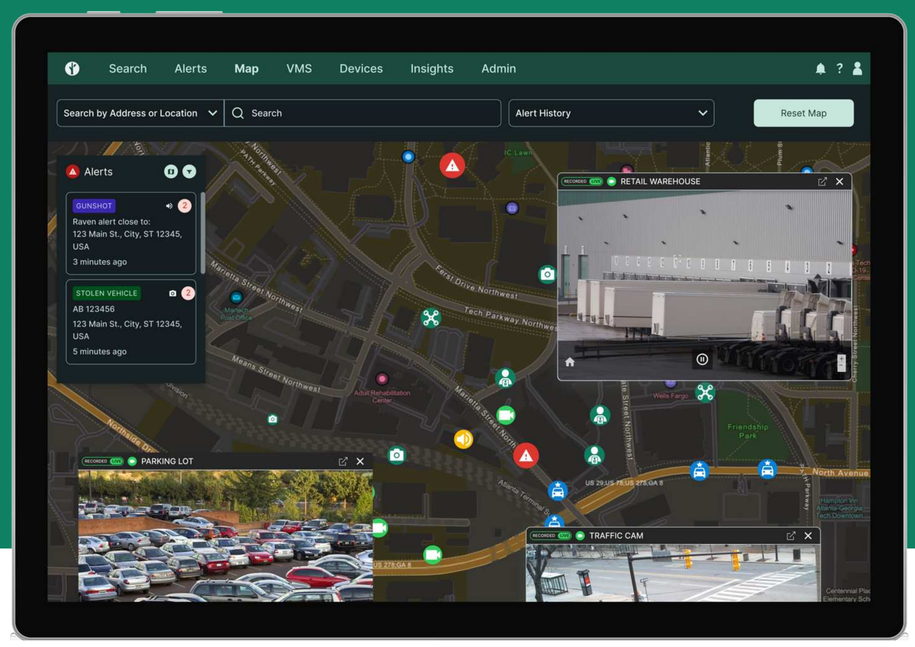

1. **Ensure that you are on the My Networks page**
   Navigate to Sharing from the navigation page and click on My Networks. You can also type https://sharing.flocksafety.com/networkSharing in your browser
2. **Click on 'Go To Preference Page'**
   Navigate to the preference page of the network you want to set preferences for.
3. **Set a preference:**
   a. **Automatically Accept Requests to Share My Networks with LE Agencies within X miles**
   b. **Automatically Accept Requests to Share My Networks with LE agencies Within My State**
   c. **Make This Network Discoverable**
   d. **Allow for these features to be shared**
      i. **Search**
         1. Allows access to networks to utilize in Flock's Search tool
      ii. **Device Management**
         1. Allows access to view, edit, and modify an agency's Device
         2. *Please note, this should not be requested regularly as each agency should maintain their own devices.*
      iii. **VMS**
         1. Allows access to video feed
         2. *Please note, this should not be requested regularly; proper agreements should be in place between agencies prior to requesting.*
      iv. **Hot List**
         Allows access to networks in Flock's Alerts and Hot List Map tool

*** To be able to set sharing preferences for your owned networks, you must have both the Admin and the Can Share permissions enabled for your role.*

About the Permissions

Admin	Allows those assigned to access the Admin page (edit roles, users, networks, etc.)
Network	List networks that are available for the role. Allows you to add additional networks to this role.
Can Edit Organization	Allows those assigned to the role to access the Organization page (edit organization location, allow/disable Lookup, enable MFA)
Can Share Network	Allows those assigned to share out your camera network and request access to other law enforcement agency networks.
Search	Grants permission to access the Flock search portal
Lookup	Allows access to State or National Lookup
Visual Search	Grants Permission to Visual Search Tool
Convoy Searh	Grants Permission to Convoy Search
MultiGeo Search	Grants Permission to Multi-Geography Search
Hot List	Allows those assigned to access the Alerts page to view Hot Lists
Custom Hot List Admin	Allows those assigned to create, edit, share, delete & view Custom Hot Lists in theirorganization, as well as enable notifications on any Custom Hot List that is shared with their organization. *Select both Custom Hot List Admin & Customer Hot ListAccess.*

flock safety

About the Permissions

Custom Hot List Access	Allows those assigned to create, edit and delete their own Custom Host List and view any list they are the selected audience of.
Managed Suppressed Hits	Allows those assigned to suppress individual plates for their agency.
Hot List Attachments	Allows those to utilize the Hot List Attachments feature. *Must have Custom Hot List Access at minimum.*
Hot List Deconfliction	Allows those to utilize the Hot List Deconfliction feature. *Must have Custom Hot List Access at minimum.*
Vehicle Description Alerts	Allows those assigned to send notifications when vehicles matching a specific set of filters pass a Flock camera. User must have Search & Hot List enabled
Real-Time Routing	Enables the Real-Time Routing feature on the Map page. *Must have Hot List access to utilize.*
Custom Map Layers	Enables the Custom Map Layers feature on the Map page. *Must have Hot List access to utilize.*
Devices	Allows those assigned to access the Device Management page (view device status, reboot device, etc.)
Device Managemet	Allows those assigned to access the "Device Health Page," to view their devices, status/health of those devices, rename/relocate the devices and register/unregister devices.
Insights	Allows those assigned to access the Analytics page.
Can Add Evidence to Axon	Allows those assigned to upload images from Flock to Axon's evidence.com after evidence.com integration.

flock safety

About the Permissions

VMS Go-Live	Allows those assigned to the role to click on a device and view live video in the VMS experience
VMS Historical	Allows those assigned to the role to playback previous video footage securely stored in the cloud
VMS Download	Allows those assigned to the role to download a defined start/stop time video clip.
VMS PTZ	Allows those assigned to the role to manipulate the Pan-Tilt-Zoom feature on agency purchased or integrated PTZ cameras.

flock safety

Let's eliminate crime and
shape a safer future, together.

Hi there,

An alert from one of your cameras indicated that trees/branches are in the immediate view of a Flock Safety camera. We recommend trimming the trees back from time to time so that the solar panel and/or the camera has a clear line of sight towards the traffic lanes. If tree limbs are blocking the solar panel and/or the view of the camera, your camera may experience a declining charge (due to constant motion capture) or register poor footage (due to trees in the way).

Hoping you can help by getting this taken care of.
Location Name: 96 WB Cahuilla Way @ Hwy 74
Address: 20 Ocotillo Ln

Thanks so much, and stay safe,

Good Afternoon Captain Potter,

I hope you are well. I was hoping we could catch up at some point in the near future. The Flock OS 911 stuff is neat, but I think it would also be great to just chat about Flock OS to see if there is anything else Flock can do to assist RSO.

Call me anytime.

Hello Captain Lamb,

As a follow up to our call yesterday, here is a video that covers the functionality as well as the permissions.

Role Permissions for consideration:
VMS Go-Live > allows the user to pull up & view current capture
VMS Historical > allows the user to view historical footage (< 30 days)
VMS Download > allows the user to search on specific timeframes and download footage
VMS PTZ > allows the user to manipulate the cameras (no prioritization/one user at a time)
PTZ Settings > allows the Admin to set the camera auto home & favorites settings
VMS Imaging Settings > allows the Admin to adjust camera settings like exposure

Please let me know if you have any questions or concerns after reviewing the live streams over the coming days.

