Hello,

We're excited to let you know that we'll be updating your Flock Safety organization with enhanced versions of the **Search**, **Alerts**, and **Roles** pages. These updates are significant improvements based on your feedback, and we're confident they'll make a big difference for your organization. If your agency currently uses these features, they will automatically be updated to the new experience. This email has only been sent to your Flock Safety Administrator users - please forward the following as appropriate to your general users.

On 03/06, you will notice three changes to your Flock Safety system. Your Search and Alerts pages will be updated to newly designed experiences that allow you to access the search results and hotlist alerts in a more organized and efficient way. If you are an Administrator, the Roles page in Admin will also be getting a refresh to allow you to add and edit roles faster. Please review the following videos to familiarize yourself with the features ahead of their release.

What to expect:

- **Search:** Simplify investigations with easy-to-use filters, advanced mapping tools, multiple data views, and efficient options to refine search criteria for faster and more accurate results. [Watch video](#)
- **Alerts:** Enhance alert management with grouped views, hotlist search capabilities, user-specific preferences, collaborative incident feed comments, and streamlined access to detailed alert information and actions. [Watch video](#)
- **Roles (Admin-only):** Streamline user permission and network management with bulk actions, improved navigation, and greater flexibility in assigning specific permissions to networks and features. [Watch video](#)

If you prefer, you can switch back to the legacy versions of the Search and Alert pages at any time by clicking the respective banners at the top of your screen. If you need assistance, please reach out to support@flocksafety.com.

Thank you and be safe,

Myron Maret