Company Overview

At Flock Safety, technology unites law enforcement and the communities they serve to eliminate crime and shape a safer future, together. We created the first public safety operating system to enable neighborhoods, schools, businesses, and law enforcement to work together to collect visual, audio, and situational evidence across an entire city to solve and prevent crime.

Our connected platform, comprised of License Plate Recognition (LPR), live video, audio detection, and a suite of integrations (AVL, CAD & more), alerts law enforcement when an incident occurs and turns unbiased data into objective answers that increase case clearance, maximize resources, and reduce crime -- all without compromising transparency or human privacy.

Join thousands of agencies reducing crime with Flock Safety's public safety operating system

2000+	**120**	**1B+**	**<60%***
communities with private-public partnerships	incident alerts / minute	1B+ vehicles detected / month	<60% local crime reduction in Flock cities

*According to a 2019 study conducted by Cobb County Police Department

---

Introduction

Layer Intelligence to Solve More Crime

The pathway to a safer future looks different for every community. As such, this proposal presents a combination of products that specifically addresses your public safety needs, geographical layout, sworn officer count, and budget. These components make up your custom public safety operating system, a connected device network and software platform designed to transform real-time data into a panoramic view of your jurisdiction and help you zero in on the leads that solve more cases, prevent future crimes, and foster trust in the communities you serve.

Software Platform

Flock Safety's out-of-box software platform collects and makes sense of visual, audio, and situational evidence across your entire network of devices. With unlimited user licenses, your entire law enforcement agency can access the real-time investigative leads needed to increase case clearance, protect the community, and decrease crime rates.

Out-of-Box Software Features	

Simplified Search	Get a complete view of all activity tied to one vehicle in your network of privately and publicly owned cameras.
	The user-friendly search experience allows officers to filter hours of footage in seconds based on time, location, and detailed vehicle criteria using patented Vehicle Fingerprint ™ technology. Search filters include:
	
	● Vehicle make
	● Body type
	● Color
	● License plates
	  ○ Partial tags
	  ○ Missing tags
	  ○ Temporary tags
	  ○ State recognition
	● Decals
	● Bumper stickers
	● Back racks
	● Top racks

National and Local Sharing	Access 1B+ additional plate reads each month without purchasing more cameras. Solve cross-jurisdiction crimes by opting into Flock Safety's sharing networks, including one-to-one, national, and statewide search networks. Users can also receive alerts from several external LPR databases: *California SVS* *FDLE* *FL Expired Licenses* *FL Expired Tags* *FL Sanctioned Drivers* *FL Sex Offenders* *Georgia DOR* *IL SOS* *Illinois Leads* *NCIC* *NCMEC Amber Alert* *REJIS* *CCIC* *FBI*
Real-time Alerts	Receive SMS, email, and in-app notifications for custom Hot Lists, NCIC wanted lists, AMBER alerts, Silver alerts, Vehicle Fingerprint matches, and more.
Interactive ESRI Map	View your AVL, CAD, traffic, and LPR alerts alongside live on-scene video from a single interactive map for a birdseye view of activity in your jurisdiction.
Vehicle Location Analysis	Visualize sequential Hot List alerts and the direction of travel to guide officers to find suspect vehicles faster.

Out-of-Box Software Features (Continued)	
Transparency Portal	Establish community trust with a public-facing dashboard that shares policies, usage, and public safety outcomes related to your policing technology.
Insights Dashboard	Access at-a-glance reporting to easily prove ROI, discover crime and traffic patterns and prioritize changes to your public safety strategy by using data to determine the most significant impact.
Native MDT Application	Download FlockOS to your MDTs to ensure officers never miss a Hot List alert while out on patrol.
Hot List Attachments	Attach relevant information to Custom Hot List alerts. Give simple, digestible context to Dispatchers and Patrol Officers responding to Hot List alerts so they can act confidently and drive better outcomes. When you create a custom Hot List Alert, add case notes, photos, reports, and other relevant case information.
Single Sign On (SSO)	Increase your login speed and information security with Okta or Azure Single Sign On (SSO). Quickly access critical information you need to do your job by eliminating the need for password resets and steps in the log-in process.

License Plate Recognition		
The Flock Safety Falcon™ LPR camera uses Vehicle Fingerprint™ technology to transform hours of footage into actionable evidence, even when a license plate isn't visible, and sends Hot List alerts to law enforcement users when a suspect vehicle is detected. The Falcon has fixed and location-flexible deployment options with 30% more accurate reads than leading LPR.* *Results from the 2019 side-by-side comparison test conducted by LA County Sheriff's Department		
Flock Safety Falcon™ LPR Camera	Flock Safety Falcon™ Flex	Flock Safety Falcon™ XT
Fixed, infrastructure-free LPR camera designed for permanent placement. √ 1 Standard LPR Camera √ Unlimited LTE data service + Flock OS platform licenses √ 1 DOT breakaway pole √ Dual solar panels √ Permitting, installation, and ongoing maintenance	Location-flexible LPR camera designed for fast, easy self-installation, which is ideal for your ever-changing investigative needs. √ 1 LPR Camera √ Unlimited LTE data service + software licenses √ 1 portable mount with varying-sized band clamps √ 1 Charger for internal battery √ 1 hardshell carrying case	Long-range, high-speed LPR camera that captures license plates and Vehicle Fingerprint data for increasing investigative leads on high-volume roadways like highways and interstates. √ 1 Long-Rage LPR Camera √ Computing device in protective poly case √ AC Power √ Permitting, installation, and ongoing maintenance

Your Flock Safety Team	
Flock Safety is more than a technology vendor; we are a partner in your mission to build a safer future. We work with thousands of law enforcement agencies across the US to build stronger, safer communities that celebrate the hard work of those who serve and protect. We don't disappear after contracts are signed; we pride ourselves on becoming an extension of your hard-working team as part of our subscription service.	
Implementation	Meet with a Solutions Consultant (former LEO) to build a deployment plan based on your needs. Our Permitting Team and Installation Technicians will work will get your device network approved, installed, and activated.
User Training + Support	Your designated Customer Success Manager will help train your power users and ensure you maximize the platform, while our customer support team will assist with needs as they arise.
Maintenance	We proactively monitor the health of your device network. If we detect that a device is offline, a full-time technician will service your device for no extra charge. *Note: Ongoing maintenance does not apply to Falcon Flex devices.*
Public Relations	Government Affairs Get support educating your stakeholders, including city councils and other governing bodies. Media Relations Share crimes solved in the local media with the help of our Public Relations team.

FlockOS Features & Description

Package: Essentials

FlockOS Features	Description
Community Cameras (Full Access)	Access to all privately owned Flock devices within your jurisdiction that have been shared with you.
Unlimited Users	Unlimited users for FlockOS
State Network (LP Lookup Only)	Allows agencies to look up license plates on all cameras opted in to the statewide Flock network.
Nationwide Network (LP Lookup Only)	Allows agencies to look up license plates on all cameras opted in to the nationwide Flock network.
Direct Share - Surrounding Jurisdiction (Full Access)	Access to all Flock devices owned by law enforcement that have been directly shared with you. Have ability to search by vehicle fingerprint, receive hot list alerts, and view devices on the map.
Time & Location Based Search	Search full, partial, and temporary plates by time at particular device locations
License Plate Lookup	Look up specific license plate location history captured on Flock devices
Vehicle Fingerprint Search	Search footage using Vehicle Fingerprint™ technology. Access vehicle type, make, color, license plate state, missing / covered plates, and other unique features like bumper stickers, decals, and roof racks.
Flock Insights/Analytics page	Reporting tool to help administrators manage their LPR program with device performance data, user and network audits, plate read reports, hot list alert reports, event logs, and outcome reports.
ESRI Based Map Interface	Flock Safety's maps are powered by ESRI, which offers the ability for 3D visualization, viewing of floor plans, and layering of external GIS data, such as City infrastructure (i.e., public facilities, transit systems, utilities), Boundary mapping (i.e., precincts, county lines, beat maps), and Interior floor plans (i.e., hospitals, corporate campuses, universities)
Real-Time NCIC Alerts on Flock ALPR Cameras	Alert sent when a vehicle entered into the NCIC crime database passes by a Flock camera
Unlimited Custom Hot Lists	Ability to add a suspect's license plate to a custom list and get alerted when it passes by a Flock camera

flock safety

Riverside County Sheriff's Department

Company Overview

At Flock Safety, technology unites law enforcement and the communities they serve to eliminate crime and shape a safer future, together. We created the first public safety operating system to enable neighborhoods, schools, businesses, and law enforcement to work together to collect visual, audio, and situational evidence across an entire city to solve and prevent crime.

Our connected platform, comprised of License Plate Recognition (LPR), live video, audio detection, and a suite of integrations (AVL, CAD & more), alerts law enforcement when an incident occurs and turns unbiased data into objective answers that increase case clearance, maximize resources, and reduce crime -- all without compromising transparency or human privacy.

Join thousands of agencies reducing crime with Flock Safety's public safety operating system

2000+	**120**	**1B+**	**<60%***
communities with private-public partnerships	incident alerts / minute	1B+ vehicles detected / month	<60% local crime reduction in Flock cities

*According to a 2019 study conducted by Cobb County Police Department

---

Introduction

Layer Intelligence to Solve More Crime

The pathway to a safer future looks different for every community. As such, this proposal presents a combination of products that specifically addresses your public safety needs, geographical layout, sworn officer count, and budget. These components make up your custom public safety operating system, a connected device network and software platform designed to transform real-time data into a panoramic view of your jurisdiction and help you zero in on the leads that solve more cases, prevent future crimes, and foster trust in the communities you serve.

Software Platform

Flock Safety's out-of-box software platform collects and makes sense of visual, audio, and situational evidence across your entire network of devices.

Out-of-Box Software Features	

Simplified Search	Get a complete view of all activity tied to one vehicle in your network of privately and publicly owned cameras.
	The user-friendly search experience allows officers to filter hours of footage in seconds based on time, location, and detailed vehicle criteria using patented Vehicle Fingerprint ™ technology. Search filters include:
	
	● Vehicle make
	● Body type
	● Color
	● License plates
	  ○ Partial tags
	  ○ Missing tags
	  ○ Temporary tags
	  ○ State recognition
	● Decals
	● Bumper stickers
	● Back racks
	● Top racks

National and Local Sharing	Access 1B+ additional plate reads each month without purchasing more cameras. Solve cross-jurisdiction crimes by opting into Flock Safety's sharing networks, including one-to-one, national, and statewide search networks. Users can also receive alerts from several external LPR databases: *California SVS* *FDLE* *FL Expired Licenses* *FL Expired Tags* *FL Sanctioned Drivers* *FL Sex Offenders* *Georgia DOR* *IL SOS* *Illinois Leads* *NCIC* *NCMEC Amber Alert* *REJIS* *CCIC* *FBI*
Real-time Alerts	Receive SMS, email, and in-app notifications for custom Hot Lists, NCIC wanted lists, AMBER alerts, Silver alerts, Vehicle Fingerprint matches, and more.
Interactive ESRI Map	View your AVL, CAD, traffic, and LPR alerts alongside live on-scene video from a single interactive map for a birdseye view of activity in your jurisdiction.
Vehicle Location Analysis	Visualize sequential Hot List alerts and the direction of travel to guide officers to find suspect vehicles faster.

Out-of-Box Software Features (Continued)	
Transparency Portal	Establish community trust with a public-facing dashboard that shares policies, usage, and public safety outcomes related to your policing technology.
Insights Dashboard	Access at-a-glance reporting to easily prove ROI, discover crime and traffic patterns and prioritize changes to your public safety strategy by using data to determine the most significant impact.
Native MDT Application	Download FlockOS to your MDTs to ensure officers never miss a Hot List alert while out on patrol.
Hot List Attachments	Attach relevant information to Custom Hot List alerts. Give simple, digestible context to Dispatchers and Patrol Officers responding to Hot List alerts so they can act confidently and drive better outcomes. When you create a custom Hot List Alert, add case notes, photos, reports, and other relevant case information.
Single Sign On (SSO)	Increase your login speed and information security with Okta or Azure Single Sign On (SSO). Quickly access critical information you need to do your job by eliminating the need for password resets and steps in the log-in process.

License Plate Recognition		
The Flock Safety Falcon® LPR camera uses Vehicle Fingerprint™ technology to transform hours of footage into actionable evidence, even when a license plate isn't visible, and sends Hot List alerts to law enforcement users when a suspect vehicle is detected. The Falcon has fixed and location-flexible deployment options with 30% more accurate reads than leading LPR.* *Results from the 2019 side-by-side comparison test conducted by LA County Sheriff's Department		
Flock Safety Falcon®LPR Camera	Flock Safety Falcon® Flex	Flock Safety Falcon® LR
Fixed, infrastructure-free LPR camera designed for permanent placement. √ 1 Standard LPR Camera √ Unlimited LTE data service + Flock OS platform licenses √ 1 DOT breakaway pole √ Dual solar panels √ Permitting, installation, and ongoing maintenance	Location-flexible LPR camera designed for fast, easy self-installation, which is ideal for your ever-changing investigative needs. √ 1 LPR Camera √ Unlimited LTE data service + software licenses √ 1 portable mount with varying-sized band clamps √ 1 Charger for internal battery √ 1 hardshell carrying case	Long-range, high-speed LPR camera that captures license plates and Vehicle Fingerprint data for increasing investigative leads on high-volume roadways like highways and interstates. √ 1 Long-Rage LPR Camera √ Computing device in protective poly case √ AC Power √ Permitting, installation, and ongoing maintenance

Your Flock Safety Team	
Flock Safety is more than a technology vendor; we are a partner in your mission to build a safer future. We work with thousands of law enforcement agencies across the US to build stronger, safer communities that celebrate the hard work of those who serve and protect. We don't disappear after contracts are signed; we pride ourselves on becoming an extension of your hard-working team as part of our subscription service.	
Implementation	Meet with a Solutions Consultant (former LEO) to build a deployment plan based on your needs. Our Permitting Team and Installation Technicians will work to get your device network approved, installed, and activated.
User Training + Support	Your designated Customer Success Manager will help train your power users and ensure you maximize the platform, while our customer support team will assist with needs as they arise.
Maintenance	We proactively monitor the health of your device network. If we detect that a device is offline, a full-time technician will service your device for no extra charge. *Note: Ongoing maintenance does not apply to Falcon Flex devices.*
Public Relations	Government Affairs Get support educating your stakeholders, including city councils and other governing bodies. Media Relations Share crimes solved in the local media with the help of our Public Relations team.

Hi Deputy Pourier,

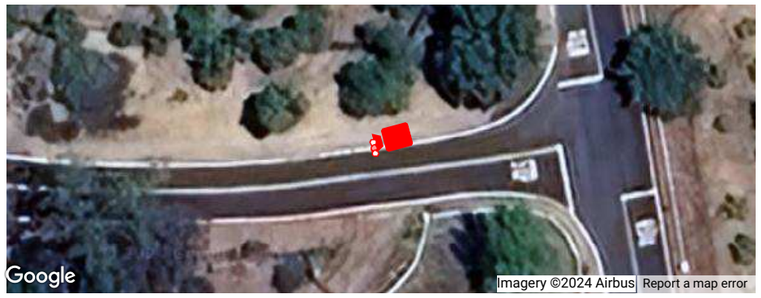

Here is the list of cameras which Caludia at TLMA stated require De Luz CSD approval:

#24 WB Buenos Campos Dr @ Sandia Creek Dr
#26 NB Carancho Rd @ De Luz Rd
#27 SB Los Gatos Rd @ Carancho Rd
#28 Sandia Creek Dr @ Carancho Rd

The attached PDF shows the proposed locations for each camera. Camera 26 has since been updated to the other side of Carancho because the proposed location is not suitable for installation.

Hi there,

[redacted] here from Flock Safety Customer Support. While responding to an alarm for camera #41, the technician noticed that the location experienced third-party damage as the pole was bent (see attachments). We will need to replace the pole to ensure the location is functioning properly as soon as possible.

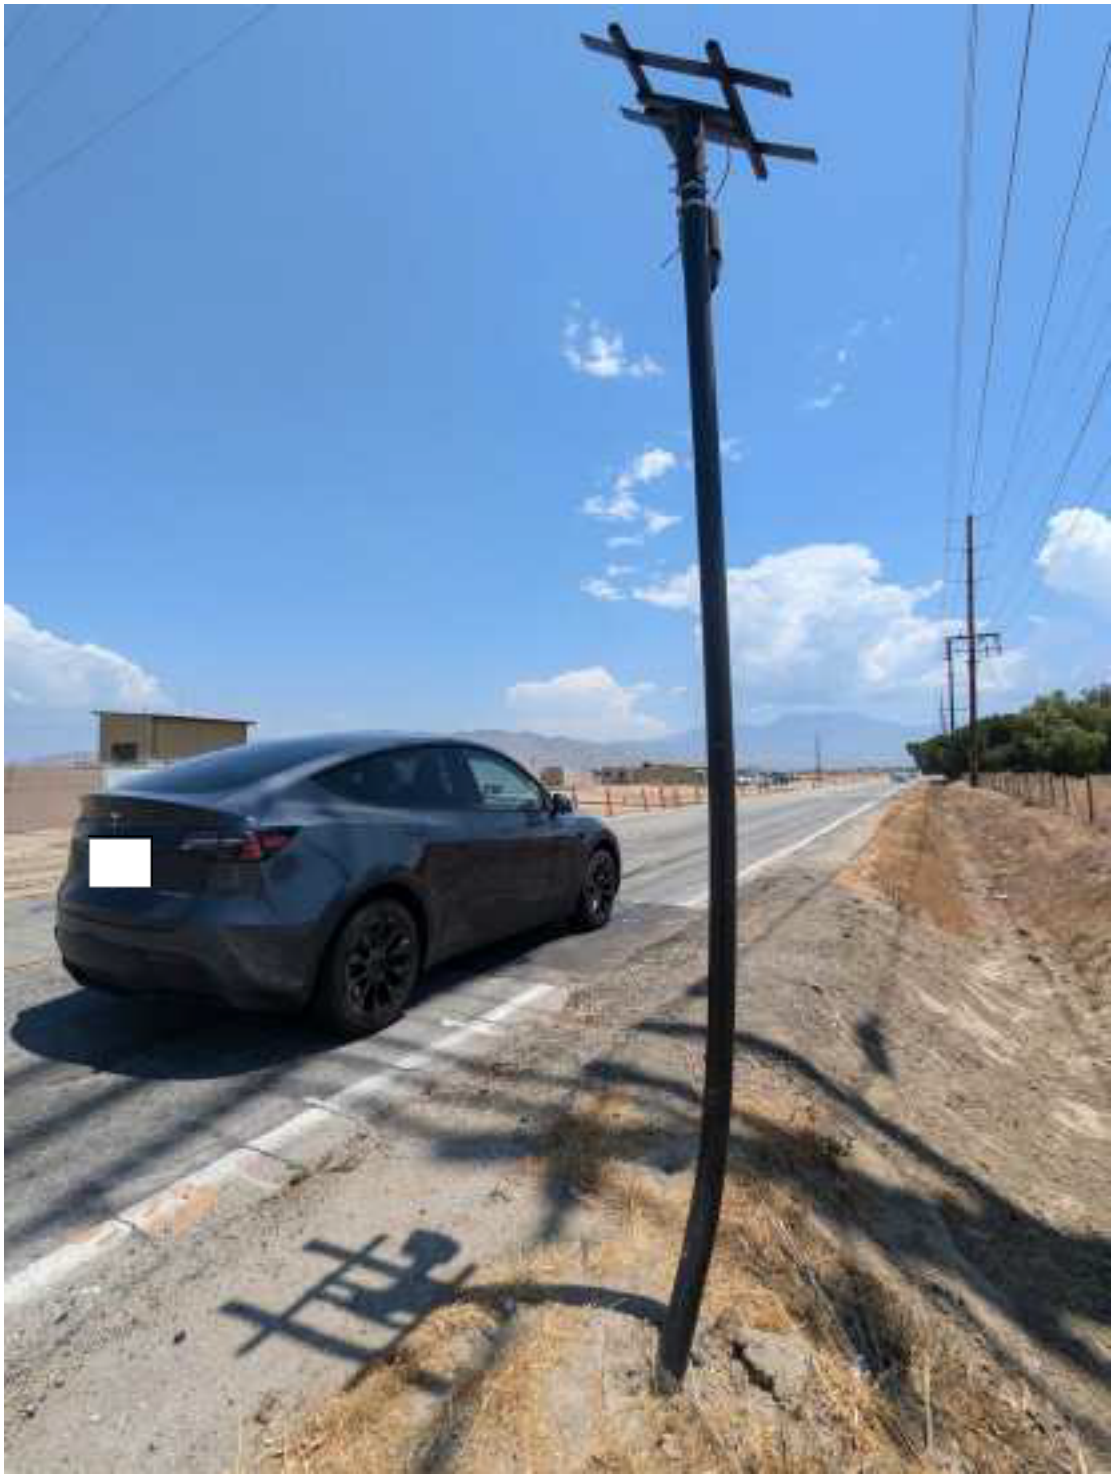

Due to the physical damage, we will be sending an invoice in conjunction with our reinstall fee schedule. This invoice ($500) will be emailed to you ([redacted]) upon reinstallation. For additional information, please see Section 8.2 of our Terms and Conditions.

Thank you for your partnership, and we apologize for the inconvenience here. We look forward to your organization seeing continued success with your Flock technology. Please let me know when you receive this message.

Stay safe,

??????[redacted]

To: [redacted]
Subject: Cross Platform Capabilities

Good Afternoon[redacted]

I am reaching out to see if you can point me in the right direction of who to talk to within FLOCK regarding the below question.

I am now assigned to our Aviation unit and we are switching to the new Shotover M2 Camera and ARS Mapping System on our helicopters. The new M2 camera has LPR technology currently implemented. I was told that the new Trakka brand camera has LPR technology and they were able to implement FLOCK into the camera allowing all the license plates captured by the camera to also be cross checked with SVS/Hotlists just like a typical LPR camera does. I would like to connect someone from FLOCK and SHOTOVER to see if this is possible to be done. With how good our airborne cameras are getting, now with having LPR technology, I believe this is going to be the way of the future for Airborne Law Enforcement looking for suspects, missing people and stolen vehicles etc.

Looking forward to hearing back from you!

Deputy Eric Earley #5709
Tactical Fight Officer
Riverside County Sheriff Aviation Unit - Desert

Lt. Porras,

I wasn't sure if Jesse sent you the deployment map for the video project, so I wanted to make sure you have it for review. The link below is active for 30 days. The only installation complication I can see is possibly camera 12 at El Paseo and Prickly Pear. This is a decorative pole that has very little room for our equipment with the banner attachment present. We would also need to know if there is constant power at this pole. I'm sure someone from public works or engineering would be able to help us with that issue. If you see anything that needs adjustment or if you have any questions, reach out to me. If this all looks good, please send Jesse an email letting him know to move forward.

Subject: CA-Riverside Sheriff-Cabazan Station - Relocation of #05 Seminole Dr @ Malki Road - EB

CAUTION: This email originated from outside the **Riverside Sheriff** email system.
DO NOT click links or open attachments unless you recognize the sender and know the content is safe.

Hi there,

This is [redacted] from the relocations team at Flock Safety reaching out. We have temporarily paused relocation #05 while we gather additional information regarding the existing light pole. Our permitting team noted the following details:

- Here is a link to the current deployment plan for your review.
  - This location requires a permit through Riverside County.
  - This is not a city-owned light pole. It is unclear if the pole belongs to the county, but there is a possibility it may be an SCE (Southern California Edison) light pole, which we are unable to use for installation.
  - If the light pole is confirmed to be an SCE pole, we can proceed by installing a Flock-owned pole 8 to 10 feet from the edge of the pavement, adjacent to the existing light pole. This option would need your approval before we move forward. Do you approve of using a Flock pole?

Please let us know if you would like to proceed with this alternative placement, or if there is any other information you can provide about the pole ownership.

Thank you for your cooperation.

Stay safe,

Subject: Cameras mis-identified

Good afternoon, this email is to request a rename a few of the mis-identified cameras in the Lake Mathews area. Below are the camera names currently and what they should be named to accurately reflect their direction or location.

1. Van Buren x Washington, east and west cameras (#23 & #24) are mis-identified and should be switched.
2. SB McKinley x Estelle (#3) should reflect NB McKinley x Estelle
3. WB Dawson Canyon x Temescal Canyon (#43) should reflect EB Dawson Canon x Temescal Canyon

Subject: Camera relocation status
Attachments: Camera #5 WB Seminole.jpg

[redacted]

I am checking the status of a couple Flock camera relocations/installations:

Camera #11 NB Haugen-Lehman Way (was knocked down and camera missing) from January 5, 2024.

Camera #5 WB Seminole @ Malki Road. We requested to move this camera to the north side of Seminole near or around the Chevron gas station to get WB traffic on Seminole. Where it's located now, it gets EB traffic and very limited WB traffic. I attached a photo for reference. There are light standards that could accommodate the camera, or a pole could be installed.

Please let me know.

Thank you!

Good Morning Team,

I hope all is well since the last time we all spoke. It's good to be working with you all again.

We have permits for 11 of the 14 locations and are scheduled to install these tentatively in the second week of February. In the meantime please let me know if you have any questions or concerns.

I will be in contact as we get closer to that date and these work orders are dispatched.

Attachments: Flock locations.pdf

Mr,

Captain Lamb and I drove around the three locations (#14, #15, and #74) regarding he construction in those areas.

- #14 EB Harvill X I215. There is no construction in the area we choose for the camera placement as indicated on the Planning Center site for CA-City of Perris (phase 2).
- #74 N/B A Street x Nuevo. Again although there is construction in the area, there is no construction and will be no construction for the camera placement as indicated on the Planning Center site for CA-City of Perris (phase 2).
- #15 EB Bonnie Drive x Maps. There is major construction in the original location identified. However, could we please move the camera northwest toward the actual interception ? Street light of Mapes Rd. X Bonnie Dr. We need the camera focused on the traffic coming into the city.

Please see attached PDF for further explanation. If you have any questions, please feel free to reach out.

Good morning Matthew,

Hope all is well. On your account. I attached the current statement. Their are to unapplied payments. Just need to understand how you would like to handle them.
Apply to any of the open invoices. I need to know which invoice. Or refund.
Please respond in efforts to clean up your account.
I know before you stated to apply them. I sent that response to cash applications then. But of course, they never applied it. Now it is coming back up again.
Please respond by email with decision.
If refund. Just need account name to refund and address and attention to whom.

Subject: Axon/CAD Integration

Hello again!

What is needed to pull body cameras into FlockOS via the Axon integration? Or are those pulled in via another method?

Also, can you send me documentation for a CAD Integration? Specifically looking for alternative methods of uploading/updating data outside of a compatible CAD system. We formed a committee to find us a new CAD vendor, which we hope to have in place within the next two years. I'd like to be sure that they have any specific integration requirements in hand during this process.

Hi there,

I appreciate your patience while our engineering team did an extensive investigation into this matter. After a careful review, they were not able to determine why the alert was never populated. However, they are working strategically on how to ensure that this does not happen again in the future.

Please know that a great deal of resources were put into this investigation and it was not taken lightly. Our engineering team looked at every possible angle for a reason that the alert would not have triggered. Thank you for allowing us the time and opportunity to investigate this and to strengthen our software for all of our customers.

Thank you again for your patience and continued partnership.

Stay safe,

Agenda

- Introductions
- Any initial questions/concerns/important items to note about the FlockOS implementation
- Project materials shared with team
    - Project plan and tasks can be found here
        - Project plan tab should be used

        - C tasks are customer responsibility
        - Task color
            - Grey - Holding, not ready to be worked on
            - Orange - Prioritized, ready to be worked on
            - Blue - Started, currently being worked on
            - Green - Finished
        - Can pull in additional fields using setting toggle
        - Can open/collapse Project insights
    - Detailed project notes can be foundhere
        - Only needed if a more specific status is needed on a task
    - This folder can be used to exchange materials
- Review project plan
    - Identify resources
    - Discuss steps from a high level
        - ESRI layers
        - Map attachments
            - Feature enabled for System admins
            - Help article can be found here https://help.flocksafety.com/s/article/Map-Attachments
        - Axon
            - E.com
            - BWC
        - Community Website and Marketing Materials
        - Milestone
            - 50 streams
            - ONVIF instructions provided with agenda and uploaded to shared drive
        - FirstTwo Integration
        - Gateways
            - 50 locations or 400 feeds
                - Primary goal for SO is to identify any priority locations for initial onsite visit
                - Typically complete 5-10 installs per onsite
            - Separate tab on spreadsheet
            - During FlockOS Software implementation, TPM will assist in managing onsite visits. Once other FlockOS items are completed, IM will be primary contact for remaining onsites.
- Time permitting
    - Application and help desk access
    - Bi-weekly meeting scheduling (PDT)
        - Starting the week of September 16th
            - Tuesdays 10:00-10:30, 12:30-1:00
            - Wednesdays 9:00-10:00, 11:00-1:00
            - Thursdays 10:00-11:30
        - Starting the week of September 23rd
            - Tuesdays 9:00-10:00, 10:30-11:30, 12:30-1:00
            - Wednesdays 9:30-10:00, 11:00-1:00
            - Thursdays 9:00-11:00, 12:30-1:00

ONVIF Bridge

detailed setup guide

Milestone ONVIF Bridge is an open ONVIF compliant interface for standardized and secure video sharing from XProtect VMS systems to other IP-based security systems. This enables law enforcement, surveillance centers, or similar organizations (referred to as **ONVIF clients**) to access live and recorded H.264 video streams from your XProtect VMS system to their central monitoring solutions. The video streams are sent as RTSP streams over the Internet.

Milestone ONVIF Bridge does not allow ONVIF clients to configure anything within the XProtect VMS systems. Milestone ONVIF Bridge is compliant with relevant parts of the ONVIF Profile **G** and Profile **S**, providing access to live and recorded H.264 video streams, including the ability to control pan-tilt-zoom (PTZ) cameras.

For more information about the ONVIF standard, see check the ONVIF® website: http://www.onvif.org/

Prerequisites

The computer where you want to install the Milestone ONVIF Bridge server component must have the following installed:

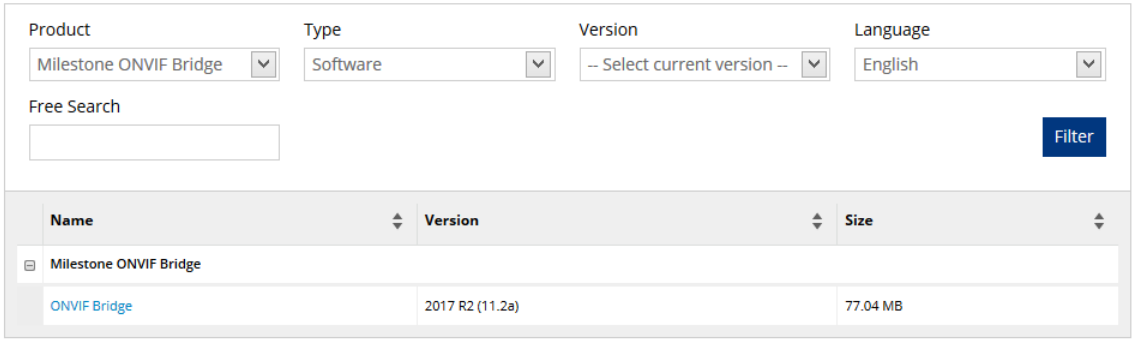

- Microsoft® .NET Framework 3.5.
- Microsoft® .NET Framework 4.5.1 or higher.
- Visual C++ Redistributable Package for Visual Studio 2013 (x64). (**Important:** Currently only cameras with H.264 streaming support the RTSP streaming via the Internet.)
- All XProtect versions 2016 R2 and newer, *except* XProtect Essential versions.
- Default ports used by ONVIF Bridge:
    - 580: for the ONVIF Server connection;
    - 554: for RTSP streaming (alternative port: 8554).

Licensing

Milestone ONVIF Bridge **does not** require additional licenses. You can download the software from the Milestone Systems website and start the installation.

Download the installation file

1. Open the Download section of the Milestone Systems website https://www.milestonesys.com/support/download-software/ and locate the Milestone ONVIF Bridge product.
2. Click the Milestone ONVIF Bridge installer file.
3. Select *Run* or *Save* and follow the instructions.

Installation

There are two options to install Milestone ONVIF Bridge:

- **Typical**: When you want to install **both** the ONVIF Bridge server and plug-in on the computer with XProtect Management Application (or XProtect Management Client) installed.
- **Custom**: When you want to install the ONVIF Bridge server and the plug-in on **different computers**.

1. Run the downloaded file on the computer where you want to install Milestone ONVIF Bridge. Select “Yes” for all warnings and the unpacking will start.
2. Select the language for the installer. Click “Continue.”
3. Read and accept the license agreement. Click “Continue.”
4. Select the installation type:
   - Click **Typical** to install the ONVIF Bridge server and plug-in on **one computer**. Go to step 6.
   - Click **Custom** if you want to install the ONVIF Bridge server and plug-in on **separate computers**. Go to the next step.
4. If you chose **Custom**, select the server option. Click “Continue.”

5. Specify the primary surveillance system server:
   - Type the server URL and port number.
   - "User account" as log in.
   - Type user name and password to be used by the service. Use user that have Admin permissions on the local machine and the VMS Server.
   - Click "Continue."

6. Select the file location and product language. Click "Install."
7. When the installation is complete, you will see the list of successfully installed components. Click "Close." If you chose **Custom**, log into the computer with XProtect Management Application or XProtect Management Client installed and run the installer again to install the ONVIF Bridge plug-in.

The following components are now installed:

- Milestone ONVIF Bridge server.
- Milestone ONVIF Bridge plug-in that is visible in XProtect Management Application or XProtect Management Client in the Servers node.
- Milestone ONVIF Bridge Manager that is running and accessible from the notification area on the server with the ONVIF Bridge server installed.
- Milestone ONVIF Bridge service that is registered as a service.

You are now ready for the initial configuration.

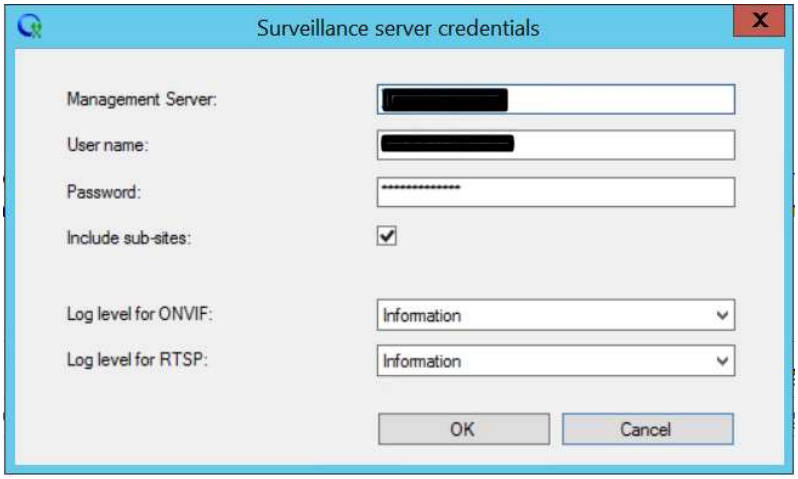

Configuration

Configure the VMS address and login credentials (if you are not using the default ones):

1. In the notification area on the computer with the ONVIF Bridge server installed, right-click the ONVIF Bridge tray icon.

2. In the menu that appears, stop the ONVIF Bridge service, if it's not already stopped.

3. Click "Configuration."

4. The Surveillance server credentials will appear. There you can specify the Management Server/Application URL, port number (if you are not using the default port **80**) and the username/password that has administrator permissions in the VMS.

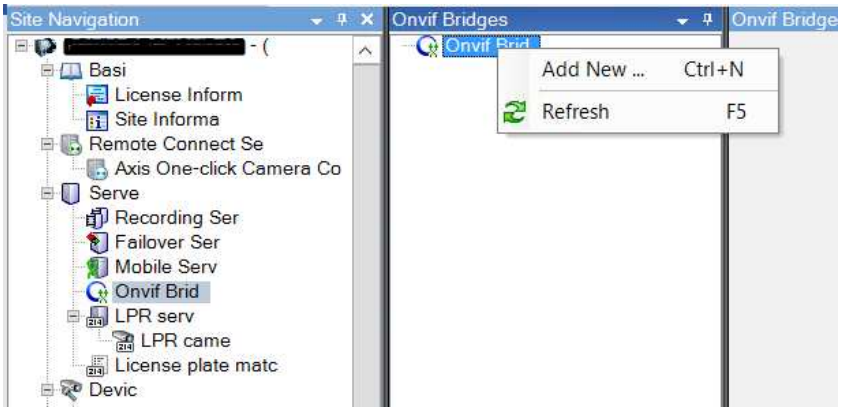

5. Click “OK.”

6. Start the ONVIF Bridge service.

- **Include sub-sites**: This checkbox allows the ONVIF Bridge to reproduce the streams from cameras installed on **child sites**. By default, it is configured to *exclude* sub-sites, but you can change this by checking the checkbox. Milestone generally recommends that you do this only on *very small systems* because of the possible huge bandwidth and machine utilization.

Add new instance in the VMS:

In the Management Client/Application/ONVIF Bridge:

Right-click on the ONVIF Bridge and click “Add New…”. The new instance will be detected automatically if the connection between the XProtect Management server and the ONVIF Server is stable.

- **User settings**:

- **ONVIF port** (default 580): Through this port, the ONVIF clients connect to the ONVIF Bridge server.
- **RTSP port** (default 554): Through this port, the ONVIF clients stream RTSP video streams from the ONVIF Bridge server.
- **ONVIF user credentials**: Users that will be used by the ONVIF clients to access to the video streams, or the site using the ONVIF client.

Prerequisite: *ONVIF client users must be added in the XProtect Management Application or XProtect Management Client with proper access to relevant cameras.*

- Use the **add**/**remove** buttons to manage the users.

- **Advanced settings of the ONVIF Bridge instance** (camera and stream settings)

The advanced settings for the ONVIF Bridge list the default settings for all cameras that the ONVIF Bridge provides to the ONVIF clients when the clients connect and request video streams.

Name	Description
Max days of retention	Default value is 30.
Frame per seconds	Default value is 5.
Width	Default value is 1920. This corresponds to full HD quality.
Height	Default value is 1080. This corresponds to full HD quality.
Bitrate Kbps	Default value is 512.
GOP size	Default value is 5.
Codec	Select one of the H.264 codec profiles. The default value is H.264 Baseline Profile.
Use configurations from cameras	Enable this to use the actual configuration of the cameras instead of the default average values defined above. If you enable this setting, the response time between the XProtect system and the ONVIF clients increases.

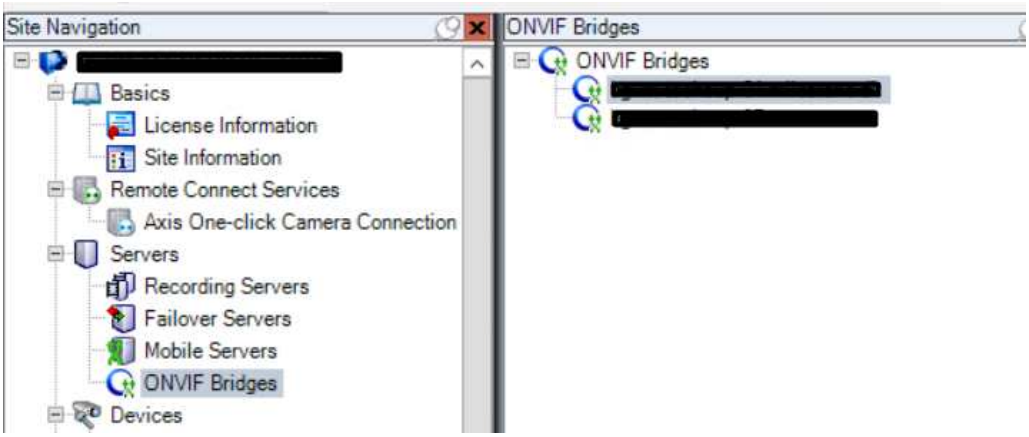

Advanced settings of the ONVIF Bridge instance

Note: *Different (customized) stream settings will take effect only if you use some ONVIF certified client that can connect to port **580** and communicate with the ONVIF server (like ONVIF Device Manager). Otherwise the ONVIF Bridge will stream the default camera settings trough the RTSP port (**554**).*

Add additional ONVIF Bridge instance:

In some cases, **different** ONVIF streams for different clients are required, but for the same cameras. If you need to re-stream huge systems, the two instances can be useful for load balancing.

This can be done by installing an additional ONVIF Bridge Server, on a separate machine, and pointing to the same XProtect Management Server (see step 1 from the “Configuration” section).

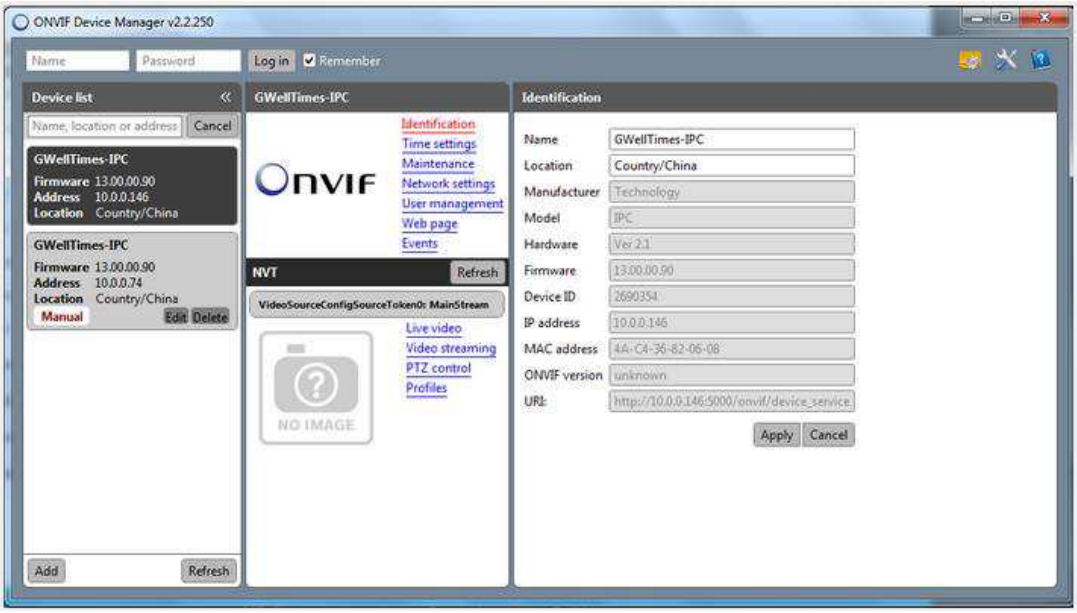

ONVIF Clients and ONVIF Players

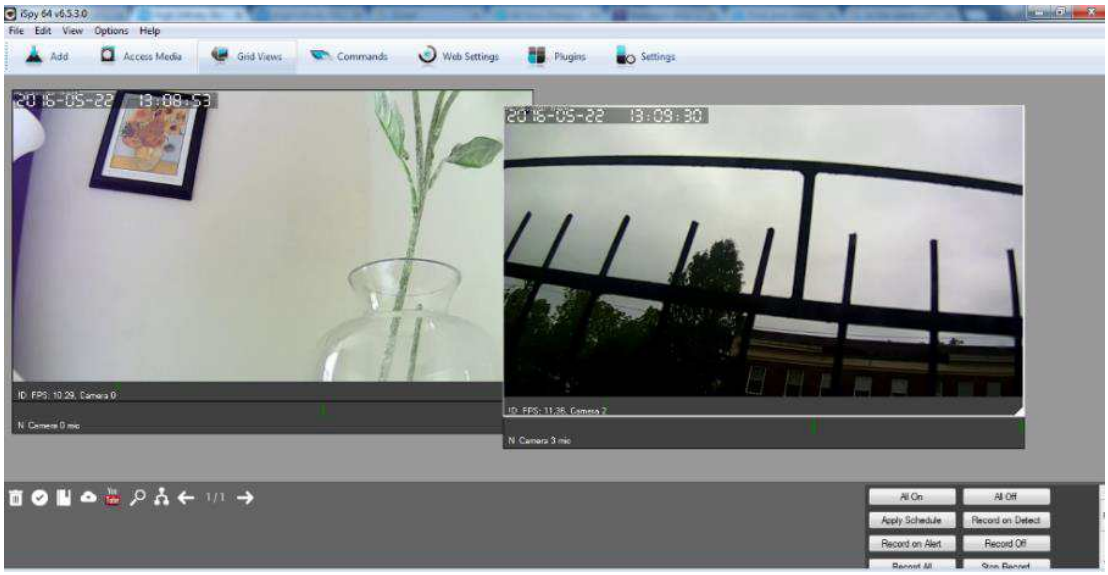

- ONVIF Clients can act as servers, or as bridges, or as VMS systems. Also, an ONVIF client can act as the visualizing client (like *ONVIF Device Manager* or *iSpy*) which communicates with the ONVIF Server, and collects the camera settings for the ONVIF stream trough port 580. With the configuration collected, the Client will start reproducing the full video stream (live or playback), will be able to use the PTZ controls, etc.; all of this will be done through the RTSP port (port 554).

The general limitation of the ONVIF technology (and of the ONVIF settings customization) is that the video in the client will only be presented with the *changed settings*, but the settings will *not apply* to the stream communication. This must be considered when designing the VMS site and the network.

The RTSP will always transfer the full camera stream gathered from the camera in the Recording Server as the ONVIF is **not** capable of reconfiguring the stream. The ONVIF client will show the customized stream but the traffic will still be "full."

ONVIF Device Manager

iSpy

The ONVIF client will connect to the ONVIF Server site on port 580 and will be able to monitor all the cameras allowed for that user. The link that you should provide to the ONVIF client is: http://onvif-bridge-hostname:580/onvif/device_service

- ONVIF Player can be any media player that supports network streaming. Such players will be able to use **only** RTSP streams. With the player you will be able to reproduce a single camera stream. To add a camera for the player and display the video stream make sure that:

- Your camera is set to the `H.264` codec
- Streaming mode is set to RTP/RTSP/TCP
- The link that you should provide to VLC is rtsp://<host>:554/live/<CameraId>
- The camera ID can find in the XProtect Management Client/Application (click on the camera “Info”).

Subject: 10.2.24 Riverside SO FlockOS Axon API Setup - Agenda

CAUTION: This email originated from outside the **Riverside Sheriff** email system.
DO NOT click links or open attachments unless you recognize the sender and know the content is safe.

Hello team, please feel free to review the attendees and agenda items below for today's meeting. Please let me know if you have any questions or concerns, or if there is anything that you would like to add to the agenda. Thank you, looking forward to speaking with you all soon!

Meeting Subject	FlockOS Axon API Setup
Meeting Details	Wednesday, October 2nd, 2024, 11:30 AM PDT **Attendees - Flock Safety** [redacted] **Attendees - Riverside SO** Josiah Diggs, *IT Supervising User Support Tech*
Email Distribution List	"Diggs, Josiah" <[redacted]> <[redacted]>

Agenda

- Meeting to set up Axon API connection to allow for setup of BWC location and Fleet 3 location on FlockOS map
  - Once API is setup, Flock will need to request Product team to enable GPS in the backend
    - This typically takes about 1 week to be enabled

Subject: #44 SB Margarita @ Date - Offline

CAUTION: This email originated from outside the **Riverside Sheriff** email system.
DO NOT click links or open attachments unless you recognize the sender and know the content is safe.

Your Flock Safety network alerted us of an offline device. After extensive review, engineers determined that #44 SB Margarita @ Date requires a technician visit in order to return to full functionality.

The Flock Safety team is actively working to schedule a technician visit, and we will update you via Daily Digest once the date is confirmed.

Thank you for your understanding, and we look forward to resolving this as soon as possible.

Stay safe,

Flock Safety Support

flock safety

Hi James Rayls,

Below you will find a summary of upcoming activities related to your Flock Safety network.

Recent Activity

Location Name	Status	Visit Type	Completed/Scheduled Date
#01 EB Railroad @ Skylink	Completed	Maintenance - Replace Equipment	1/10/2024

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.
Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team

flock safety

Hi Richard Fransik,

Below you will find a summary of upcoming activities related to your Flock Safety network.

Recent Activity

Location Name	Status	Visit Type	Completed/Scheduled Date
#15 W/B Hidden Valley @ Lonesome Dove	Completed	Maintenance - Replace Equipment	12/27/2023

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.
Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team

#01 NB Perris Blvd @ Nuevo (LN 1 & 2)	Scheduled	Maintenance - Replace Equipment	11/21/2023

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.
Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.
Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team

#84 NB Gavilan Dr @ Lake Mathews Dr	Scheduled	Installation	2/22/2024
#85 SB Gavilan Rd @ Lake Mathews Dr	Scheduled	Installation	2/22/2024

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.
Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.

Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team

flock safety

Hi Andy Martinez,

Below you will find a summary of upcoming activities related to your Flock Safety network.

Recent Activity

Location Name	Status	Visit Type	Completed/Scheduled Date
#61 NB Monroe x Ave 60	Scheduled	Maintenance - Replace Equipment	1/5/2024

Status:
Scheduling: We are actively scheduling the technician visit - be that for a pre-installation site survey or the installation. Be on the lookout for the dispatched appointment within the next week or two.
Scheduled: Barring unforeseen circumstances, the technician will be onsite for your site survey or installation on this date.
Completed: The technician has completed the visit. Next step: the experts are in the process of confirming that your cameras are functioning properly (receiving adequate sunlight, connecting regularly to the cellular network, taking high-quality images, etc.). Once that part is complete, we will grant access to your camera footage.

Visit Types:
Site Survey: The technician will confirm that the locations previously agreed upon will work for the installation. The technician will place white flags at each location according to the plan you approved.
Installation: The technician will follow the plan based on the results of the site survey.
Maintenance: Our systems have identified an issue with your camera and a technician will be onsite to resolve the issue.

Stay Safe,
Your Flock Safety Team
